

**Domestic Distribution of U.S. Coal by Origin State,
Consumer, Destination and Method of Transportation, 2006**

April 2008

2006 Changes in Coal Distribution Table Format and Data Sources

The changes in the coal distribution table formats and data sources made in 2005 are carried over to the 2006 table except in several significant areas (See [Note](#) for 2005 changes). In 2005, EIA reported coal synfuel distributed to electric generating plants as a single national total. For its 2006 table, EIA used data from the EIA-3 survey to distribute synfuel to the electric generation sector on a state level, aggregated with all of the other coal (such as bituminous, subbituminous, and lignite coal) sent to electric generating plants.

EIA supplemented the EIA-3 data by making follow-up contacts with the synfuel plants to determine the mode of transportation from the synfuel plant to the electric generating consumer, which was not reported on the EIA-3A survey form. Although not contained in the EIA-6A master file, this information has been documented in an ancillary spreadsheet in the EIA electronic library.

EIA made adjustments in two other areas:

- The distribution of waste only coal (WOC) presented a problem in Pennsylvania origins since the EIA-3 reports only the state of origin, i.e. PA. In one case it was unclear if the origin was Pennsylvania Anthracite (PAA) or Pennsylvania Bituminous (PAB) and the respondent was contacted to confirm that the WOC was from a PAA origin.
- A reassignment was made for 2,445,537 tons of coal from multiple respondents with an origin of Southern West Virginia and a consumer type of “NC” (not a consumer). This volume represents all of the Southern West Virginia “NC” distribution and was reassigned as distributed to the electric generation sector of Kentucky, with an unknown mode of transportation. This improved the production/consumption balances of these states.

1 Includes distribution to Unknown consumers.

2 Includes distribution to the transportation sector.

3 Includes distribution to both the transportation sector and unknown consumers.

* Quantity is less than 500 short tons.

Note: Coal synfuel is included in individual state distributions for all sectors. Total may not equal sum of components because of independent rounding. Data for consumer categories of electric generation, residential and commercial, transportation fuel and unknown are for coal distributed to those sectors. Data for coke plants and Industrial Plants (Except Coke) are for coal receipts at the plants.

Sources: Energy Information Administration (EIA), residential and commercial, transportation fuel, and unknown consumer: Form EIA-6A, "Coal Distribution Report;" Electricity generation: Form EIA-6A, "Coal Distribution Report" and Form EIA-3, "Quarterly Coal Consumption and Quality Report - Manufacturing Plants - Schedule S1;" Coke Plants: Form EIA-5, "Quarterly Coal Consumption and Quality Report - Coke Plants;" Industrial Plants (Except Coke): Form EIA-3, "Quarterly Coal Consumption and Quality Report - Manufacturing Plants" and Form EIA-6A, "Coal Distribution Report."
