## **NOTES**

### **1) ESTIMATED DATA**

Due to the absence of official data, the following data have been estimated:

Luxembourg                      November 2008 to November 2008

### **2) COUNTRY NOTES**

Austria                              Most recent data are the best estimates from the Austrian national administration based on available preliminary data. Data is usually finalized within 6 months of first publication.

Prior to 2006 Naphtha is included in the category Other Products.

Belgium                              Most recent data are the best estimates from the Belgian national administration based on available preliminary data. Data is usually finalized within 2 months of first publication.

Due to a change in reporting methodology, there is a break in series for Naphtha between December 2007 and January 2008. Historical revisions are pending.

Canada                                Most recent data are the best estimates from the Canadian national administration based on available preliminary data. Data is usually finalized within 3 months of first publication.

Germany                              Starting from January 2007, pure Biofuels data are included in Additives / Oxygenates figures.

Mexico                                As of June 2006, due to a change in reporting methodology, a portion of NGL production is now reported as refinery intake observed. Revisions to historical data are pending.

Netherlands                        Due to a change in reporting methodology there are breaks in series between December 2006 and January 2007. Data are under investigation and revisions to current and historical data are pending.

Beginning with January 2007, a portion of Other Products has been reclassified as Additives and Oxygenates. Historical revisions are pending.

United States                        December 2006 closing stock levels are not equal to the January 2007 opening stock levels due to revisions in the 2006 data. Revisions to 2007 data are pending.
