

St. Marks

National Wildlife Refuge Bird List

St. Marks National Wildlife Refuge is on the shores of Apalachee Bay, in northwestern Florida, about 20 miles south of Tallahassee. Established in 1931, the refuge contains about 66,000 acres of salt and brackish marshes, hardwood swamps, pine flatwoods, and pine-oak uplands; parts of which are in Taylor, Jefferson, and Wakulla Counties. An additional 31,700 acres of water in Apalachee Bay are included as part of the refuge through a Presidential Proclamation. St. Marks Refuge provides an extensive wintering habitat for waterfowl and is one of the earliest such areas acquired by the Government.

Barred Owl

*St. Marks
National
Wildlife
Refuge*

The seasons bring about marked changes in both species and abundance of birdlife. Best opportunities for observing the greatest variety and number of birds are during the fall and spring. Waterfowl are most easily seen on the refuge from mid-November through late December. Shore birds are most common during late spring and early fall.

USFWS

Wood ducks

This list is in accordance with the A.O.U. Checklist as amended. Enjoy your visit!

*Symbols used in
this list are
defined as
follows*

Sp-Spring - March-May
S-Summer - June-August
F-Fall - September-November
W-Winter - December-February
***** Nest on Refuge

a-abundant a common species which is very numerous

*This blue goose,
designed by
“Ding Darling,”
has become a
symbol of the
Refuge System.*

c-common certain to be seen or heard in suitable habitat

u-uncommon present, but not certain to be seen

o-occasional seen only a few times during a season

r-rare seen at intervals of 2 to 5 years

This folder lists 274 species of birds that are considered part of the refuge's fauna. The following are additional species that are of such accidental or rare occurrence on the refuge that they have been recorded

only one or a few times and are generally considered out of their normal range:

Eared Grebe	Cave Swallow
Cory's Shearwater	Horned Lark
American Flamingo	White-breasted Nuthatch
Brant	Sprague's Pipit
Mottled Duck	Bell's Vireo
White-winged Scoter	Warbling Vireo
White-tailed Kite	Connecticut Warbler
Short-tailed Hawk	Canada Warbler
Rough-legged Hawk	Clay-colored Sparrow
Hudsonian Godwit	Lark Bunting
Buff-breasted Sandpiper	LeConte's Sparrow
Baird's Sandpiper	Fox Sparrow
Bridled Tern	Lapland Longspur
Sooty Tern	Yellow-headed Blackbird
Inca Dove	Pine Siskin
Budgerigar	Evening Grosbeak
Short-eared Owl	

If you observe any accidental or discontinued birds, please notify a refuge employee.

Ethics for Birdwatching

Take care not to disturb nesting birds, exposing eggs and young to extreme temperatures and predation.

Disturb wintering wildlife as little as possible, particularly during critical feeding and resting periods. They need all of their energy reserves to withstand the stresses of harsh weather and migration.

Do not litter! Many birds die when they become entangled in fishing lines, 6-pack rings and other trash, or when they mistake garbage for food.

For further information, contact:
