Agency

Environmental Protection Agency

Account

STAG Water and Wastewater Infrastructure Project

Project Information

Grantee State

OH

Grantee Name

Board of Fulton County Commissioners

Project Name

State Route 108 Waterline Replacement

Project Location

Suite 270

Purpose of Project

Detailed Project Description

The SR 108 waterline is part of the current Ottokee Waterline System which is an existing water supply system that has been built in the mid 1950's to provide water supply to the unincorporated areas of Fulton County within Clinton and Dover Townships. The proposed waterline will replace an existing 8" cast iron pipes that are aging and undersized.

Replacing this waterline would alleviate the potential for frequent interruption of the public water supply and exposure to waterborne disease outbreaks from contaminated water supplies; greatly preserve and promote the public health and welfare of the citizens of within the service; improve the quality of life in the area; and provide for adequate fire protection.

Total estimated cost of the project based on facilities plan or preliminary engineering report

\$950,000

Amount requested (cannot be greater than 55% of the total project amount)

\$450,000

Amount received from past appropriations

None

Does the community have a financing plan certified by an authorized local official demonstrating how it will cover the 45% matching funds?

Yes

Intended Recipient of Funds

Board of Fulton County Commissioners
125 South Fulton Street
Suite 270
Wauseon , OH 43567

Is the recipient a for-profit entity?

No

Explanation of the request (must include purpose and why it is a valuable use of taxpayer funds)

The SR 108 waterline is part of the current Ottokee Waterline System which is an existing water supply system that has been built in the mid 1950's to provide water supply to the unincorporated areas of Fulton County within Clinton and Dover Townships. The proposed waterline will replace an existing 8" cast iron pipes that are aging and undersized. Replacing this waterline would alleviate the potential for frequent interruption of the public water supply and exposure to waterborne disease outbreaks from contaminated water supplies; greatly preserve and promote the public health and welfare of the citizens of within the service; improve the quality of life in the area; and provide for adequate fire protection.
