

Appendix A. Baywide Summary Tables for the Narragansett Bay Estuary.

Table 1-A. Changes in estuarine emergent wetlands in the Narragansett Bay Estuary: 1950s to 1990s. (Note: Acreage totals reflect acreage affected by each cause so there is double counting of some lost acreage; totals are greater than the actual total loss for these wetlands.)

Table 2-A. Changes in estuarine scrub-shrub wetlands in the Narragansett Bay Estuary: 1950s to 1990s. (Note: Acreage totals reflect acreage affected by each cause so there is double counting of some lost acreage; totals are greater than the actual total loss for these wetlands.)

Table 3-A. Changes in estuarine unconsolidated shores (beaches and tidal flats) in the Narragansett Bay Estuary: 1950s to 1990s. (Note: Acreage totals reflect acreage affected by each cause so there is double counting of some lost acreage; totals are greater than the actual total loss for these wetlands.)

Table 4-A. Changes in vegetated coastal wetlands in the Narragansett Bay Estuary: 1950s to 1990s. (Changes arranged by unique vegetated wetland types; no double counting.)

Table 5-A. Changes in nonvegetated coastal wetlands in the Narragansett Bay Estuary: 1950s to 1990s. (Changes arranged by unique types; no double counting.)

Note: "Coastal processes" includes erosion and accretion related to wave and current action and to sea level changes.

Table 1-A. Changes in estuarine emergent wetlands in the Narragansett Bay Estuary:
 1950s to 1990s. (Note: Acreage totals reflect acreage affected by each cause so there is double counting
 of some lost acreage; totals are greater than the actual total loss for these wetlands.)

Type of Change	Cause of Change	Number of sites	Acres
Loss to Estuarine Water (E1UB*)			
	Boat Traffic	7	5.46
	Coastal processes	29	24.69
	Tidal restriction	10	15.93
	Unknown	4	4.80
Total		50	50.88
Loss to Estuarine Nonvegetated Wetland (E2US*)			
	Coastal processes	31	32.68
	Unknown	7	5.59
Total		38	38.27
Loss to Estuarine Vegetated Streambed (E2SB*)			
	Coastal processes	1	0.54
Total		1	0.54
Loss to Estuarine Vegetated Wetland (E2SS*)			
	<i>Iva frutescens</i> succession	31	47.82
	Succession following ditching	11	25.89
	Tidal restriction	1	0.80
	Unknown	1	4.29
Total		44	78.80
Loss to Palustrine Wetland (P_*)			
	Coastal processes	1	1.09
	<i>Iva frutescens</i> succession	1	1.88
	<i>Phragmites australis</i> invasion	2	6.31
	Succession	6	10.24
	Succession following ditching	15	46.04
	Tidal restriction	18	39.82
	Tidal restriction w/ <i>P. australis</i> invasion	1	1.23
	Unknown	6	4.47
Total		50	111.08
Loss to Upland			
	Agriculture (cropland)	1	3.46
	Agriculture (orchards, nurseries, vineyards, ornamental horticulture)	1	0.47
	Agriculture (pasture and hayfields)	1	0.73
	Barren Land (mixed barren land)	2	4.02
	Barren Land (sand areas other than beaches)	3	7.35

	Barren Land (strip mines, quarries and gravel pits)	1	0.41
	Commercial and Services (commercial and institutional structures)	4	3.34
	Commercial and Services (marinas)	4	12.55
	Commercial and Services (paved surfaces)	4	3.38
	Commercial and Services (recreational structures)	1	3.05
	Commercial and Services (unpaved surfaces)	3	2.47
	Commercial and Services (wharves, piers & shipyards)	1	1.16
	Forest (deciduous)	3	3.31
	Forest (mixed)	4	5.11
	Industrial & Commercial Complexes	1	2.15
	Rangeland (herbaceous cover)	4	14.96
	Rangeland (mixed)	3	9.85
	Rangeland (shrub and brush cover)	17	42.71
	Residential (lawns)	7	13.21
	Residential (single family)	7	22.64
	Transportation, Communications and Utilities	3	25.20
	Unknown	2	0.83
	Urban (golf courses)	5	5.86
	Urban (landfills)	1	1.61
Total		83	189.82
Grand Total Loss (all losses combined)			469.39
Gain from Estuarine Water (E1UB*)			
	Coastal processes	47	34.99
	Excavation re-vegetated	2	1.27
	<i>P. australis</i> and <i>Typha angustifolia</i> invasion	2	1.76
	<i>Phragmites australis</i> invasion	2	0.82
	Succession	1	0.41
	Succession following ditching	5	2.19
	Tidal restriction	3	1.47
	Tidal restriction w/ <i>P. australis</i> invasion	4	6.48
	Unknown	3	3.23
Total		69	52.63

**Gain from Estuarine Nonvegetated Wetland
(E2US*)**

	Coastal processes	24	32.49
	<i>P. australis & Typha angustifolia invasion</i>	1	0.83
	<i>Phragmites australis invasion</i>	2	1.61
	Succession	2	2.40
	Succession following ditching	3	5.30
	Tidal restriction	1	42.03
	Unknown	4	2.46
Total		37	87.12

Gain from Estuarine Vegetated Wetland (E2SS*)

	Coastal processes	1	0.26
	<i>P. australis & Typha angustifolia invasion</i>	1	3.31
	<i>Phragmites australis invasion</i>	6	15.07
	Succession following ditching	5	11.94
	Tidal restriction	1	0.29
	Unknown	3	2.53
Total		17	33.40

Gain from Palustrine Wetland (P_*)

	Excavation	1	1.06
	Impoundment	1	0.96
	<i>Phragmites australis invasion</i>	1	0.96
	Succession following ditching	2	2.69
	Tidal restriction w/ <i>P. australis</i> invasion	2	3.12
Total		7	8.80

Gain from Upland

	Coastal processes	7	7.83
	<i>Phragmites australis invasion</i>	3	1.50
	Succession following ditching	2	1.17
	Tidal restriction	1	1.00

Appendix B. Summary Tables for Individual Study Areas

Table 1-B. Trends in estuarine wetlands for Allins Cove from the 1930s to the 1950s and from the 1950s to the 1990s.

Table 2-B. Trends in estuarine wetlands for Calf Pasture Point from the 1930s to the 1950s and from the 1950s to the 1990s.

Table 3-B. Trends in estuarine wetlands for Jacobs Point from the 1930s to the 1950s and from the 1950s to the 1990s.

Table 4-B. Trends in estuarine wetlands for Palmer River from the 1930s to the 1950s and from the 1950s to the 1990s.

Table 5-B. Trends in estuarine wetlands for Sachuest Point from the 1930s to the 1950s and from the 1950s to the 1990s.

Table 6-B. Trends in estuarine wetlands for Wesquage Pond from the 1930s to the 1950s and from the 1950s to the 1990s.

Table 1-B. Trends in estuarine wetlands for Allins Cove from the 1930s to the 1950s and from the 1950s to the 1990s (excluding type changes within the wetland class).
