Constituent Health Care Stories

Janos – I have been to Bhutan four times and visited hospitals. Everyone is entitled to free healthcare including visitors. How can this country afford it and we cannot?

Jennifer – I am a state employee my premium is increasing to \$600/month. I would support government healthcare if you can offer it for less than I am paying now.

Sarah – I was diagnosed with Diabetes at age seven. I cannot get coverage due to my pre-existing condition. In 2003 I received a kidney-pancreas transplant.

Randy – We only need one thing to fix healthcare – tort reform! Don't screw our physicians like in Canada and the UK.
