

Bureau of Economic Analysis Strategic Plan 2009-2013

BEA's Strategic Plan

2009-2013

Our Foundation: Mission, Vision, and Values

Our Mission

The mission of the Bureau of Economic Analysis is to promote a better understanding of the U.S. economy by providing the most timely, relevant, and accurate economic accounts data in an objective and cost-effective manner.

Our Vision

To be the world's most respected producer of economic accounts.

Our Values

Integrity: Maintaining the professional reputation of BEA and the objectivity of its statistics.

Quality: Producing timely, relevant, and accurate statistics.

Excellence: Fostering staff excellence and recognizing and rewarding employee contributions.

Responsiveness: Providing customers with the programs and services they need.

Innovation: Using technology and new methodologies to effectively meet measurement challenges.

U.S. Department of Commerce Strategic Plan FY 2007-2012

BEA's mission, as defined above, is derived from the Department of Commerce's (DOC) mission, strategic goals, and objectives.

U.S. Department of Commerce Mission:

To create the conditions for economic growth and opportunity by promoting innovation, entrepreneurship, competitiveness, and stewardship.

To achieve this mission, the Department established a set of strategic goals and objectives to guide the core missions of its agencies and programs (see the Department of Commerce Strategic Plan, FY 2007-2012 available at www.doc.gov). BEA's mission derives directly from the following DOC goals and objectives:

DOC Strategic Goal 1:

Maximize U.S. competitiveness and enable economic growth for American industries, workers, and consumers.

DOC Objective 1.3:

Advance key economic and demographic data that support effective decision-making by policymakers, businesses, and the American public.

Our Challenges

To fulfill its mission and thus contribute to the Department's strategic goals and objectives, BEA must address several challenges including:

- Updating the accounts to address the rapid changes in the economy associated with the recent housing and financial crisis so that the data are better able to identify emerging imbalances and future risks to the economy.
- Expanding the accounts to address longer-term economic issues, including national priorities as health care, energy, retirement incomes, and innovation.
- Better integrating the economic data produced by BEA with the data produced by the other statistical agencies in the decentralized statistical system so as to provide more accurate and consistent data for BEA's national, international, regional, and industry accounts and for the productivity and balance sheet data jointly produced by BEA, BLS, and the Federal Reserve Board, with the support of Census and other agencies.
- Expanding and integrating BEA's investments in information technology to improve efficiency, raise staff productivity, improve customer access, and reduce respondent burden on survey respondents.
- Retaining its position as one of the leading Federal agencies in employee satisfaction by building and developing a skilled work force through effective recruitment, hiring, and retention programs, and through training and other programs.

Strategic Objectives and Goals

Strategic Objective 1:

Customers. BEA's statistics are only as useful as our customers' ability to access, use, and understand them. The Strategic Plan for 2009-2013 is designed to make BEA's economic accounts and services more responsive to the needs of its customers and partners.

Strategic Goals: BEA's program and support areas have developed the following strategic goals designed to continue and improve BEA's relationship with its customers:

- Expand External Communications and Outreach Efforts
- Emphasize Two-Way Communication
- Exploit Technology for the Best Possible Data Collection and Dissemination Methods and to Ensure Security

These goals will be accomplished through a number of projects, including a new Congressional Webpage that provides information targeted to specific audiences, the development of an agency-wide Communications plan, and continued enhancements to our regional interactive mapping applications.

Strategic Objective 2:

Employees: BEA will continue to be one of the Federal Government's leading employers – and one of the world's leading statistical agencies - only if we continue to attract, develop, and retain a highly qualified, diverse workforce prepared to innovate and improve BEA's statistics.

Strategic Goals: BEA's greatest strength is its employees. The strategic goals that will allow our program and support areas to maintain that strength are as follows:

- Manage BEA's Workforce Toward Effective Accomplishment of the Mission
- Sustain and Enhance BEA's Internal Communications
- Assess and Improve BEA's Organizational Climate
- Sustain and Enhance Workforce Safety

These goals will be achieved through a number of efforts, including the implementation of changes recommended in BEA's most recent Organizational Assessment Survey, the establishment of a BEA-wide Communications Plan, a wide array of professional development opportunities for BEA staff (including management and leadership training, training to improve communication skills, and university courses), the inclusion of responsibilities in each employee's performance plan that link to BEA's Strategic Plan, and the provision of a safe and comfortable work environment.

Strategic Objective 3:

Management. Upgrade resource management through the coordinated use of technological and other resources to improve accuracy, efficiency, and flexibility.

Strategic Goals: BEA will work to maximize the effectiveness of its resources by addressing the following strategic goals:

- Ensure the Continuation of BEA's Mission and Essential Functions in an Emergency
- Sustain and Enhance the Management of BEA's Resources
- Enhance and Integrate Internal and External Statistical Review and Planning
- Efficiently Manage IT Investments in Support of BEA's Mission, Vision, and Strategic Objectives
- Maintain Infrastructure to Ensure Reliability and Security

These goals are served by many activities that allow BEA to function effectively on a daily basis, such as the expansion of the high-performance STATS-II processing system to further reduce statistical processing times and to maximize the time available for analyzing statistical results. BEA is dedicating additional resources to its IT investment for the first time since 2003. BEA will modernize its processing systems and better integrate the way these systems communicate with each other; thereby building in efficiencies that will save time and that will allow our staff to focus even more on analysis of the statistics.

Strategic Objective 4:

Statistics: The strategic goals related to this objective are designed to upgrade BEA's economic statistics by improving statistical methodologies and source data and by using new technologies.

BEA's economic statistics programs are the heart of our work. Our statistics are used as critical ingredients in budget forecasts, public policymaking, monetary policy decisions, and business financial strategies. To ensure BEA data is as timely, relevant, and accurate as demanded by our customers, we must continually update our methodologies and our approaches to capture the dynamic U.S. and world economies. To do so, BEA's program and support areas have developed the following strategic goals:

- Continue to Update and Improve Priority Statistics
- Address Data Gaps, Accelerate Releases, and Implement Other Improvements
- Improve Consistency and Integration Across BEA Accounts and with Other Accounts
- Improve Consistency with International Standards
- Implement Budget and Research Initiatives to Develop New Statistics
- Redesign Core Systems and Applications to Improve Timeliness, Accuracy, and Comprehensiveness of Bureau Outputs
- Standardize Data Structures and Databases to Use Web Technologies to Improve the Collection, Access, and Dissemination of Data

The many detailed activities that will allow BEA to successfully reach these goals and fulfill its objectives vary widely across its program areas. They include the continued preparation and release of indispensable statistics such as GDP, regional personal income, and GDP by state and by metropolitan area, and GDP by industry statistics; the development of a health-care "satellite" account that will allow for better assessment of the returns to various health treatments and the sources of change in health care costs, and the continued redesign and improvement of international surveys to capture additional and more detailed information that allows better analysis of international transactions. Thanks to new funding in 2009, BEA will also move forward with its plans to develop research and development statistics, and incorporate these statistics into its economic accounts—something BEA's customers have been anxiously awaiting.

The Details

The detailed activities that support BEA's strategic objectives and goals are referred to in the Strategic Plan as "milestones." In the 2009-2013 Strategic Plan, there are over 170 milestones, and each one is designed to contribute to one or more of the goals and objectives discussed above. These milestones are presented, by program or support area, strategic objective, and strategic goal in the attached matrix.

Appendix A: Evaluating Success through Performance Measures

BEA's progress toward achieving its mission is reported each year in the "BEA Strategic Plan Report Card" at www.bea.gov. Progress is determined through the use of a number of performance measures that are developed

Preparation and Release of Economic Statistics

BEA's progress with respect to the preparation and release of its economic accounts and the human and technological resources that support them—that is, its base statistical programs—is monitored by three long-term performance measures. These measures track BEA's ability to release its estimates on time and on schedule, customer satisfaction with BEA programs, and the accuracy of one of the most important BEA statistics, GDP.

1. Timeliness: Reliability of Delivery of Economic Data (Number of Scheduled Releases Issued on Time).

The importance of BEA data as an ingredient for sound economic decision making requires BEA to deliver data into the hands of decision makers and other data users not only quickly but also reliably—that is, on schedule. The measure is derived as the number of scheduled releases released on time. It is also evaluated as the number of successfully-completed milestones related to target.

2. Relevance: Customer Satisfaction with Quality of Products and Services (Mean Rating on a 5-Point Scale)

Timeliness and accuracy are meaningless if the data are not relevant to the needs of BEA's customers. To measure customer satisfaction, BEA conducts an annual mail and Internet survey of users that gauge their use of, and satisfaction with, BEA products. The measure is derived as the ranking received, on a 5.0 scale, on BEA's annual survey of customer satisfaction. It is also evaluated as the number of successfully-completed milestones related to target.

3. Accuracy: Percent of GDP Estimates Correct

BEA's most important statistic is gross domestic product (GDP). This measure uses a composite index to track BEA's success in estimating GDP with respect to six indicators of accuracy: (1) whether the economy is expanding or contracting; (2) whether the economy is growing faster or slower, (3) whether the economy is strong or weak, (4) the trend GDP growth rate, (5) the average quarterly GDP growth rate, and (6) the level of current-dollar GDP. It is also evaluated as the number of successfully-completed milestones related to target.

Budget Initiatives

BEA's progress with respect to its budget initiatives is monitored by evaluating its success in completing those milestones related to each initiative. The budget initiative performance measures reflected in BEA's strategic plan for 2009–2013 are:

1. Development of More Accurate and Comprehensive Measures of the Health Sector in GDP (Health Sector)

This initiative seeks to develop a more accurate measure of the health care sector in GDP and to create a supplemental, satellite account that provides detailed and specific information on the expenditures of the health care industry and the costs of treating specific diseases.

2. Preparation of R&D and Innovation Accounts

This initiative will allow BEA to fully research, identify, and quantify R&D as an investment with the goal of incorporating it into GDP and the other economic accounts.
