Dataset Key Phrases

Companion File Name format And Version	Date This File Generated archive Version Number	Table Explanation Of Zero Or Negative Values
None ; 0	2004/07/20 ; 1	Blank corrections are performed after samples are compared to the DL and flagged accordingly. Only the variables that have a mean blank concentration that is >5% of the mean air concentration (in units of ug/filter) are corrected by subtracting the mean blank concentration (in ug/filter). In some cases this results in final concentrations in ug/m ³ that are negative or less than the stated detection limit (in ug/m ³). Such samples are not flagged as BDL because on a ug/filter basis before blank correction they were above the detection limit. The user may also choose to classify this samples as BDL.

Detection limits (DL) are based upon 3*SD of field blanks in ug/filter. Non blank-corrected laboratory analysis results in ug/filter for each sample are compared to this DL to determine if the sample is BDL and then flagged accordingly (V1 means BDL).	no uncertainty reported	None	None

NARSTO Standard Flags

Flag: NARSTO	Description
H1	Historical data that have not been assessed or validated
M1	Missing value because no value is available
M2	Missing value because invalidated by data originator
	Missing value because invalidated by Data Originator
	Missing value because invalidated by data originator
V0	Valid value
V1	Valid value but comprised wholly or partially of below detection limit data
V2	Valid estimated value
V3	Valid interpolated value
V4	Valid value despite failing to meet some QC or statistical criteria
V5	Valid value but qualified because of possible contamination (e.g., pollution source, laboratory contamination source)
V6	Valid value but qualified due to non-standard sampling conditions
	Valid value but qualified due to non-standard sampling conditions (e.g., instrument malfunction, sample handling)
	Valid value but qualified due to non-standard sampling conditions
V7	Valid value but set equal to the detection limit (DL) because the measured value was below the DL
