

requirement. In the interim, earth station applicants must submit a table as an attachment to the FCC Form 312 to show their compliance with the off-axis EIRP requirement.

2. Earth station licensees who plan to use a contention protocol must certify that their contention protocol usage will be reasonable. In the future, the Commission will revise the FCC Form 312 in MyIBFS to provide a streamlined method for earth station applicants planning to use a contention protocol to make this certification.

The information collection requirements accounted for in this collection are necessary to determine the technical and legal qualifications of applicants or licensees to operate a station, transfer or assign a license, and to determine whether the authorization is in the public interest, convenience and necessity. Without such information, the Commission could not determine whether to permit respondents to provide telecommunication services in the U.S. Therefore, the Commission would be unable to fulfill its statutory responsibilities in accordance with the Communications Act of 1934, as amended, and the obligations imposed on parties to the World Trade Organization (WTO) Basic Telecom Agreement.
