

July 21/97

Secretary Donald Clark

I'm writing about the "Made in America Label". Please make it plain that products assembled in the USA but made of foreign material be labeled "assembled in the USA" and products made of American material and assembled in the "USA be labeled "Made in the USA". I feel that the Federal Trade Commission is favoring the wealthy and Corporate America. Please try to correct this belief

Thank you

William Hollingsworth
