

July 19, 1997

Corydon, Indiana

Dear Sir,

Big business has sunk to new lows. Made in the USA label is an out-right lie just to fool the American people.

Don't give me that crap about products having to be "substantially" made here to bear the label.

We all know about the \$2 a day workers in Asia and Central America doing the bulk of the work and shipping the products back to American workers who are poorly paid to finish the job.

I have disgust and anger for greedy big business and for our government.

The made in America label should mean just that. Made in America  
Made: built, constructed by an American worker.

Sir, I am a senior citizen with two grandsons in the armed service of ~~of~~ our country. Greedy big business and yes even the Federal Trade Commission may someday call upon these loyal Americans to protect their butts!

Do your duty and tell these corporate raiders where to go.

Sincerely,

Mary Ann Everts
