

2006 UCS and PEER Survey of U.S. FOOD AND DRUG ADMINISTRATION SCIENTISTS

The Union of Concerned Scientists (UCS) is an independent nonprofit alliance of more than 100,000 concerned citizens and scientists who augment rigorous scientific analysis with innovative thinking and committed citizen advocacy to build a cleaner, healthier environment and a safer world. Public Employees for Environmental Responsibility (PEER) is a national nonprofit alliance of state and federal resource professionals working to promote environmental ethics and accountability. UCS and PEER are surveying all FDA medical officers, consumer safety officers, chemists and other specialists (referenced collectively as “scientists” in this survey).

*These survey questions were developed with significant input from your colleagues. Please take a few moments to **fill out the survey on your personal time** and mail it back in the enclosed postage-paid envelope. **As with all contact with UCS and PEER, any sensitive information in survey responses will be strictly confidential.** UCS and PEER will tabulate the survey results and make them available to you on their websites.*

MISSION

1. FDA has sufficient resources to effectively perform its mission of “protecting the public health ... and helping the public get the accurate, science-based information they need to use medicines and foods to improve their health.” [Excerpt from full FDA mission statement]
