About This Guide

This guide provides resources recommended by the National Diabetes Education Program's (NDEP) African American/African Ancestry and Hispanic/Latino Work Group member organizations on health, nutrition, and physical activity. Several resources offer educational materials and support to the general public, including people who have diabetes or are at risk for developing it. Some others are geared toward health care professionals.

The resources in the guide are divided into the following sections:

- NDEP resources information and publications list.
- Other federal government organizations dedicated to diabetes prevention, weight loss, and physical activity.
- National volunteer and professional organizations.
- Web sites geared toward people already diagnosed with diabetes.
- Additional Web site resources.
- Meal planning resources.
- Cookbooks.

Each resource can provide materials or information that may help you teach others how to prevent or delay type 2 diabetes. When materials are available in Spanish, you will see this symbol: **SP**

All resources listed were accurate at time of publication: October 2008.

Need More Information

Have you found additional resources on nutrition and physical activity, health, or how to prevent or delay type 2 diabetes that you would like to share with other community health workers (CHWs)? NDEP has a Web Board just for you called the Diabetes CHW Web Board. You will find a detailed description of the Web Board in the User's Guide of this toolkit. Web Board registration instructions can be found in this Resource Guide under "Diabetes Community Health Worker Web Board" on page 23.

If a person’s Medicare Part B coverage began on or after January 1, 2005, Medicare will cover a one-time preventive physical exam within the first 6 months after enrollment in Part B.

The exam will include a thorough review of health, education, and counseling about the preventive services needed, such as certain screenings and shots, and referrals for other care.

The “Welcome to Medicare” physical exam is a great chance to get screened for diabetes risk and to talk with a health care provider about family history and how to stay healthy.
