Worksheet for Computing Excess Railroad Retirement Taxes Withheld in 2008

If you worked for two or more employers in 2008, and your total earnings exceeded \$75,900, too much tax may have been withheld. This worksheet was developed to help you determine and claim credit for the excess taxes being collected. If more than the maximum tax was withheld by a single employer, you must contact your employer for a refund. **There is a new procedure that must be followed to claim excess tax credits from the IRS**

To claim credit for excess **Tier I taxes** being collected, you must use your 2008 **Form 1040** income tax return. (*Note: You cannot claim credit for excess Tier I tax on Form 1040A or 1040EZ*). To claim credit for excess **Tier II taxes**, being collected, you must submit IRS **Form 843**.
