PLANETARY PROTECTION: POLICIES AND PRACTICES

A COURSE IN PLANETARY PROTECTION

PLANETARY PROTECTION: POLICIES AND PRACTICES

OVERVIEW

This NASA-developed course is designed to familiarize current and future planetary protection practitioners with the NASA and COSPAR Planetary Protection Programs. The course will review all applicable policies, practices and procedures necessary to implement a successful planetary protection program and will emphasize integration of the managerial, administrative and laboratory components of planetary protection.

WHO SHOULD TAKE THIS COURSE?

This course is designed for managers, engineers, designers and lab technicians interested in learning about the theory and application of the principles of planetary protection.

WHY TAKE THIS COURSE?

This course provides a comprehensive understanding of planetary protection policies and procedures and demonstrates how personnel with diverse skills and responsibilities are coordinated to implement a successful planetary protection program.

This course provides participants with a complete overview of all facets of planetary protection; from governing policies and reporting requirements to hands-on laboratory training in microbial sampling and data management. The course is taught by recognized experts in the field with years of practical experience in all aspects of planetary protection.

COURSE OUTLINE

DAY 1

- *Introduction and Overview of PP*
- *Treaties, Regulations, Government Policies*
- *Biology of Microflora: Introduction to Extremophiles*
- *Laboratory Techniques and Practices: Part I*

DAY 2

- *Planning for Compliance*
- *Guidelines for Hardware Design*
- *Lessons Learned - The Engineer's Perspective*
- *Laboratory Techniques and Practices: Part II*
- *Compliance, Statistics, Data Analysis and Reporting*

DAY 3

- *Review of Upcoming Missions*
- *Special Topics (TBD)*
- *Review of Laboratory Results*

LOCATIONS

This course will be offered at various U.S. locations twice a year and once a year in Europe. Cost includes all course materials, lunches and a reception for participants on the first night.

Course Location for Spring, 2006

*Joseph M. Long Marine Laboratory
(Seymour Center)
100 Shaffer Road
Santa Cruz, California 95060*

*Dates: April 18-20, 2006
Cost: \$600 per person*

Additional Class Planned for Fall, 2006
