*U.S.-World and U.S.-Japan trade balances as recorded by the U.S. Census Bureau on a "Census basis" for the FT-900 Monthly Press Release, not the balance of payments basis employed by the Bureau of Economic Analysis to bring the data in line with concepts used to prepare the international and national accounts. Census does not report individual country or product data on the BOP basis. The Census basis produces a lower apparent deficit. Automotive product grouping as defined by the Office of Automotive Affairs (OAA) for certain road motor vehicles and automotive parts, and applied to the Census database.

**Annualized from year-to-date figures.

This table prepared by the Office of Transportation and Machinery, USDOC. Last update 05-13-2009
