SUBJECT: Class Deviation to the Department of Defense Federal Acquisition
Regulation Supplement (DFARS) to Implement Deputy Secretary of
Defense Determinations and Findings (D&Fs) regarding Foreign
Participation in DoD Acquisitions in Support of Operations in Afghanistan

Attached is a class deviation from three DFARS provisions and five DFARS
clauses (Attachment 1) to implement determinations made by the Deputy Secretary of
Defense (Attachments 2 and 3) regarding foreign participation in future DoD acquisitions
in support of operations in Afghanistan.

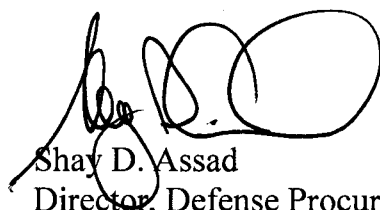

The Deputy Secretary has waived the World Trade Organization Government
Procurement Agreement prohibition on acquisitions from non-designated countries in
order to allow acquisition from the nine South Caucasus/Central and South Asian states
(SC/CASA): Armenia, Azerbaijan, Georgia, Kazakhstan, Kyrgyzstan, Pakistan,
Tajikistan, Turkmenistan, and Uzbekistan.

The Deputy Secretary also has waived the Balance of Payments Program in order to eliminate the 50 percent evaluation factor that would otherwise be applied to offers of products from the SC/CASA states to support operations in Afghanistan.

As provided in the Deputy Secretary's determinations dated July 9, 2009, the waivers apply to a DoD acquisition of end products, construction materials, or services when the primary purpose of the acquisition is to support operations in Afghanistan. This memorandum establishes procedures to be followed by all DoD contracting officers when conducting such acquisitions or by GSA contracting officers when acting on behalf of DoD and using funds appropriated for DoD.

Contracting officers shall use the solicitation provisions and contract clauses in Attachment 1 in solicitations and contracts for acquisitions in support of operations in Afghanistan in accordance with the criteria in the clause prescriptions at 225.1101 and 225.75.

This class deviation is effective upon signature, and remains in effect until incorporated in the DFARS or until otherwise rescinded. My point of contact is Patricia Foley, who may be reached at 703-693-1145, or patricia.foley@osd.mil.

(a)(4) "Canadian end product," means an article that—

(i) Is wholly the growth, product, or manufacture of Canada; or

(ii) In the case of an article that consists in whole or in part of materials from another country, has been substantially transformed in Canada into a new and different article of commerce with a name, character, or use distinct from that of the article or articles from which it was transformed. The term refers to a product offered for purchase under a supply contract, but for purposes of calculating the value of the end product includes services (except transportation services) incidental to its supply, provided that the value of those incidental services does not exceed the value of the product itself.

(c) The Contractor shall deliver under this contract only domestic end products unless, in its offer, it specified delivery of qualifying country, **SC/CASA state**, Canadian, or other foreign end products in the Buy American Act--Free Trade Agreements--Balance of Payments Program Certificate provision of the solicitation. If the Contractor certified in its offer that it will deliver a qualifying country end product, **an SC/CASA state end product**, or a Canadian end product, the Contractor shall deliver a qualifying country end product, **an SC/CASA state end product**, a Canadian end product, or, at the Contractor's option, a domestic end product.

Materials purchased directly by the Government are supplies, not construction material.

“Cost of components” means--

(1) For components purchased by the Contractor, the acquisition cost, including transportation costs to the place of incorporation into the end product (whether or not such costs are paid to a domestic firm), and any applicable duty (whether or not a duty-free entry certificate is issued); or

(ii) In the case of a construction material that consists in whole or in part of materials from another country, has been substantially transformed in as SC/CASA state into a new and different construction material distinct from the material from which it was transformed.

“United States” means the 50 States, the District of Columbia, and outlying areas.

(b) *Domestic preference.* This clause implements the Balance of Payments Program by providing a preference for domestic construction material. The Contractor shall use only domestic construction material **or SC/CASA construction material** in performing this contract, except for--

(1) Construction material valued at or below the simplified acquisition threshold in Part 2 of the Federal Acquisition Regulation; or

(2) The construction material or components listed by the Government as follows:

Findings and Determination
Waiver of the Procurement Prohibition of Section 302(a) of the Trade Agreements
Act of 1979, as Amended

I hereby make the following findings and determination regarding the application of the procurement prohibition of section 302(a) of the Trade Agreements Act of 1979, as amended (TAA) (19 U.S.C. § 2512(a)), to acquisitions by the Department of Defense (DoD) and the General Service Administration (GSA), on behalf of DoD, of products and services in direct support of operations in Afghanistan from the following South Caucasus and Central and South Asian (SC/CASA) states: Armenia, Azerbaijan, Georgia, Kazakhstan, Kyrgyzstan, Pakistan, Tajikistan, Turkmenistan, and Uzbekistan. This determination is necessary to allow the acquisition of products, including construction material, and services from those SC/CASA states that otherwise are not eligible for acquisitions in support of operations in Afghanistan. This will improve local market and transportation infrastructure in the region in order to reduce overall U.S. transportation costs and risks and help facilitate the free flow of regular, reliable, large-scale shipments of products and services through the region in support of operations in Afghanistan; it will encourage countries in the region to cooperate in expanding supply routes through their territory in support of operations in Afghanistan; and it will help develop a more robust and enduring commercial and transportation network in the region that will connect Afghanistan to its neighbors, promote regional commerce, diversify existing infrastructure, and bolster stability and prosperity.

Findings

1. For acquisitions covered by the World Trade Organization Government Procurement Agreement (WTO GPA), section 302(a) of the TAA prohibits the acquisition of products and services from any country that is not a "designated" country or an otherwise eligible country for purposes of the TAA (i.e., a qualifying country).
2. Many countries, including SC/CASA states are not "designated" countries or otherwise eligible countries, and products and services from those countries may not be provided under DoD and GSA acquisitions covered by the WTO GPA.
3. Pursuant to section 302(b)(2) of the TAA (19 U.S.C. § 2512(b)), the President may authorize agency heads to waive, subject to interagency review and general policy guidance by the interagency trade organization established under section 242(a) of the Trade Expansion Act of 1962 (19 U.S.C. § 1872(a)), the procurement prohibition in section 302(a) on a case-by-case basis when in the national interest. The President delegated this authority to the United States Trade Representative in Executive Order 12260 of December 31, 1980.
4. Currently, most supplies for Afghanistan are transported via the Pakistan ground lines of communication (PakGLOC). Insurgent, terrorist and criminal elements

have attacked the PakGLOC. These attacks, throughout Pakistan, in addition to existing physical and bureaucratic limitations to these routes, highlight the need to improve the diversity and expand the capacity of logistic routes. To that end, the Northern Distribution Network (NDN) has been established and will reduce reliance on the PakGLOC to support operations in Afghanistan. It is expected that a sizable, sustained force level in Afghanistan will be in place through the next several years, and maintaining a viable NDN is in the national security interest of the United States. In order for the NDN to succeed, it is imperative that DoD be authorized to purchase products and services locally from the SC/CASA states through which the NDN runs. This authority will allow the United States to provide the host nations with some economic benefit and will reduce overall U.S. transportation costs and risks. Failure to provide this authority may lead to disruption of the NDN and would complicate DoD's ability to reduce logistical risks. DoD acquisition of products and services from the SC/CASA states will contribute toward developing a responsible, stable, and cooperative coalition of national partners to facilitate the movement of supplies through the NDN in support of operations in Afghanistan. It is also important to enable DoD contracting officers to be able to satisfy mission needs in the most efficient, rapid, low-risk, and cost-effective way, which often means relying on local or regional sources. Buying local products and services will demonstrate that the United States values the support of countries in the region with which the United States intends to develop a lasting partnership to stabilize Afghanistan. A waiver of the section 302(a) prohibition will provide opportunities for companies in these countries to secure contracts and subcontracts to provide products and services in support of a robust supply route into Afghanistan. By allowing for their participation in these efforts, a waiver will serve the national interest.

5. DoD will require contractors from the SC/CASA states to inform their governments of their participation in DoD acquisitions. In addition, DoD will require that such contractors advise their governments that they generally will not have such opportunities in the future unless their governments provide reciprocal procurement opportunities to U.S. products and services and suppliers of such products and services. This will further the objective of the waiver authority to encourage the provision of reciprocal government procurement opportunities to U.S. products and services and suppliers of such products and services and to encourage the SC/CASA states to eventually become parties to the WTO GPA.
6. By letter of June 2, 2009, the United States Trade Representative has authorized the Secretary of Defense to waive the prohibition in section 302(a) for DoD and GSA, for acquisitions on behalf of DoD, for acquisitions of products, including construction materials and services from the SC/CASA states, in direct support of operations in Afghanistan, in accordance with DoD's request of May 21, 2009.

Determination

I hereby waive the procurement prohibition of section 302(a) of the TAA with respect to acquisitions by DoD and by GSA on behalf of DoD, in direct support of operations in Afghanistan, to the extent that it prohibits acquisitions of products and services from the SC/CASA states. Waiver of the procurement prohibition of section 302(a) is in the national interest. This waiver will apply to DoD and GSA acquisitions of products and services in direct support of operations in Afghanistan.

Findings and Determination Exemption from the Balance of Payments Program

I hereby make the following findings and determination regarding the application of the Balance of Payments Program (BOPP) to acquisitions by Department of Defense (DoD) of products (except arms, ammunition and war materials) in direct support of operations in Afghanistan within the following South Caucasus and Central and South Asian (SC/CASA) states: Armenia, Azerbaijan, Georgia, Kazakhstan, Kyrgyzstan, Pakistan, Tajikistan, Turkmenistan, and Uzbekistan. The purpose of this determination is to waive application of the BOPP to bids or offers of products of the SC/CASA states so as to compete on an equal basis for DoD contracts.

Findings

1. The BOPP was established by Secretary of Defense McNamara in July 1962, when he directed the Secretaries of the Military Departments to limit expenditures of appropriated funds outside the United States to a minimum. With limited exceptions, the BOPP policy is to acquire only domestic end products and domestic construction materials for use outside the United States. Its restrictions are similar to those of the Buy American Act (BAA).
2. The Secretary of Defense has, at various times, determined that the application of BOPP to products of certain foreign countries is not in the public interest. As an example, the BOPP has been waived for purchases of items of supply from the 21 countries (NATO and other friendly countries) with which the Department has reciprocal defense procurement Memoranda of Understanding (MOU) (i.e., qualifying countries). This allows the acquisition of supplies and defense equipment from these countries for use outside the United States without application of the 50 percent evaluation factor.
3. The free flow of regular, reliable, large-scale shipments of products through Afghanistan's regional neighbors is critical to the stabilization of the region and to U.S. national security interests. Currently, the overwhelming majority of products that support operations in Afghanistan are transported via Pakistan ground lines of communication (PakGLOC). Insurgent, terrorist, and criminal elements have shown an ability to attack the PakGLOC, which, in addition to existing physical and bureaucratic limitations to these routes, highlight the need to improve the diversity and expand the capacity of logistic routes. To this end, a Northern Distribution Network (NDN) has been established. Waiver of the BOPP will allow the United States to provide the host nations with some economic benefit and will reduce overall U.S. transportation costs and risks. Failure to provide this authority may lead to disruption of the NDN and would complicate DoD's ability to reduce logistic risks. Such economic benefit will demonstrate that the United States values the support of these countries, and that we intend to develop a lasting partnership. Requiring BOPP application to the SC/CASA would seriously endanger the support of the SC/CASA countries vital to the success of the NDN.

OSD 07463-09

4. It is important to the national security interests of the United States to maintain diverse and high-capacity supply routes in direct support of operations in Afghanistan. The ability to establish and maintain diverse and high-capacity GLOCs is critical to the sustainment of operations. This determination will assist in ensuring regular, reliable, large-scale shipments of goods and supplies through Afghanistan's regional countries.

Determination

Because of the importance to national security and national defense, I hereby determine that it would be inconsistent with the public interest to apply the provisions of the Balance of Payments Program to bids or offers of products and construction materials from Armenia, Azerbaijan, Georgia, Kazakhstan, Kyrgyzstan, Pakistan, Tajikistan, Turkmenistan, and Uzbekistan to facilitate the movement of supplies through the NDN in direct support of operations in Afghanistan. This waiver will not apply to DoD acquisitions of arms, ammunition, and war materials.
