Odor Detection, Mitigation and Control Technology Forum and Roundtable Discussion

October 30, 2007 -- 9 a.m. to 4 p.m.
South Coast AQMD Headquarters Auditorium
21865 Copley Drive
Diamond Bar, CA 91765

The South Coast Air Quality Management (AQMD) receives thousands of odor complaints every year. These odors can be persistent or recurring at irregular intervals, making identifying the sources challenging. Adding to the challenge is the wide range of people's sensitivity to odors and the subjectivity involved in describing them.

The AQMD is hosting this one-day forum at which a panel of technical experts will discuss the science of odors and what technologies currently exist to help detect, identify, and control odors. Panel sessions will be conducted in the morning, and there will be a roundtable discussion followed by a public question and answer period in the afternoon.

The AQMD welcomes the public, researchers, industry and anyone else interested in odor identification and mitigation to attend this forum. Attendance is free (lunch will be on your own). The forum will be webcast live, and recorded for future viewing. The agenda, presentation materials and webcast link will be posted on the AQMD's Technology Forum/Roundtable website at:

<http://www.aqmd.gov/tao/ConferencesWorkshops/techforum.htm>

For questions about this forum, please feel free to contact Raul Dominguez, Jr., Ph.D. at rdominguez@aqmd.gov or (909) 396-2225.

Cleaning the air that we breathe...
