

ALBUQUERQUE-BERNALILLO COUNTY
AIR QUALITY CONTROL BOARD

IN THE MATTER OF THE PETITION TO AMEND
20.11.1 NMAC, *GENERAL PROVISIONS*, AND 20.11.8 NMAC, *AMBIENT AIR
QUALITY STANDARDS*, AND SUBMIT AMENDMENTS TO EPA AS A
REVISION TO THE STATE IMPLEMENTATION PLAN (SIP)

AQCB Petition No. 2009-3

Air Quality Division,
Environmental Health Department,
City of Albuquerque, Petitioner

Petition to amend 20.11.1 NMAC, *General Provisions*, and 20.11.8 NMAC, *Ambient Air Quality Standards*, and submit amendments to EPA as a revision to the SIP

The Environmental Health Department of the City of Albuquerque, by and through the Air Quality Division (AQD), asks the Albuquerque-Bernalillo County Air Quality Control Board (Board) for a hearing at which the Board will hear AQD's request that the Board adopt amendments to 20.11.1 NMAC, *General Provisions*, and 20.11.8 NMAC, *Ambient Air Quality Standards*, and submit these amendments to EPA as a revision to the State Implementation Plan (SIP). This Petition includes a request for a hearing on these matters and permission to provide a court reporter and hearing officer for the hearing. As grounds, Petitioner states the following:

1. The New Mexico Air Quality Control Act (Air Act), NMSA 1978, Sections 74-2-4 and 74-2-5.B(1) [1967 as amended through 2007] authorizes and requires the Board to adopt, amend, or replace air quality regulations and to adopt air quality plans (SIPs) under NMSA 1978, Section 74-2-5.B(2).

RECEIVED
ENVIRONMENTAL HEALTH
MAY 22 AM 9:25

2. The currently effective version of 20.11.1 NMAC, *General Provisions*, contains an error. Section 20.11.1.14 NMAC, *Interpretation*, belongs at 20.11.8.14 NMAC, and was left in 20.11.1 NMAC by mistake when these two rules were amended in 2004. The proposed amendment deletes this section.

3. The proposed amendments will align definition language codified at 20.11.1.7 NMAC with definition language in: 40 CFR Part 51.100(s); The New Mexico Air Quality Control Act; and proposed 20.11.49 NMAC, *Excess Emissions*.

4. The proposed amendments will align local ambient air quality standards codified at 20.11.8.13 NMAC, with federal standards.

5. The proposed amendments will correct style and formatting.

6. It is anticipated that the hearing will take approximately 1 hour or less.

7. The proposed Public Review Drafts for 20.11.1 NMAC, *General Provisions*, and 20.11.8 NMAC, *Ambient Air Quality Standards* are attached as AQD Exhibit #1a and #1b respectively.

Respectfully submitted,

(2) For purposes of determining compliance with emissions limits, VOC will be measured by the test methods in the approved state implementation plan (SIP) or 40 CFR Part 60, Appendix A, as applicable. Where such a method also measures compounds with negligible photochemical reactivity, these negligibility-reactive compounds may be excluded as VOC if the amount of such compounds is accurately quantified, and such exclusion is approved by the enforcement authority.

(3) As a precondition to excluding these compounds as VOC or at any time thereafter, the enforcement authority may require an owner or operator to provide monitoring or testing methods and results demonstrating, to the satisfaction of the enforcement authority, the amount of negligibly-reactive compounds in the source's emissions.

(4) For purposes of federal enforcement for a specific source, the EPA shall use the test methods specified in the applicable EPA-approved SIP, in a permit issued pursuant to a program approved or promulgated under Title V of the Act, or under 40 CFR Part 51, Subpart I or Appendix S, or under 40 CFR Parts 52 or 60. The EPA shall not be bound by any state determination as to appropriate methods for testing or monitoring negligibly-reactive compounds if such determination is not reflected in any of the above provisions.

(5) The following compound(s) are VOC for purposes of all recordkeeping, emissions reporting, photochemical dispersion modeling and inventory requirements which apply to VOC and shall be uniquely identified in emission reports, but are not VOC for purposes of VOC emissions limitations or VOC content requirements: t-butyl acetate.

(6) For the purposes of determining compliance with California's aerosol coatings reactivity-based regulation, (as described in the California Code of Regulations, Title 17, Division 3, Chapter 1, Subchapter 8.5, Article 3), any organic compound in the volatile portion of an aerosol coating is counted towards that product's reactivity-based limit. Therefore, the compounds identified in Subsection FFFF of 20.11.1.7 NMAC as negligibly reactive and excluded from EPA's definition of VOCs are to be counted towards a product's reactivity limit for the purposes of determining compliance with California's aerosol coatings reactivity-based regulation.

(7) For the purposes of determining compliance with EPA's aerosol coatings reactivity based regulation (as described in 40 CFR Part 59 – *National Volatile Organic Compound Emission Standards for Consumer and Commercial Products*) any organic compound in the volatile portion of an aerosol coating is counted towards the product's reactivity-based limit, as provided in 40 CFR Part 59, Subpart E. Therefore, the compounds that are used in aerosol coating products and that are identified in Subsection FFFF of 20.11.1.7 NMAC as negligibly reactive and excluded from EPA's definition of VOC are to be counted towards a product's reactivity limit for the purposes of determining compliance with EPA's aerosol coatings reactivity-based national regulation, as provided in 40 CFR Part 59, Subpart E.; 40 CFR 51.100.(s);
