FOR RELEASE:
FRIDAY, JULY 31, 2009

MIAMI AREA EMPLOYMENT: JUNE 2009 Rate of Job Loss Similar to that for the Nation

Total nonfarm employment for the Miami-Fort Lauderdale-Pompano Beach Metropolitan Statistical Area stood at 2,252,100 in June 2009, a decline of 96,400 from one year ago, the Bureau of Labor Statistics of the U.S. Department of Labor reported today. The 4.1-percent rate of job loss in the Miami metropolitan area was similar to the national decrease of 4.2 percent from June 2008 to June 2009. Regional Commissioner Janet S. Rankin noted that the over-the-year declines in Miami have continued for 18 consecutive months. (See chart A and table 1. All data in this release are not seasonally adjusted; accordingly, over-the-year analysis is used throughout.)

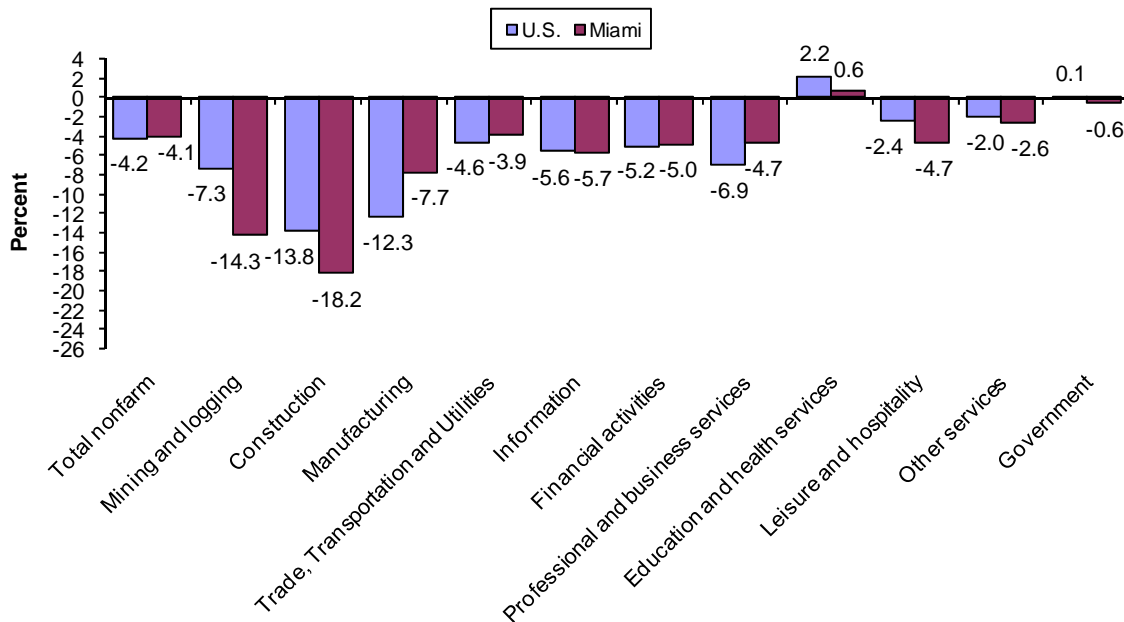

Metropolitan Divisions

The Miami metropolitan area is made up of three metropolitan divisions—separately identifiable employment centers within the larger metropolitan area. Job losses in each of the metropolitan divisions were roughly equivalent to their respective shares of the local workforce. The Miami-Miami Beach-Kendall Metropolitan Division, which made up 44 percent of the area workforce, lost 37,200 jobs from June a year ago. The Fort Lauderdale-Pompano Beach-Deerfield Beach Metropolitan Division, with 33 percent of area employment, shed 34,200 jobs and the West Palm Beach-Boca Raton-Boynton Beach Metropolitan Division, with 23 percent of the workforce, lost 25,000 jobs over the 12-month period.

Industry Employment

In the Miami metropolitan area, the construction supersector experienced the largest employment decline, down 25,000 over the year. Locally, construction employment decreased at an 18.2-percent pace in the area, greater than the national rate of decline at 13.8 percent. (See table 1.)

Chart B. Over-the-year percent change in employment by industry supersector, United States and the Miami metropolitan area, June 2009

Trade, transportation, and utilities shed 20,900 jobs in the Miami area from June a year ago and professional and business services, 16,900. Both of these industries lost jobs at a slower rate locally than they did nationally.

In contrast to the widespread declines, one industry sector, education and health services, added 2,000 jobs in the Miami area growing at a 0.6-percent pace. Still, the rate of growth was considerably slower than the 2.2-percent increase experienced nationwide.

Employment in the 12 Largest Metropolitan Areas

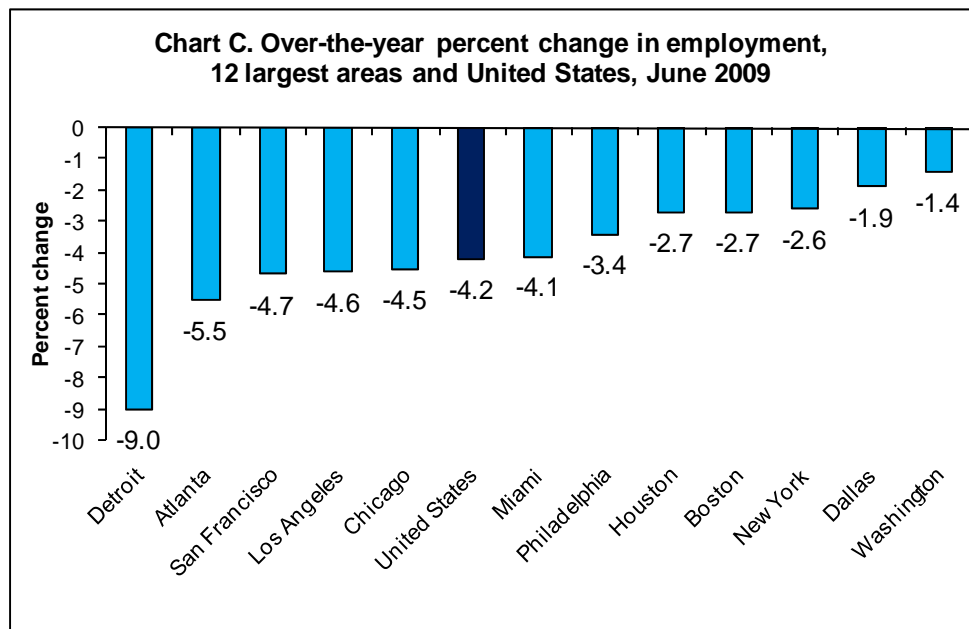

The Miami area was 1 of the nation's 12 largest metropolitan statistical areas in June 2009. All of these areas experienced over-the-year job losses. (See chart C and table 2.) Nationally, employment fell 4.2 percent from June 2008 to June 2009.

Of these 12 metropolitan areas, 5—Detroit-Warren-Livonia, Atlanta-Sandy Springs-Marietta, San Francisco-Oakland-Fremont, Los Angeles-Long Beach-Santa Ana, and Chicago-Naperville-Joliet—recorded employment declines at a faster-than-average pace. Of these five, only Detroit's rate of job loss, at 9.0 percent, was more than double the national average. The other four experienced declines from 5.5 to 4.5 percent.

Conversely, seven metropolitan areas lost jobs at a slower pace than that for the nation. Five of these areas experienced declines in the 4.1- to 2.6-percent range—Miami-Fort Lauderdale-Pompano Beach, Philadelphia-Camden-Wilmington, Boston-Cambridge-Quincy, Houston-Sugar Land-Baytown, and New York-Northern New Jersey-Long Island. Dallas-Fort Worth-Arlington and Washington-Arlington-Alexandria posted the smallest losses (-1.9 and -1.4 percent, respectively).

Three metropolitan areas experienced employment declines of over 200,000 from June a year ago: Los Angeles (-259,100), New York (-226,900), and Chicago (-207,600). Only one area, Washington, lost fewer than 50,000 jobs over the year.

In 4 of the 12 areas, professional and business services recorded the largest loss of jobs from June 2008, while trade, transportation, and utilities registered the largest loss in 4 additional areas. Conversely, education and health services added the most jobs in 9 of the 12 areas.

Technical Note

This release presents nonfarm payroll employment estimates from the Current Employment Statistics (CES) program. The CES survey is a Federal-State cooperative endeavor in which State employment security agencies prepare the data using concepts, definitions, and technical procedures prescribed by the Bureau of Labor Statistics.

Employment

Definitions. Employment data refer to persons on establishment payrolls who receive pay for any part of the pay period which includes the 12th of the month. Persons are counted at their place of work rather than at their places of residence; those appearing on more than one payroll are counted on each payroll. Industries are classified on the basis of their principal activity in accordance with the 2002 version of the North American Industry Classification System (NAICS).

Method of estimation. The employment data are estimated using a “link relative” technique in which a ratio (link relative) of current-month employment to that of the previous month is computed from a sample of establishments reporting for both months. The estimates of employment for the current month are obtained by multiplying the estimates for the previous month by these ratios. Small-domain models are used as the official estimators for approximately 39 percent of CES published series which have insufficient sample for direct sample-based estimates.

Annual revisions. Employment estimates are adjusted annually to a complete count of jobs, called benchmarks, derived principally from tax reports which are submitted by employers who are covered under state unemployment insurance (UI) laws. The benchmark information is used to adjust the monthly estimates between the new benchmark and the preceding one and also to establish the level of employment for the new benchmark month. Thus, the benchmarking process establishes the level of employment, and the sample is used to measure the month-to-month changes in the level for the subsequent months.

Reliability of the estimates

The estimates presented in this release are based on sample survey and administrative data and thus are subject to sampling and other types of errors. Sampling error is a measure of sampling variability—that is, variation that occurs by chance because a sample rather than the entire population is surveyed. Survey data are also subject to nonsampling errors, such as those which can be introduced into the data collection and processing operations. Estimates not directly derived from sample surveys are subject to additional errors resulting from the special estimation processes used. The sums of individual items may not always equal the totals shown in the same tables because of rounding.

Employment estimates. Measures of sampling error for state CES data at the supersector level are available on the BLS Web site at www.bls.gov/sae/790stderr.htm. Information on recent benchmark revisions for states is available at www.bls.gov/sae/.

Area definitions. The substate area data published in this release reflect the standards and definitions established by the U.S. Office of Management and Budget on November 20, 2008. A detailed list of the geographic definitions is available at at <http://www.bls.gov/lau/lausmsa.htm>.

Additional information

Industry employment data for states and metropolitan areas from the CES program are also available in the above mentioned news releases and from the Internet at www.bls.gov/sae/.

For personal assistance or further information on the Current Employment Statistics program, as well as other Bureau programs, contact the Southeast BLS information office at 404-893-4222 from 9:00 A.M. to 12:00 P.M. and from 1:00 P.M. to 4:00 P.M. ET.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: 202-691-5200; TDD message referral phone: 1-800-877-8339.

Area definitions

The Miami-Fort Lauderdale-Pompano Beach, Fl., Metropolitan Statistical Area (MSA) includes Broward, Miami-Dade, and Palm Beach Counties in Florida.

The Fort Lauderdale-Pompano Beach-Deerfield Beach, Fl., Metropolitan Division (MD) includes Broward County in Florida.

The Miami-Miami Beach-Kendall, Fl., Metropolitan Division (MD) includes Miami-Dade County in Florida.

The West Palm Beach-Boca Raton-Boynton Beach, Fl., Metropolitan Division (MD) includes Palm Beach County in Florida.
