About this directory

The co-occurring disorder statewide resource directory is developed to assist the public in locating appropriate services for individuals who have both mental health and substance use problems. A survey was sent to all mental health and chemical dependency providers Spring 2007 to collect program information. Participation in the survey was voluntary. The directory provides the most current information by county to facilitate referrals and access to treatment services.

Both mental health and substance abuse treatment programs responded to the co-occurring disorders program survey and are included in the directory.

For the Oregon Addictions and Mental Health Division (AMH) Co-Occurring Disorders Survey of Treatment Services Report, please refer to the AMH Web site at www.oregon.gov/DHS/addiction/services.shtml#treatment.

For further information regarding evidence-based practices, please refer to the AMH Web site at www.oregon.gov/DHS/mentalhealth/ebp/main.shtml#practices.

Change of information process

To change your information listing in this directory e-mail changes to c.j.reid@state.or.us or call 503-945-9813.

Definitions

1. AMH means the Department of Human Services, Addictions and Mental Health Division.
2. COD means co-occurring substance use and mental health disorders.
3. Clinical staff means any staff with the following credentials as defined in the Oregon Administrative Rules (OAR 309-032-535 and 415-051-0057) for the purpose of this directory:
 - Certified Addictions Counselor I (CADC I)
 - Certified Addictions Counselor II (CADCII)
 - Certified Addictions Counselor III (CADC III)
 - Qualified Mental Health Associate (QMHA)
 - Qualified Mental Health Professional (QMHA)
4. EBPs means evidence-based practices.
5. N/R means “not reported” in reference to the survey questions.
6. Level of treatment integration refers to models of service integration.
 - a. Fully integrated substance abuse and mental health program means providing both substance abuse and mental health services to develop a single treatment plan addressing both sets of conditions and the continuing formal interaction and cooperation of these providers in the ongoing reassessment and treatment of the client.
 - b. Substance abuse program with mental health capability means a program that makes arrangements for coordination and collaboration for mental health assessment, treatment services, and psychopharmacologic monitoring, either on site or coordinated off site.
 - c. Mental Health program with substance abuse capability means a program that makes arrangements for coordination and collaboration for substance abuse assessment, treatment services, and recovery supports (dual disorder self help meetings), either on site or coordinated off site.
 - d. Parallel model means a formal process of sharing responsibility for treating a person with COD, involving regular and planned communication, and sharing progress reports.

Acronyms
