## GONDHION-AND-Perreormange OF GOMMIERCIALBANKS

## Condition and Performance of Commercial Banks

## Summary

National banks scored further gains in net income during the second quarter of 2004, posting solid performances in both net interest income and noninterest income. A decline in provisioning also contributed to rising net income.

Core deposits, which had been growing briskly for 3 years, slowed in the second quarter, but at large banks much of this slowdown was offset by gains in foreign deposits. Banks continued to add to their securities holdings even in an environment of rising interest rates.

Near-term challenges include how to maintain growth in loan volume under economic conditions that suggest slower growth in borrowing by both business and consumers.

## Key Trends

Both return on equity (ROE) and return on assets (ROA) at national banks remained near all-time records in the second quarter. Net interest income, the largest component of growth of net income, rose by $\$ 3.3$ billion ( 9.5 percent) year-over-year, with noninterest income up $\$ 2.7$ billion ( 9.6 percent), and a reduction in provisioning again contributing to net income growth (see Table 1). Noninterest expense continued to rise, as it has over the recent past.

Table 1-Both interest and non interest income show solid growth

| National banks | Major income components (Change, \$ millions) |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |
|  | 2002Q2-03Q2 | \% Change | 2003Q2-04Q2 | \% Change |
| Revenues |  |  |  |  |
| Net interest income | 454 | 1.3\% | 3,335 | 9.5\% |
| Real gains/losses sec | 816 | n.m. | -704 | n.m. |
| Non interest income | 1,523 | 5.7\% | 2,693 | 9.6\% |
| Expenses |  |  |  |  |
| Provisioning | -1,502 | -19.3\% | -1,417 | -22.5\% |
| Noninterest expense | 2,766 | 8.4\% | 3,373 | 9.4\% |
| Net income | 1,118 | 7.9\% | 2,099 | 13.8\% |

Total assets grew at 7.5 percent, compared to the long-run average of 6 percent. A slowdown in growth of core deposits (down from 13 percent a year ago to 7 percent in the second quarter) was largely offset by strong growth in foreign deposits at larger banks (up 30 percent), and by growth in Federal Home Loan Bank advances at smaller banks (up 20 percent). Both large and small banks continued to expand their securities holdings (up 13 percent at large banks and 9 percent at small banks), as steep yield curves continued to attract bank portfolio managers. Growth in mortgage-backed securities was particularly pronounced at large banks, where they accounted for 48 percent of the increase in securities.

Figure 1-Rise in net interest income driven by continued strong asset growth; net interest margin (NIM) continues to drop, especially at large banks

Source: Integrated Banking Information System (OCC)
*2004 growth calculated June 2003 to June 2004. All other growth calculated year ago, June 2004 NIM.

Asset growth more than offset the continued decline in net interest margins, which fell to an all-time low for our data series, which begins in 1984 (See Figure 1). Small-bank NIM has been at an historic low for several quarters. For larger banks, NIM has drifted down over the last two years, and now stands at a 16-year low.

Loan growth remained strong at both large and small banks, led by residential real estate, where loans rose 37 percent year-over-year. Consumer loans rose 17 percent in the aggregate, with credit card loans up 11 percent.

Many have asked what would happen to bank income if interest rates continue to rise, as is widely anticipated. Figure 2 shows that the last time interest rates rose sharply, a decade ago, NIMs rose for smaller banks. The shaded area shows the time of rising interest rates, January 1994 through February 1995. During this time, NIMs at smaller banks rose by 27 basis points before settling back for a net gain of 15 basis points. Meanwhile, NIMs actually fell at larger banks. The benefits of rising interest rates went largely to wholesale banks. Wholesale loans, on average, re-price more quickly than retail loans, so wholesale lenders do better in an environment of rising interest rates.

Figure 2-Small banks may see net interest margin benefit with rising rates

Source: Integrated Banking Information System (OCC) Quarterly data from 1992 Q1 through 1996 Q4.

At smaller banks, the composition of lending has changed over the last decade. In 1994, loan growth at smaller banks was split about evenly between wholesale and retail loans. But since then, small-bank loan growth has come primarily from wholesale lending, as Figure 3 shows. Wholesale lending claimed 42 percent of loan growth in 1994, but 68 percent in the first half of 2004. Within wholesale lending, the fastest growing sector has been business real estate lending, which now accounts for about three-quarters of the increase. Retail lending, on the other hand, has slipped from 50 percent of small-bank loan growth in 1994, to only 12 percent in the first half of 2004.

Figure 3-Smaller banks now much more dependent on business lending for loan growth

Source: Integrated Banking Information System (OCC)
*2004 data as of June 30, 2004. All other data as of year-end. Data are merger adjusted and held constant. Retail includes residential RE (1- to 4 -family and home equity) and consumer, wholesale, is CBT and business RE (multifamily, construction, and CRE).

The composition of lending to small-businesses has also changed, particularly in the last three years. As Figure 4 indicates, small business owners have sharply increased their home mortgage debt since 2001, at the same time that they have scaled back their business borrowing. This strongly suggests that they have taken advantage of the boom in residential real estate values to substitute mortgage debt for business debt, and helps to explain the still-sluggish growth in commercial and industrial (C\&I) loans, even in the small business sector, which has been growing.

Figure 4-Smaller businesses substituting residential mortgages for commercial and industrial loans

Source: Federal Reserve Board (Haver Analytics)
Quarterly data through March 2004.

In the coming quarters, banks face the challenge of maintaining growth in net interest income despite low NIMs. So bar, banks have been able to offset low NIMs with solid growth in loan volume. But a still-sluggish job market and the high debt levels born by U.S. households have led to a slowdown in the growth of consumer spending. This makes it unlikely that consumers will continue to drive growth in bank lending. Persistently high oil prices, or a sharp increase in interest rates, would drain more purchasing power from consumers, and further depress spending and borrowing. Moreover, three years into the recovery, commercial and industrial lending has yet to pick up, despite solid growth in business investment over the last year. Thus banks cannot count on either consumers or businesses to drive loan growth.
