May 1981

The data compilation and documentation necessary for the Medical History (Ages 12-74) Data Tape were done by Wilbur Hadden, Kurt Maurer, Everette Collins, Evelyn S. Stanton, Dorothy Blodgett and Rita M. Weinberger of the Division of Health Examination Statistics, National Center for Health Statistics. A special note of gratitude is due Darian Varga who patiently typed and retyped this material.

MEDICAL HISTORY (AGES 12-74) DATA TAPE

Health and Nutrition Examination Survey, HANES I, 1971-1975

Description of Survey: A detailed description of the design, content and operation of HANES I is provided in the following reports: Plan and Operation of the Health and Nutrition Examination Survey, DHEW Pub. No. (HSM) 73-1310, Series 1, Nos. 10a and 10b, Public Health Service, Washington, D. C., U. S. Government Printing Office, February 1973. Also provided is a draft report on the augmentation survey of adults describing the relevant field work conducted between July 1974 and October 1975.

Target Population: HANES I was conducted on a nationwide probability sample of approximately 28,000 persons, ages 1-74 years, from the civilian, noninstitutionalized population of the coterminous United States, excepting those persons residing on Indian reservations. The survey started in April 1971 and for many survey components was completed in June 1974. The HANES I sample was selected so that certain population groups thought to be at high risk of malnutrition (persons with low incomes, preschool children, women of childbearing age and the elderly) were oversampled at known rates. Adjusted sampling weights were then computed within 60 age, sex and race categories in order to inflate the sample in such a manner as to closely reflect the noninstitutionalized population, ages 1-74, of the United States at the midpoint of the survey.

Although the main emphasis of HANES I was on nutrition, a subset of those sample persons aged 25-74 received a more detailed health examination which was continued through October 1975. No particular oversampling of subgroups of the population was done in this subsample (e.g. women of childbearing age were not oversampled as they were for the major nutrition component of HANES I). This subsample is also representative of the United States population aged 25-74 at the midpoint of HANES I.

After the nutrition survey was completed, the detailed examination given to the 25-74 age group was continued until the total number of examined persons was approximately double the number of examinees who received the detailed examination during the nutrition survey.

Data Collection: Information for all examined sample persons in HANES I was obtained by means of a household interview, a general medical history, a 24-hour dietary intake recall interview, a food frequency interview, a food program questionnaire, a general medical examination, dental, dermatological and ophthalmological examinations, anthropometric measurement, hand-wrist x-rays (of those ages 1-17 only) and 24 hematological, blood chemistry, and urological laboratory determinations.

In addition to the information received on all examined persons by means of the above questionnaires, procedures and measurements, the following data were gathered on the subsample of adults aged 25-74:

a medical history supplement; supplementary questionnaires concerning arthritis, respiratory and cardiovascular conditions (when applicable); a health care needs questionnaire; a general well-being questionnaire; an extended medical examination; x-rays of the chest and hip and knee joints; audiometry; electrocardiography; goniometry; spirometry; pulmonary diffusion and tuberculin tests; along with additional laboratory determinations.

Use of HANES Data

With the goal of mutual benefit, NCHS requests the cooperation of recipients of data tapes in certain actions related to their use:

- A. Any published material derived from the data should acknowledge the National Center for Health Statistics as the original source. It should also include a disclaimer which credits any analyses, interpretations, or conclusions reached to the author (recipient of the tape) and not to NCHS, which is responsible only for the initial data.
- B. Consumers who wish to publish a technical description of the data will make a reasonable effort to insure that the description is not inconsistent with that published by NCHS. This does not mean, however, that NCHS will review such descriptions.

Errors in the Data Sets and Survey Differences

The data users tapes have been subjected to a great deal of careful editing. However, due to the large volume of data in the series, it is likely that a small number of errors or discrepancies remain undetected. We would appreciate if any such errors are detected that they be brought to our attention so that new corrected copies of the tape can be created and errata sheets issued to previous purchasers.

Some of the continuous data items have extremely high or low values and we have verified that they do in fact appear that way on the hard documents; that is, we have verified that the values have not been incorrectly keyed.

In general, we have not attempted to resolve any differences that may exist between estimates derived from the various subsamples of HANES I. Nor have we made any comparisons between estimates from HANES I and previous surveys conducted by the Division of Health Examination Statistics.

Variance Estimation

Because the Health and Nutrition Examination Survey is based upon a complex sample design, the assumptions of many statistical tests and routinely available statistical programs are not met. For this reason, when estimates of the variances of statistics from HANES are computed, the technique of estimation must be based upon complex sampling theory. In order to provide the user with the capability of estimating the complex sample variances, we have provided Strata and Primary Sampling Unit (PSU) codes on the HANES user tapes in tape positions 194-198. However, these codes are suitable for making variance estimates only for examination locations 1-65 and 1-100. To compute variance estimates for examination locations 1-35 or 66-100, it is necessary to recode the current Strata-PSU codes according to the specifications that follow. The resultant recoded Strata-PSU codes should be used only for locations 1-35 and 66-100.

One computer program that should be widely available sometime around the summer of 1978 as part of the Statistical Analysis System (available from the SAS Institute, Inc., Post Office Box 10066, Raleigh, North Carolina 27605) is capable of using the Strata-PSU codes provided for HANES to compute complex sample variances. Other programs may also be available.

In those Strata, referred to as certainty or self-representing Strata, the PSU codes are actually the segment numbers. Neither the Strata codes nor the PSU codes are the original codes used in the formation of the HANES sample design, but are none-the-less a unique recoding of the original codes. For further discussion of the sample design of HANES, the user should consult the publications of the National Center for Health Statistics-- Series 1-Nos. 10a and 14 and the detailed note for tape positions 158-193.

Recode Specifications for Strata-PSU Codes

First.--Create a file with only those records in the file for examination locations 1-35.*

Second.--Retain the original Strata-PSU codes in Strata 7-10 and 13 in the original form as the recoded Strata-PSU codes.

Third.--Recode the remaining strata according to the chart below.

Fourth.--Repeat the process for examination locations 66-100.*

TAPE CHARACTERISTICS

Title: Medical History (Ages 12-74) Data Tape

Catalog Number: 4081

Data Set Name: HEHANESI.DU408103

Record Length: 500

Blocksize: 4000

Number of Records: 18,836

Number of Reels: 1

Recording Mode: Fixed Block, EBCDIC

Channel: 9 Track

Created by: Division of Health Examination Statistics
National Center for Health Statistics
Hyattsville, Maryland

General Notes

Asterisks on the Tape Description: Some of the data items were obtained only for a particular subsample of HANES. Consequently some of these items appear to have a great deal of missing data (coded as BLANK) due to nonresponse, but in fact the data is missing because the design of HANES dictated that the item was to be obtained only for a particular subsample. (For further discussion of the various subsamples in HANES the user should see the detailed note for tape positions 158-193.)

To alert the user to this fact asterisks were put on the tape description. One asterisk denotes that the data item was obtained only on examinees at locations 1-65 and two asterisks denote that it was obtained only at locations 66-100.

Demographic Information: An advance letter, announcing the forthcoming arrival of an interviewer from the U.S. Bureau of the Census, was mailed to each household that fell into the sample area. The interviewer subsequently visited the household to ascertain its composition and to administer a questionnaire, the primary purpose of which was to obtain demographic information. The questionnaire was administered to each potential sample person that was available and competent enough to respond to questions. In the event that a potential sample person was not at home at the time of interview, any responsible adult in the household was asked to respond to the questions for the absent person. Demographic information for each of the examinees appears in tape positions 1-200.

Medical History (Ages 12-74) Data Collection: For the main part of the survey the medical history was taken in the sample person's home by an interviewer of the Health Examination Survey. The interviewer, a Health Examination Representative (HER), visited the sample person's home after the Census interviewing was complete and sample selection made. In addition to asking the medical history questions the interviewer had the important responsibility of enlisting the sample persons in the survey, gaining their cooperation and consent to the examination. The HER had to explain the purposes of the survey and convince the sample persons to make an appointment to come in for the examination. Further, the interviewer also administered a Food Programs Questionnaire and, if the sample person was in the detailed examination subsample, a General Medical History. When administering the questionnaires the interviewer was to try to interview the respondent in private to encourage openness and honesty on the part of the respondent and enhance the feeling of confidentiality. During the continuation of the detailed sample most of these tasks were assumed by the Census interviewer, although some of the questions were transferred to a questionnaire administered by the physician.

Medical History Data Editing: The interview forms were keyed by the Census Bureau, which ran certain edits for ranges, incomplete reporting or recording and skip patterns, flagging problematic data, and delivered the data to the Center on tape. Center personnel verified problematic data and did further edits for consistency, completeness and accuracy of the data. Where there was a question, reference was made to microfilm records of the original questionnaires.

Other Medical History Data: The detailed sample persons answered some additional medical history questions. These can be found on the Health Care Needs, General Medical History and Supplements on Respiratory and Cardiovascular Data Tape (catalog number 4091). All detailed persons answered the Health Care Needs Questionnaire, and the General Medical History Supplement, and those who indicated that they had some problems in screening questions on the History Supplement were asked further questions from the Respiratory or Cardiovascular Supplements.

DEMOGRAPHIC DATA SUMMARY - HANES I

	<u>Tape Positions</u>
Sample sequence number	1
Size of place	10
SMSA-not SMSA	11
Type of living quarters	12
Land usage	13
If rural, asked - How many acres of land are included	14
If 10 acres or more asked - Sale of crops, etc. amount to \$50 or more ..	15
If 10 acres or less asked - Sale of crops, etc. amount to \$250 or more .	16
Age - head of household	17
Sex - head of household	19
Highest grade attended - "head of household	20
Race - head of household	22
Total number of persons in household	23
Total sample persons in household	25
Number of rooms in house	27
Is there piped water	28
If yes, is there hot and cold piped water	29
If yes to piped water - Does house have a sink with piped water	30
Does house have a range or cook stove	31
Does house have a refrigerator.....	32
Are kitchen facilities used by anyone not living in household	33
Total family income group	34
NOTE: The following income questions were asked <u>only</u> if "Total Family Income" was less than \$7,000	
During Past Year Did you or Any Members of Your Family Receive Money From:	
Wages or salaries	36
If yes - How much altogether before deductions	37
Social Security or Railroad Retirement	41
If yes - How much altogether	42
Welfare payments or other public assistance	46
If yes - How much altogether	47
Unemployment or Workman's Compensation	51
If yes - How much altogether	52
Government employee pensions or private pensions	56
If yes - How much altogether	57

	<u>Tape Positions</u>
Dividends, interest or rent	61
If yes - How much altogether	62
Net income from own non-farm business, professional practice or partnership	66
If yes - How much altogether	67
Net income from a farm	71
If yes - How much altogether	72
Veteran's payments	76
If yes - How much altogether	77
Alimony, child support or contributions from persons not living in household	81
If yes - How much altogether	82
Any other income	86
If yes - How much altogether	87
Total amount	91
Family unit code	95
Relationship to head of household	100
Age at interview	101
Race of examined person	103
Sex of examined person	104
Marital status	105
Date of birth (month and year)	106
Place of birth	110
Highest grade of regular school ever attended	112
Did he finish the grade	114
Is he attending school now	115
Has he ever attended a school of any kind	116
If yes - What kind of school	117
Is any language other than English frequently spoken in the household .	118
If yes - What language	119
What is your main ancestry or national origin	120
What was he doing most of past three months	122
If "something else" - What was he doing	123
If "keeping house" or "something else" - Did he work at a job or business at any time during the past three months	124
If "working" - Did he work full-time or part-time	125
Did he work at any time last week or the week before (not around house)	126
If no - Even though he did not work during that time, does he have a job or business	127

	<u>Tape Positions</u>
Was he looking for work or on lay-off from a job	128
If yes - Which	129
Class of worker	130
If self-employed in "own" business and not a farm, is the business incorporated	131
Business or industry code	132
Occupation code	135
Date of examination	138
Age at examination	144
Farm/non-farm	146
Poverty index	147
Region	150
 FOOD PROGRAMS APPLICABILITY	 151
Are you certified to participate in the food stamp program?	152
Are you buying food stamps now?	153
What is the main reason you aren't participating in the program?	154
Are you certified to participate in the commodity distribution program?	155
Are you receiving commodity foods now for your family?	156
Why aren't you participating in the program?	157

MEDICAL HISTORY (AGES 12-74) DATA SUMMARY - HANES I

	<u>Tape Positions</u>
CATALOGUE NUMBER - 4081	201
Do you have an illness or condition which interferes with your eating?	228
Do you have an illness which has recently cut down your appetite?	229
Do you have trouble chewing steaks, chops or other firm meats?	230
Do you have trouble biting apples or corn-on-the-cob?	231
Do you have trouble biting or chewing any other food?	232
Are there any foods you avoid eating because they disagree with you?	233
What are they? (Milk, fats, greens, seafood, other)	234
Do you have episodes of pain or discomfort in your abdomen or stomach of at least three days per month?	239
Do you have difficulty swallowing at least three days per month?	240
Do you have episodes of vomiting of at least three days per month?	241
Have you ever had yellow jaundice?	242
Did a doctor ever tell you that you had protein, albumin, blood or sugar in your urine?	243
Which? (Protein, albumin, blood, or sugar)	244
During the past six months have you had parasites or worms in your stools? .	248
Do you have trouble with your bowels?	249
How often do you usually have a bowel movement?	250
Have your movements ever been white, gray, dark black or streaked with blood?	251
Which? (White, gray, dark black or streaked with blood)	252
Have you ever had an abdominal operation?	256
Was it for? (Ulcers; gallstones; hiatus hernia of the diaphragm; tumor of stomach, bowel or colon; tumor or cyst of the womb or ovaries; other)	257

HEALTH CONDITIONS

Has a doctor ever told you that you have any of the following conditions;
and if so, do you still have it? How many years ago did you first have
it?

Arthritis	263
Gout	266
Asthma	269
Chronic bronchitis or emphysema	272
Tuberculosis	275
Rheumatic fever	278
Heart murmur	281
Heart failure	284
Heart attack	287
High blood pressure	290
Stroke	293

HEALTH CONDITIONS - continued

Tape
Positions

Peptic, stomach or duodenal ulcer	296
Recurrent or chronic enteritis	299
Colitis (spastic colon, mucous colitis)	302
Gallstones	305
Hepatitis	308
Chronic cough	311
Pleurisy	314
Low blood pressure	317
Hives	320
Hay fever	323
Allergies to food	326
Other allergies	329
Thyroid disease	332
Diabetes	335
Polio or paralysis	338
Hiatus hernia of the diaphragm	341
Loss of blood from stomach or bowels	344
Kidney disease or kidney stones	347
Malignant tumor or growth	350
Benign tumor, growth, or cyst	353
Trouble with blood not clotting properly	356
Nervous breakdown	359
Fracture of hip	362
Fracture of wrist	365
Fracture of spine	368
Fracture of any other bone	371
Have you ever had anemia?	374
How long ago?	375
Did a doctor tell you that you had anemia?	377
What caused it? (Poor diet; childbirth; accidental loss of blood; illness; surgery; other)	378
Were you treated for this condition by a doctor?	384
Was treatment ...? (A better diet; iron pills; iron shots; vitamin pills; vitamin shots; transfusions; other)	385
Are you still being treated for it?	392
Have you ever had trouble seeing?	393
Did you see a doctor about it?	394
Have you ever worn glasses or contacts?	395
Do you still wear them?	396
When do (did) you wear them? (All the time; for reading or close work; for distance vision; at other times)	397
Do (did) you have trouble with vision even when wearing glasses or contacts?	401
How old were you when you first wore them?	402
Have you ever had to miss work or school because of trouble seeing or other eye trouble?	403

During the past year have you had at least one drink of beer, wine, or
 liquor? 404
 How often do you drink? 405
 Which do you most frequently drink? 406
 When you drink, how much do you usually drink over 24 hours? 407

Do you eat dirt or clay, starch or any materials which might be considered
 unusual? 409
 Which do you eat? 410

During the past six months have you used any medicine, drugs, or pills for
 any of the following:

Sleep problems or insomnia 413
 Headache 414
 Other pains 415
 Upset stomach or indigestion 416
 Weak heart 417
 Allergies 418
 Nerves 419
 Thyroid trouble 420
 Lack of pep 421
 Convulsions 422
 High blood pressure 423
 Bowel trouble 424
 Skin conditions 425
 Water loss (fluid pills) 426
 Weight loss 427
 Infection 428

Are you on a special diet? 429
 What is the diet for? (To lose weight; diabetes; kidney failure; ulcers;
 allergies; heart trouble or high blood pressure; pregnancy; other reason). 430
 What kind of diet is it? (Low fat; low protein; low salt; low carbohydrate;
 low calorie; other) 438
 Was this diet ordered by a doctor? 444

In your usual day, aside from recreation, how active are you? 445
 Do you get much exercise in things you do for recreation? 446

May I see your box of table salt? (Iodized/Not iodized) 447
 What is the most you have ever weighed? 448
 How old were you then? 451
 What is the least you have weighed since you were 18? 453
 How old were you then? 456

(Asked of females only)

How old were you when your periods or menstrual cycle started? 458
 Have they entirely stopped? 460
 At what age? 461
 Have you taken birth control pills during the past six months? 463

(Asked of females only) - continued

Tape
Positions

Are you taking them now?	464
Are you or have you ever been pregnant?	465
What is the total number of pregnancies you have had?	466
What is the total number of miscarriages you have had?	468
What is the total number of live births you have had?	470
Are you pregnant now?	472
Which month of pregnancy are you in?	473
Have you had a pregnancy that ended within the last 12 months?	475
How many months ago did that pregnancy end?	476
Are you breast feeding?	477

SCHOOL LUNCH, MILK, AND BREAKFAST PROGRAMS (Asked for 12-19 year olds only)

Is there a school lunch program at the school that ... attends?	478
How many times a week does he usually participate?	479
How much does he pay for his lunch per day?	480
Is there a special milk program at the school that ... attends?	482
How many times a week does he usually participate?	483
Is there a school breakfast program at the school that ... attends?	484
How many times a week does he usually participate?	485
How much does he pay for his breakfast per day?	486

DETAILED NOTES

TAPE POSITION 10

Size of Place

Size of place classification was derived from the 1960 census. According to the definition used in the 1960 census, the urban population was comprised of all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, boroughs, villages and towns (except towns in New York, New England, and Wisconsin); (b) the densely settled urban fringe, whether incorporated or unincorporated, of urbanized areas; (c) towns in New England and townships in New Jersey and Pennsylvania which contained no incorporated municipalities as subdivisions and had either 2,500 inhabitants or more, or a population of 2,500 to 25,000 and a density of 1,500 persons or more per square mile; (d) counties in states other than the New England states, New Jersey, and Pennsylvania, that had no incorporated municipalities within their boundaries and had a density of 1,500 persons per square mile; and (e) unincorporated places of 2,500 inhabitants or more not included in any urban fringe. The remaining population was classified as rural.

Urban areas are further classified by population size for places within urbanized areas and other places outside urbanized areas.

DETAILED NOTES

TAPE POSITION 11

SMSA

A standard metropolitan statistical area is basically a county or a group of contiguous counties which contains at least one city of 50,000 inhabitants or more, or "twin cities" with a combined population of at least 50,000. In addition to the county or counties containing such a city or cities, contiguous counties are included in an SMSA if, according to the 1960 Census, they are socially and economically integrated with the central city. Each SMSA must include at least one central city, and the complete title of an SMSA identifies the central city or cities.

DETAILED NOTES

TAPE POSITIONS 22 AND 103

Race

The race of the respondent was marked by observation and it was assumed the race of all related persons was the same as the respondent unless otherwise learned. The race categories were "White", "Negro" or "other." If the appropriate category could not be marked by observation, then race was asked. Persons of races other than White or Negro, such as Japanese, Chinese, American Indian, Korean, Hindu, Eskimo, etc. were reported as "Other." Mexicans were included with "White" unless definitely known to be American Indian or of other nonwhite race.

DETAILED NOTES

TAPE POSITIONS 34-35

Total Family Income Group

The income group represents the total combined family income for the past twelve (12) months. It includes income from all sources such as wages, salaries, social security or retirement benefits, help from relatives, rent from property and so forth. The income groups were not reconciled to the component parts (tape positions 36-94). The income component parts were not asked when the gross income was greater than \$6,999 per annum. However, amounts greater than \$6,999 appear in tape positions 37-40, 67-70, and 72-75. Some respondents reported a loss of income from their nonfarm business, professional practice, partnership or farm and this explains why some data fields are greater than \$6,999, but the individual total in tape positions 91-94 does not exceed this figure.

DETAILED NOTES

TAPE POSITIONS 132-134 AND 135-137

Industry and Occupation Codes

A person's occupation may be defined as his principal job or business. For this survey purpose, the principal job or business of a respondent is defined in one of the following ways: If the person worked during the two week interview period or had a job or business, the question concerning his occupation (or work) applies to his job during that period. If the respondent held more than one job, the question is directed to the one at which he spent the most time. It refers to the one he considers most important when equal time is spent at each job. A person who has not begun work at a new job, is looking for work, or is on layoff from work is questioned about his last full-time civilian job. A full-time job is defined as one at which the person spent 35 or more hours per week and which lasted two consecutive weeks or more. A person who has a job to which he has not yet reported and has never had a previous job or business is classified as a "new worker."

The 1970 census of population Alphabetical Index of Industries and Occupations was used in the coding of both the industry and occupation.

Library of Congress Number 74-612012. For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. \$3.00. Stock Number 0301-2283.

DETAILED NOTES

TAPE POSITION 146

Land used for farming purposes (Code 1 in Tape Position 146) was identified as being rural land (Code 2 in Tape Position 13) consisting of 10 or more acres (Code 1 in Tape Position 14) with crop sales amounting to \$50 or more (Code 2 in Tape Position 15), or rural land (Code 2 in Tape Position 13) consisting of less than 10 acres (Code 2 in Tape Position 14) with crop sales amounting to \$250 or more (Code 3 in Tape Position 16). All Other land is classified as nonfarm (Code 2 in Tape Position 146).

DETAILED NOTES

TAPE POSITIONS 147-149

Poverty Index--Income status was determined by the Poverty Income Ratio (PIR). Poverty statistics published in the Census Bureau reports^{1/} were based on the poverty index developed by the Social Security Administration in 1964. (For a detailed discussion of the SSA poverty standards, see reference 2.) Modifications in the definition of poverty were adopted in 1969.^{3/} The standard data series in poverty for statistical use by all executive departments and establishments has been established.^{4/}

The two components of the PIR are the total income of the household (numerator) and a multiple of the total income necessary to maintain a family with given characteristics on a nutritionally adequate food plan^{3/} (denominator). The dollar value of the denominator of the PIR is constructed from a food plan (economy plan) necessary to maintain minimum recommended daily nutritional requirements. The economy plan is designated by the Department of Agriculture for "emergency or temporary use when funds are low."

For families of three or more persons, the poverty level was set at three times the cost of the economy food plan. For smaller families and persons living alone, the cost of the economy food plan was adjusted by the relatively higher fixed expenses of these smaller households.

The denominator or poverty income cutoff adjusts the family poverty income maintenance requirements by the family size, the sex of the family head, the age of the family head in families with one or two members, and the place of residence (farm, nonfarm). Annual revisions of the poverty income cutoffs are based on the changes in the average cost of living as reflected in the Consumer Price Index.

As shown in the table, the annual income considered to be the poverty level increases as the family size increases. A family with any combination of characteristics and with the same income as shown in the table has been designated as having a PIR or poverty level of 1.0. The same family with twice the income found in the table would have a PIR of 2.0. Ratios of less than 1.0 can be described as "below poverty," ratios greater than or equal to 1.0, as "at or above poverty."

Poverty thresholds are computed on a national basis only. No attempt has been made to adjust these thresholds for regional, State, or other local variation in the cost of living (except for the farm, nonfarm difference). None of the noncash public welfare benefits such as food stamp bonuses or free food commodities are included in the income of the low income families receiving these benefits.

DETAILED NOTES

TAPE POSITION 150

Region

The United States was divided into four broad geographic regions of approximately equal population. Those regions, which deviate somewhat from the groups used by the Bureau of the Census, are as follows:

<u>Region</u>	<u>States Included</u>
Northeast	Maine, Vermont, New Hampshire, Massachusetts, Connecticut, Rhode Island, New York, New Jersey, and Pennsylvania
South	Delaware, Maryland, District of Columbia, West Virginia, Virginia, Kentucky, Tennessee, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, and Arkansas
Midwest	Ohio, Illinois, Indiana, Michigan, Wisconsin, Minnesota, Iowa, Missouri
West	Washington, Oregon, California, Nevada, New Mexico, Arizona, Texas, Oklahoma, Kansas, Nebraska, North Dakota, South Dakota, Idaho, Utah, Colorado, Montana, and Wyoming.

DETAILED NOTES

TAPE POSITIONS 158-193

HANES is a multistage, stratified, probability sample of loose clusters of persons in land-based segments. In addition, HANES is composed of two distinct examination components--a nutrition screening examination (taken by all examinees) and a more detailed examination taken by a pre-selected subsample of all examinees, ages 25-74. For the nutrition screening examination, locations 1-35 and 1-65 constituted national probability samples and for the detailed examination, locations 1-35, 1-65, 66-100 and 1-100 all constitute national probability samples. In other words, HANES is composed of six distinct subsamples of the U.S. population. For a more detailed discussion of the sample design see Series 1, No. 10a.

Since each of these six subsamples is a distinct subsample of the U.S. population, each subsample requires a different set of weights. The weights are based upon the probability of selection into the sample, adjustments for nonresponse and further adjustments to approximate the U.S. noninstitutionalized population as of the midpoint of each subsample.

In order to select all of those examinees in a particular subsample, i.e. received a particular exam component, it is necessary to exclude all examinees with a weight of zero or blank. It is also necessary to exclude all zero or blank weights because that is the only way to differentiate missing data due to nonresponse from data that is missing because the sample design dictated that a particular examinee was not supposed to receive a particular examination component.

It is suggested that any analyses that are desired by the researcher be performed using the greatest number of examinees possible; that is, if the researcher is interested in an exam component of the nutrition screening examination he should use the weight and consequently the data from the 65 location subsample rather than the 35 location subsample. For the detailed examination, the researcher should use the 100 location subsample rather than one of the others. However, some exam components were only done in a particular subsample; for example, only at the first 35 locations. In that case, the researcher has no choice in selecting a particular subsample.

There may be occasions when a researcher may want to make comparisons of estimates obtained from various subsamples. For example, the prevalence of some disease condition as estimated from the first 35 locations could be compared with an estimate based upon locations 66-100. The researcher may also want to formulate hypotheses using one subsample and test those hypotheses using another subsample.

DETAILED NOTES

TAPE POSITIONS 287 AND 288-289

Heart Attack

For Locations 66-100 when asked the question, "Has a doctor ever told you that you had a heart attack?," if the respondent answered "yes" they were not asked the second part of the question, but were asked how many years ago they first had the heart attack and the years were entered. The counts will not reflect the number of persons who have had a heart attack, because blank records would be blank in Tape Position 287 as well as Positions 288-289. To arrive at the number who have had heart attacks, it is necessary to control on Positions 288-289 for other than blank to get the number who have had heart attacks. The data for Locations 1-65 were changed to agree with 66-100.

DETAILED NOTES

TAPE POSITIONS 293 AND 294-295

Stroke

For Locations 66-100, when asked the question "Has a doctor ever told you that you had a stroke?" if the respondent answered "yes" they were not asked the second part of the question, but were asked how many years ago they first had the stroke and the years were entered. The counts will not reflect the number of persons who have had a stroke, because blank records would be blank in Tape Position 293 as well as Positions 294-295. To arrive at the number who have had strokes it is necessary to control on Positions 294-295 for other than blank to get the number who have had strokes. The data for Locations 1-65 were changed to agree with 66-100.

DETAILED NOTES

TAPE POSITION 344

Loss of Blood From Stomach or Bowels

For Locations 66-100 this question was asked in two parts, but was collapsed to conform with data collected for Locations 1-65.
