INTRODUCTION

This is a report of State activity in the Food Stamp Program. The data contained herein is State reported data or data calculated from State reported data.

The tables are based on data for all of Fiscal Year 2005. February 2007 was set as the cutoff date for receipt of data for the States through the established reporting channels. It should be noted that the FNS-366B data is reported by State fiscal year, which varies among the States.

As may be expected in a report of this size and taken from multiple data sources, there are some apparent discrepancies in reported data. Most discrepancies are due to compiling the data at different times and from different data sources within the State. In some cases, the data may still be revised.

To assist the reader, we have included End Notes at the conclusion of the report identifying the data sources and other pertinent information for each individual section. All data, with two exceptions, was compiled from the National Data Bank, the official repository of Food Stamp Program data. The report, itself, was prepared by the Program Accountability Division

We have again included a recipient claims table that reports on the methods used by State agencies to collect claims against recipient households. Some of the data included in the recipient claims table is derived from administrative offset weekly statistical reports prepared by the U. S. Department of the Treasury.

We have also included data on disqualified recipients from our Disqualified Recipient Subsystem, a Federal database that provides information on disqualified recipients to State agencies. In addition, a "Rankings" section again has been included in the report. That section contains tables that rank participation and issuance data, from high to low, for each State for FY 2005.

In FY 2005 Hurricane Katrina had a significant impact on program participation and benefits as States stepped up to assist Hurricane Katrina victims. This year we have included a special section on the FSP response to Hurricane Katrina.

We also wish to point out that selected program statistical data is available on the Food Stamp Program web page at:

www.fns.usda.gov/fsp.

If there are any questions concerning the data in this publication, contact either John Bedwell at (703) 305-2397 or Karen Peko at (703) 305-2481 or e-mail us at our website address

STATE PARTICIPATION AND ISSUANCE

Participation and Issuance

In fiscal year (FY) 2005, State agencies issued approximately \$28.6 billion in food stamp benefits to a monthly average 11.2 million households or 25.7 million people participating in the Food Stamp Program (FSP). The average monthly benefit was \$92.56 per person or \$212.59 per household. The Federal Government pays 100 percent of the benefits. In FY 2005, participation increased 7.8% percent from 23.9 million people the previous year, and issuance increased 16.03% percent from \$24.6 billion in FY 2004 to \$28.6 billion in FY 2005. All 53 State agencies had an increase in participation in FY 2005.

Electronic Benefit Systems

The Personal Responsibility and Work Opportunity Act of 1996 mandates that all States must convert from paper coupon systems to an electronic benefit transfer (EBT) system before October 1, 2002. EBT systems issue and redeem benefits using cards, electronic funds transfer networks, and point-of-sale technology in authorized retail food stores. In FY 2004, the Food Stamp Program converted 100 percent to EBT in all State agencies, including U.S. Territories and the District of Columbia. Specifically, 48 States, the District of Columbia, Virgin Islands and Guam have online food stamp EBT systems and two States have offline food stamp EBT systems. As a result, in FY 2005 \$28.5 billion was issued in electronic benefits to a monthly average 11.2 million households. At the end of the fiscal year, 99.4 percent of households were on EBT

Food Coupons

In FY 2005 coupons were no longer being issued as the standard form of issuance in any State. However, in FY 2005 Wyoming was converting unspent EBT benefits to coupons when a household moved out of State. These converted benefits in Wyoming are shown in the coupon issuance dollars

On occasion, previously issued but unspent coupons are found and turned in to the State agency. These coupon returns are shown in the report as negative coupon issuance dollars.

Cash-out

Cash-out projects are limited to certain pilot projects authorized in the Food Stamp Act that either have continued to operate since 1981 or that were approved prior to August 1996. While technically not considered part of the EBT system for issuance, redemption, and reporting purposes, States with FNS-approved cash-out issuance systems (for wage supplementation, welfare reform, or other approved demonstration projects) may issue cash-out benefits electronically, in place of paper checks. Cash-out benefits may be issued electronically via either direct deposit or debit cards, which can be used at automatic teller machines to draw the funds. In FY 2005, \$51.7 million in cash-out benefits were issued to 62,379 households in 7 States. Cash-out represented less than 0.2 percent of issuance.

Demonstration Projects

- In FY 2005, FNS tested in two States (Connecticut and North Carolina) a demonstration project in which elderly households could choose to receive a food package rather than the standard benefit.
- In FY 2005, Minnesota operated an approved Group Residential Housing project that provided FSP benefits to be used to purchase food for the residents.

M

ADMINISTRATIVE COSTS

Administrative Costs

State agency administrative costs are affected by a number of factors including participation levels, the number and salary level of State staff, inflation, the location of State agency offices, type of issuance system, worker training costs, degree of automation, level of fraud control activity, etc. The Food and Nutrition Service (FNS) pays approximately 50 percent of State agency administrative costs to operate the program. Total State agency administrative costs prior to Federal cost sharing were \$5.2 billion, up 1.8 percent from \$5.0 billion the previous year. In FY 2005, the Federal share of administrative costs increased 3.1 percent to just over \$2.49 billion.

The Federal share of certification costs increased 0.96 percent in FY 2005 from \$1.31 billion in FY 2004 to \$1.33 billion. The Federal share of the certification cost per case (i.e., per household) per month decreased from \$10.67 per case month to \$9.88 per case month.

M

FAIR HEARINGS

Fair Hearings

Food Stamp Program regulations provide recourse to households that have their benefits denied or their allotment reduced, suspended or cancelled as a result of an adverse decision by the State agency. This recourse is called the fair hearing process. The number of fair hearings conducted by States is reported annually on Form FNS-366B, the Program Activity Statement.

In FY 2005, the number of fair hearings increased by 3.32 percent. Nationally, approximately 4.2 hearings were conducted for every 1,000 households participating in FY 2005. In FY 2005, 72.2 percent of fair hearings upheld the caseworker's decision compared to 71.8 percent in FY 2004. A total of 36 States had case worker decisions affirmed in at least 75 percent of the hearings.

FRAUD
INVESTIGATIONS,
PROSECUTIONS,
AND
ADMINISTRATIVE
DISQUALIFICATION
HEARINGS

Fraud Control

In FY 2005, State fraud investigations increased to 771,796 compared to 745,697 in FY 2004, a 3.5 percent increase.

Fraud investigations are broken into precertification investigations and postcertification investigations. Pre-certification investigations are cases referred for investigation and completed prior to certification. Investigators assist in front-end detection by acting on referrals in suspicious cases and probing more deeply into a client's circumstances. Positive pre-certification investigations prevent fraud at intake and before a dollar loss can occur; they may also result in hearings/prosecutions that lead to disqualification (without a claim being established). On the other hand, postcertification investigations are investigations completed after certification. Positive postcertification investigations may result in an administrative disqualification hearing or prosecution, the disqualification of the individual who has committed an intentional program violation, and the establishment of a claim to recover the overissuance.

Both prosecution and administrative fraud hearing activity declined from the previous year. In FY 2005, the number of recipients disqualified from the Food Stamp Program for an intentional program violation declined to 43,027, a 21.90 percent decline from the previous year. About 70 percent of the disqualifications came out of the administrative fraud hearing process, compared to 67 percent in the prior year.

On the Federal level, FNS operates the Disqualified Recipient Subsystem (DRS). DRS is a centralized national database, utilizing data submitted each month by all 50 States, the District of Columbia, Guam, and the Virgin Islands, that tracks individuals disqualified from participation in the FSP for intentional program violations. DRS assists States in assigning the correct penalty, which varies by the type and number of the offense, to individuals being disqualified. It also assists States in preventing these individuals from crossing State lines and participating in another State during the period of their disqualification. Because an individual may be permanently disqualified, these records are held indefinitely. As of September 2005, this Federal database had records on over 1,001,000 recipients and over 1,074,000 disqualifications.

RECIPIENT CLAIMS

NOTABLE TRENDS

Recipient Claim Collections

Recipient claims are established against any household that has received more food stamp benefits than it is entitled to receive. Claims fall in three categories: intentional program violation (fraud claims), inadvertent household error, or agency error. State agencies are entitled to 35 percent of fraud claims and certain inadvertent household error claims collected and 20 percent of the remaining inadvertent household error claims collected.

In FY 2005, State agencies established \$259.4 million in new claims against households for overissuances and collected \$206.7 million. The average new claim established was for \$449. Collections increased 2.4 percent in FY 2005. Collections via recoupment, in which the State agency uses a part of the benefit otherwise payable to the household to pay an outstanding claim, decreased in FY 2005.

During the fiscal year almost \$74.4 million out of the total State agency collections reported above was collected by the Federal Government through the Treasury Offset Program (TOP). As a participating partner in this program, State agencies notify the household and then send the delinquent claims through FNS to Treasury for possible collection under this program. This Federal program offsets amounts from any eligible Federal payment otherwise due a household and uses those funds to pay the outstanding claim. The collections are made by Treasury on behalf of the FSP. The Federal collections make up 36 percent of total State agency collections for FY 2005. In FY 2005, 52 State agencies participated in the Federal debt collection program. Since its inception in FY 1992, the Federal debt collection program has collected \$753.3 million in food stamp recipient claims.

RECIPIENT CLAIMS COLLECTED BY COLLECTION METHODOLOGY FY 2005

FY 2005 DISASTER SEASON

Hurricane Katrina

The Hurricane Season of 2005 was the busiest one ever recorded with 27 named storms. On August 29, 2005, Hurricane Katrina landed as one of the most devastating storms in history, inflicting a terrible toll, leading to the loss of many lives across the Gulf Coast and forcing the largest evacuation in American history. This hurricane was followed by Hurricanes Rita in September and Wilma in October 2005. This annual report is normally limited to the fiscal year. However, the disaster response to these devastating storms would carry over into FY 2006 since FSP benefits are paid monthly based on need. In this special section devoted to 2005 disasters we are able to provide a fuller if not complete picture of the Katrina response in particular by providing early and preliminary FY 2006 data.

There was an unprecedented and extensive Federal and State response by the FSP to Katrina victims. FNS led the Federal nutrition response to the hurricanes that severely impacted the Gulf Coast States by promptly implementing the FSP's first National Evacuee Policies under Hurricane Katrina. This policy enabled State agencies that were not affected by Hurricane Katrina or that were not administering a disaster program to immediately issue disaster benefits to individuals and families who evacuated to other States. FNS approved over 70 waivers to affected States to issue benefits under the disaster authority for all three disasters.

Affected State agencies played a vital part, stepping up to assist hurricane victims on site or at special processing centers. While FNS pays the cost of Disaster Food Stamp Program (DFSP) benefits, it is the affected State agencies that process the disaster cases in their offices and on site and that issue the disaster benefits. In FY 2005, FNS issued \$258 million in disaster food stamps to affected households. Of this figure, \$238 million was issued under Hurricane Katrina alone. The nutrition assistance need that resulted from Katrina continued into FY 2006. By November 2005, over 1.2 million households (including Hurricane Katrina evacuees) in 17 States had received \$577 million in benefits as a result of Hurricane Katrina. However, while these numbers are national data, most of the increase was concentrated in the Gulf Coast States that bore the brunt of Katrina. The affected Gulf Coast States (mentioned below) experienced large jumps in their caseload in a single month. In the month of September alone, Mississippi's caseload increased by 127 percent, Louisiana's increased by 115 percent, Alabama had a 38 percent increase, and Texas had a 13 percent gain. FNS salutes these four States and their caseworkers for processing the large number of disaster cases in a single month. In the following chart on page 49, we also wish to document and recognize that many more States also helped out by taking Katrina evacuees from the affected States.

Disaster Food Stamp Program Costs (\$ millions)

DATA AS OF: 02/07/07

^{1/} SOME STATES ESTABLISH POTENTIAL FRAUD CLAIMS AS HOUSEHOLD ERROR CLAIMS INITIALLY AND THEN TRANSFER THE CLAIM FROM INADVERTENT HOUSEHOLD ERROR TO FRAUD CLAIM AFTER THE PROSECUTION OR FRAUD HEARING. THUS, THE SUM OF THE FRAUD INVOLVED FROM PROSECUTION AND FRAUD HEARINGS IS A BETTER MEASURE OF THE AMOUNT OF FRAUD CLAIMS ULTIMATELY ESTABLISHED. SOURCE: FNS-366B AND FNS-209

END NOTES

State Participation and Issuance

Participation data comes from the FNS-388 reports and issuance data comes from the FNS-46. Average monthly participation and household participation in this report may not add for the national total due to rounding. The total participation data in this report is the average monthly participation from all systems for the fiscal year (12-month average). However, on the pages providing the breakdown of the participation data by benefit type the report provides the average monthly participation for the number of months that particular issuance system operated during the year to show the actual monthly participation when that benefit type was used. Not all benefit types were in operation for all 12 months as food packages ended in one state during the year. Because the number of operating months varies by system and by State, the breakdown participation numbers by issuance system do not always add up to the total participation monthly average in all States.

Negative coupon issuance occurs when coupons are returned.

Administrative Costs

Administrative Cost data cited in this section is derived from the SF-269; monthly participation data comes from the FNS-388.

Fair Hearings

Fair Hearings data cited in this section is derived from the FNS-366B.

Fraud Investigations, Prosecutions, and Administrative Disqualification Hearings

Fraud Investigations, Prosecutions, and Administrative Disqualification Hearings data cited in this section is derived from the FNS-366B.

Disqualified Recipients – Federal Data Base Status

The data cited in this section is derived from the Disqualified Recipient Subsystem (DRS) - a Federal system of records that is used to identify individuals with a prior disqualification record for penalty determination purposes and individuals who are currently serving a disqualification period from another State. DRS includes both current year and historical disqualifications.

END NOTES

Recipient Claims

Claims data cited in this section is derived from the FNS-209; Federal debt collection data is derived from the FNS Federal Debt Collection Biweekly Collection Report. All recoupment amounts are included in collections data.

Data on new claims established is included in Tables 22, 23 and 24. When referring to data in these tables it should be noted that some States show no or low fraud claims newly established because they establish such claims as household error and subsequently transfer the claim to fraud after the court or hearing officer's determination. Therefore we recommend that the data in Tables 16, 18, and 20 (amount of fraud determined from prosecutions and administrative disqualification hearings and number of fraud determinations) be used as a better measure of the amount of fraud claims ultimately established. Data included in Table 27 (Recipient Claims Collected) includes total claims recouped as well as Federal Debt Collection amounts and other means of collection employed by State agencies.

Calculations for other means of collection employed by State agencies include all State methods except for recoupment and Federal collections from the Treasury Offset Program minus all refunds and negative adjustments. Calculations for Federal Debt Collection amounts include Treasury Offset Program collections but not voluntary payments and offset fees paid by the client. Totals represented are for calendar year 2005 – however 98% of Federal collections occurred during FY 2005. Some offsets are subject to refunds.

Rankings of Participation and Issuance

Please refer to the explanations above for the sources of various data cited in this section. Note that totals for persons and households may not add due to rounding.

Comparison to Prior Years

Please refer to the explanations above for the sources of various data cited in this section.
