### PRINCIPAL ECONOMIC ACTIVITIES

The major employment sectors in Arizona include aerospace, electronics and semi conductor manufacturing. Tourism, business services and back-office operations are also important sectors. Arizona's original export activities - agriculture and mining - remain significant in many rural parts of the state. Based on sheer size, the real estate and rental industries, the diverse tourism sector, and government are the largest economic sectors in Arizona. Relative to the national average, the construction sector is also unusually large because of the state's rapid growth.

## TAXES AND COSTS

Arizona's vibrant and growing economy is facilitated by a tax structure that has become increasingly competitive over the last decade:

- Arizona had the highest rate of population growth in both 2005 and 2006, 3.6% in each year, among the 50 states.
- In 2006 Arizona ranked 3<sup>rd</sup> among all states in the growth (6.8%) of State Gross Domestic Product, behind only Idaho and Wyoming. In 2005, Arizona tied with North Dakota for 3<sup>rd</sup> fastest growth (6.6%) of State GDP, behind Nevada and Florida.
- Preliminary 2006 BEA data for aggregate state personal income has Arizona ranked 5<sup>th</sup> in growth (8.5%), behind Louisiana, Wyoming, Utah and Oklahoma, smaller states in terms of population and state incomes. Arizona ranked 1<sup>st</sup> in 2005
- The 2006 Compensation Insurance Rates report released by the State of Oregon ranks Arizona with the 4<sup>th</sup> lowest workers compensation rates in the nation.
- Overall, Arizona's comparative business costs savings versus California and the U.S. at large are generated by lower wages, lower tax burdens, and lower infrastructure costs (*Economy.com*)

Significant business tax reductions have been adopted since 2005 and are expected to further improve Arizona's competitive tax position:

- A 20% reduction in real property tax assessment ratios is being phased in and will be fully implemented by 2011. Additionally, an accelerated depreciation schedule is available for personal property placed in service after 2008.
- A "weighted sales factor" corporate income tax formula is being phased in over three years effective January 2007.
- New tax credit incentives are now in effect:

  - Commercial solar equipment <http://www.azcommerce.com/BusAsst/Incentives>
  - Health insurance premium tax credit <http://www.azdor.gov/Refunds%20and%20Credits/healthinsurancechoicesmenu.htm>
