

BCAP – CHST Eligible Materials List

BCAP –CHST Eligible Materials Definitions

Renewable biomass is defined for purposes of the CHST matching payment program to include the following:

(1) Materials, pre-commercial thinnings, or invasive species from National Forest System land and public lands (as defined in section 103 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1702)) that:

(a) Are byproducts of preventive treatments that are removed to reduce hazardous fuels, to reduce or contain disease or insect infestation, or to restore ecosystem health;

(b) Would not otherwise be used for higher-value products; and

(c) Are harvested in accordance with applicable law and land management plans and the requirements for old-growth maintenance, restoration, and management direction of section 102 (e)(2), (3), and (4) of the Healthy Forests Restoration Act of 2003 (16 U.S.C. 6512) and large-tree retention of subsection (f) or

(2) Any organic matter that is available on a renewable or recurring basis from non-Federal land or land belonging to an Indian or Indian tribe that is held in trust by the United States or subject to a restriction against alienation imposed by the United States, including: Renewable plant material (including feed grains, other agricultural commodities, other plants and trees, algae), and waste material (including crop residue, other vegetative waste material (including wood waste and wood residues), animal waste and byproducts (including fats, oils, greases, and manure), food waste, and yard waste).

Eligible Material is, for purposes of the CHST matching payment program, renewable biomass with the following exclusions:

(1) Harvested grains, fiber, or other commodities eligible to receive payments under Title I of the 2008 Farm Bill;

(2) Animal waste and animal waste-byproducts including fats, oils, greases, and manure;

(3) Food waste and yard waste; or

(4) Algae.

Biobased CHST product means a product, determined by the Deputy Administrator to be a commercial or industrial product (other than food or feed) that is:

(1) Composed in whole, or in significant part, of biological products, including renewable domestic agricultural materials and forestry materials or

(2) An intermediate ingredient or feedstock.

Biobased product does not mean commercially produced timber, lumber, wood pulp or other finished wood products.

Food waste means a material composed primarily of food items, or originating from food items, or compounds from domestic, municipal, food service operations, or commercial sources, including food processing wastes, residues, or scraps.

Yard waste means material composed primarily of yard maintenance, cleanup materials, or debris removal items, originating from residential, municipal or commercial yards, lawns, landscaped areas, or related sites.

/ 1 Renewable biomass derived from invasive or noxious species must be handled in accordance to **Executive Order 13112 of February 3, 1999 “Invasive Species.”** Hence, applicable CHST eligible materials cannot be collected, harvested, or transported during reproductive, or other, phases that may propagate their spread or establishment.

/ 2 See ineligible agriculture resources for exclusions related any crop eligible to receive payments under Title I of the Food, Conservation, and Energy Act of 2008 or an amendment made by that title.

/ 3 Per the Notice of Funding Availability published in the Federal Register on June 11th, 2009, NOT more than twenty percent of the funds utilized under this Notice will be for matching payments to eligible material owners for the collection, harvest, storage and transportation of crop residue from commodities eligible to receive payments under Title I of the 2008 Farm Bill.
