1994 (5) - NA NA NA NA NA NA NA NA NA NA								

(1) Landings are reported in round (live) weight for all items, except mussels and bivalve mollusks, such as clams, oysters and scallops, which are reported in weight of meats (excluding the shell). The National Marine Fisheries Service estimated the distance-from-shore landings for data collected by the service and states.

(2) Includes landings from the Great Lakes and other inland waters, but excludes Mississippi River Drainage Area States.

(3) Less than 500 lb or \$500.

(4) Data are confidential and included with unclassified shellfish.

(5) Data not available for 1994.

NOTE: Data are preliminary. Data include landings by U.S.-flag vessels at Puerto Rico and other ports outside the 50 States, and catches by U.S.-flag vessels transferred to internal water processing vessels (IWP) in U.S. waters. Therefore, they will not agree with "U.S. Commercial Landings" tables beginning on page 1. Data do not include aquaculture products, except oysters and clams.
