

State Personal Income

Second Quarter of 2004 and Revised Estimates for 2001–2004:1

By David G. Lenze

FOR the first time, the Bureau of Economic Analysis (BEA) has simultaneously released quarterly and annual estimates of state personal income. It has released new estimates for the second quarter of 2004 and revised quarterly and annual estimates for 2001–2003 and for the first quarter of 2004.¹ This article first discusses the new quarterly estimates and then the revised estimates.

- Personal income grew 1.5 percent nationally in the second quarter of 2004, the fastest pace in more than 3 years.

1. Previously, the quarterly state personal income estimates were released one month after the release of the revised annual estimates. The acceleration of the release of quarterly state personal income data eliminates the inconsistency of the estimates for that one month period.

- Personal income growth accelerated from the first quarter in 33 states, decelerated in 14 states and the District of Columbia, and remained steady in 3 states.
- In every state but two, earnings by place of work, adjusted for inflation with the national implicit price deflator for personal consumption expenditures, exceeded the level set in the first quarter 2001, the previous peak in the national business cycle.
- Real estate and rental and leasing grew the fastest of the industry sectors, contributing more than 13 percent of the gain in earnings by place of work.
- The average revision to personal income was only –0.5 percent in 2003, –0.2 percent in 2002, and 0.4 percent in 2001. Most state revisions were close to these averages.

Acknowledgments

The annual revision of state personal income was prepared by the Regional Economic Measurement Division under the direction of Robert L. Brown, Chief. John W. Ruser, Associate Director for Regional Economics, provided general guidance. The preparation of the revised estimates was a divisionwide effort.

The estimates of nonfarm wages and salaries and supplements to wages and salaries were prepared by the Regional Wage Branch under the supervision of Sharon C. Carnevale, Chief. Major responsibilities were assigned to Elizabeth P. Cologer, John D. Laffman, Michael G. Pilot, Mauricio Ortiz, John A. Rusinko, James M. Scott, and Elizabeth F. Stell. Contributing staff members were Peter Battikha, Michael L. Berry, Kristin M. Chambliss, Susan P. Den Herder, Terence J. Fallon, Tina C. Highfill, Mark W. Hodgins, Russell C. Lusher, Paul K. Medzerian, Katherine M. Yang, Jesse M. Young, and Jaime Zenzano.

The quarterly estimates of state personal income and the annual estimates of farm wages and salaries, farm supplements to wages and salaries, farm proprietors'

income, property income, personal current transfer receipts, contributions for government social insurance, and the adjustment for residence were prepared by the Regional Income Branch under the supervision of James M. Zavrel, Chief. Major responsibilities were assigned to Charles A. Jolley, Carrie L. Litkowski, Jeffrey L. Newman, James P. Stehle, and Matthew A. von Kerczek. Contributing staff members were Suet M. Boudhraa, Merry L. Chee, Daniel R. Corrin, Michelle A. Harder, Katherine E. Harper, Toan A. Ly, W. Tim McKeel, and Troy P. Watson.

The estimates of personal current tax receipts were prepared by Ann E. Dunbar under the supervision of Robert L. Brown.

The public use tabulations and data files were assembled and the tables were prepared by the Regional Economic Information System Branch under the supervision of Kathy A. Albetski, Chief. Major responsibilities were assigned to Gary V. Kennedy. Contributing staff members were H Steven Dolan, Michael J. Paris, Alison M. Skinner, Callan S. Swenson, and Monique B. Tyes.

Second Quarter of 2004

Nationwide, personal income grew 1.5 percent in the second quarter of 2004, the fastest pace in more than 3 years, as growth accelerated in 33 states (table A). The Rocky Mountain and Far West regions grew the fastest of the eight BEA regions, at 1.8 percent and 1.7

percent, respectively. Washington state's 2.4-percent increase was the highest increase of the 50 states. The New England and the Great Lakes regions registered the weakest growth, at 0.9 percent and 1.2 percent, respectively; growth in these regions has generally lagged behind growth in the Nation in the last 4 years.

r Revised.

p Preliminary.

NOTE: Estimates may not add to totals because of rounding.

Chart 1 classifies the states into growth quintiles. In the second quarter, there was much more uniformity of growth within regions than is usually the case.²

Chart 2 illustrates the longer term growth of the eight BEA regions relative to the Nation. Each graph shows the ratio of regional personal income growth to national growth from the first quarter 2001. Values greater than 1 indicate that regional growth from the first quarter of 2001, the peak of the national business cycle, exceeds national growth, while values less than 1 indicate slower growth. Once again, New England and the Great Lakes displayed particularly slow growth. The regions differ in that New England has grown slowly over the entire period, while the slow growth in the Great Lakes occurred mostly in the last two quarters. The weakness in both regions was broad based across industries; all but four industry

sectors grew more slowly than they have nationally.

The fastest growing region was the Southeast, which has consistently grown faster than the Nation. Again, the strength was broad based; all but four industry sectors outperformed national growth.³

Personal income growth by component

Earnings. This component grew at the same 1.5-percent rate as total personal income. The growth rates of key subcomponents, however, diverged. Growth of proprietors' income was markedly stronger than that of wages and salaries. Proprietors' income growth rates

2. The standard deviation of state growth rates (preliminary estimates) was the lowest in more than 3 years in three regions and the second lowest in two regions.

3. In New England, the four sectors that grew faster than average were construction, retail trade, educational services, and arts, entertainment, and recreation; they accounted for only 15 percent of earnings by place of work. In the Great Lakes, the four sectors that grew faster than average were durable goods manufacturing, transportation and warehousing, finance and insurance, and management of companies and enterprises; they accounted for 28 percent of earnings. In the Southeast, the four industries that grew slower than average were farming, mining, nondurable goods manufacturing, and arts, entertainment, and recreation; they accounted for 9 percent of earnings.

Chart 1. Personal Income: Percent Change, 2004:I–2004:II

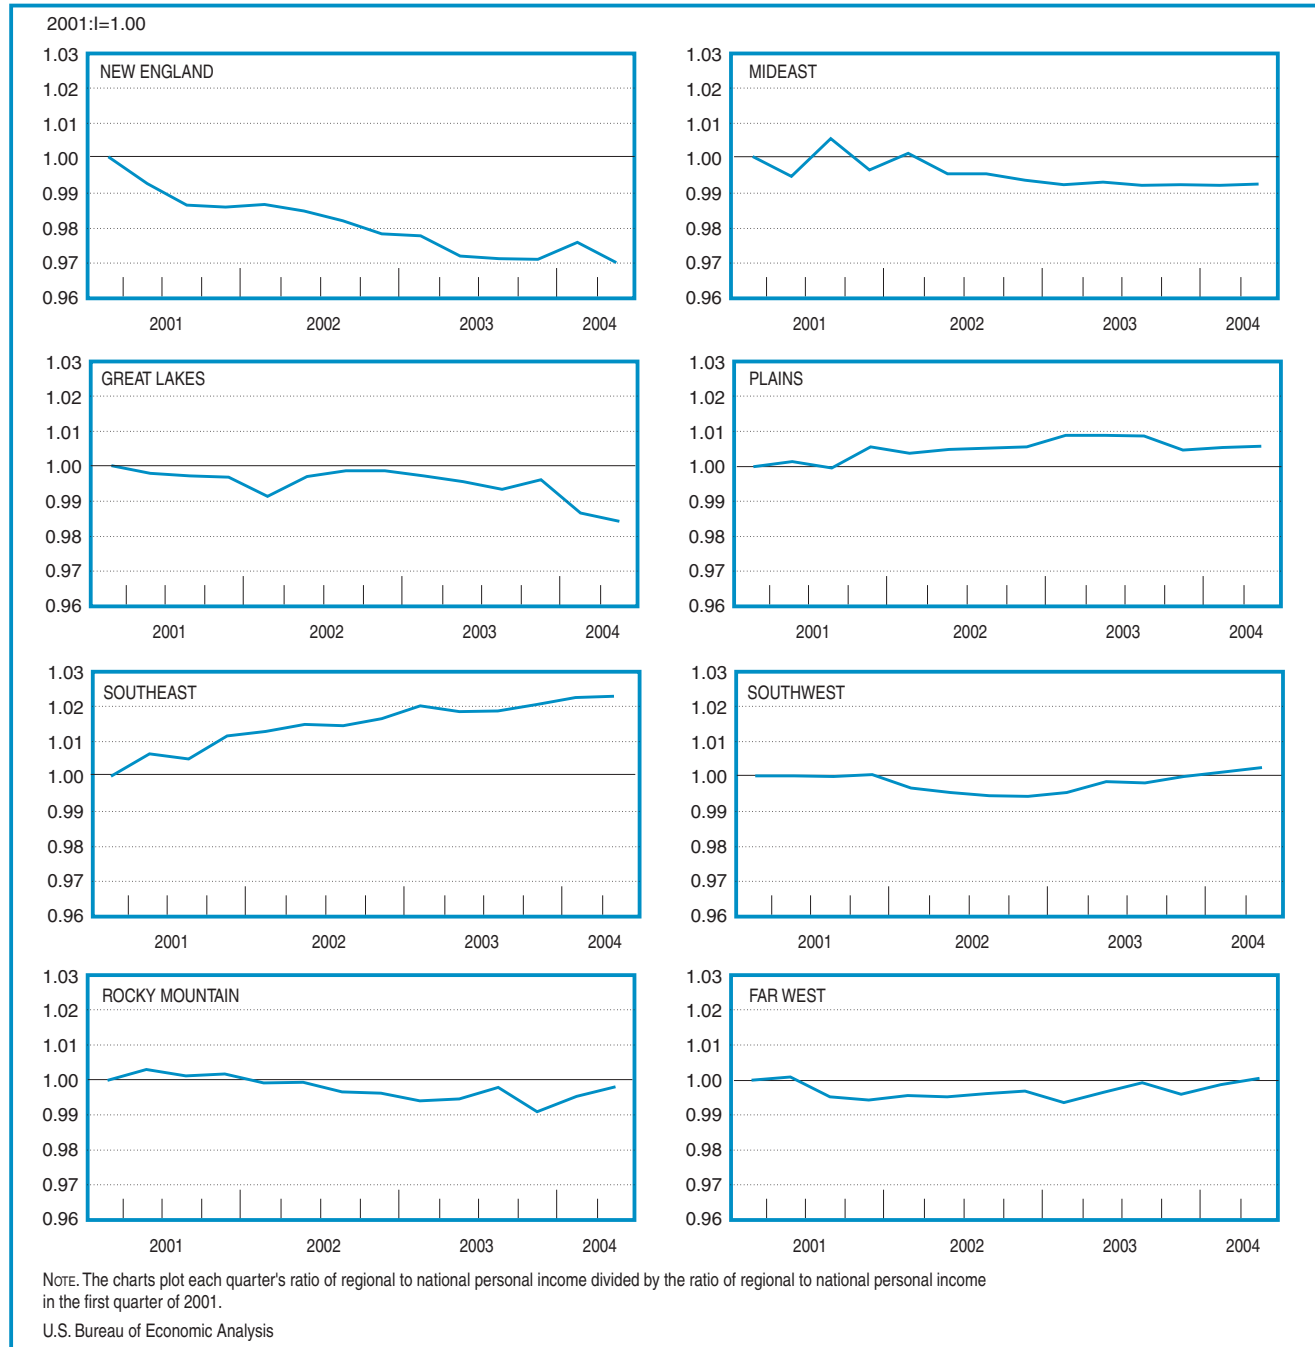

excluding the farm sector were brisk in every state: Michigan had the fastest growth (4.7 percent), while Rhode Island had the slowest (2.3 percent). Wage and salary disbursements grew 1.2 percent, continuing a trend since the first quarter of 2000 of slightly lower

growth than total personal income. Only in Oregon and Washington did wages and salaries outpace personal income growth.

Dividends, interest, and rent. This component was a weak contributor to overall personal income growth;

Chart 2. Regional Personal Income Growth Relative to National Growth, 2001:I–2004:II

all the states but Wyoming grew no more than 1.4 percent (table B). The growth was primarily in dividends, which increased 2.4 percent. Interest grew only 0.5 percent, while rent fell 0.2 percent.

Transfer receipts. In many states, this component of personal income grew rapidly, reflecting fast growth in Medicare and Medicaid payments, which were moderated by a decline in state unemployment insurance

(UI) benefits. Nationally, UI benefits fell 19 percent in the second quarter after falling 20 percent in the first quarter. These declines reflected a fall in the number of UI claims under regular state programs and an even larger decline in the number of people claiming extended benefits and Temporary Extended Unemployment Compensation. Extended benefits are currently not available in any state.

1. Net earnings is earnings by place of work—the sum of wage and salary disbursements, supplements to wages and salaries, and proprietors' income—less contributions for government social insurance plus an

adjustment to convert earnings by place of work to a place-of-residence basis.
NOTE: Estimates may not add to totals because of rounding.

Earnings growth by industry

Real estate and rental and leasing grew the fastest of the industry sectors, accounting for more than 13 percent of the gain in overall earnings by place of work (table C). Earnings in the arts, entertainment, and recreation industry declined 1.9 percent, the largest decline among all sectors. Almost half of the decline was concentrated in the Great Lakes region. Higher gasoline prices contributed to a decline in tourist travel to

amusement parks and limited spending on fuel-intensive activities such as boating.

Strong income growth in the farm sector had a noticeable effect on total personal income in two states. In Arkansas, nonfarm personal income grew 1.4 percent, while total personal income (including the farm sector) grew 1.8 percent; in North Dakota, nonfarm personal income grew 1.0 percent, while total personal income grew 1.4 percent.

See the footnotes at the end of the table.

Real earnings growth

In every region, earnings by place of work, adjusted for inflation with the national implicit price deflator for personal consumption expenditures, has now climbed above the growth levels set in the first quarter of 2001, the previous peak in the national business cycle. Of all the states, only Massachusetts and New York have not

returned to their first-quarter-2001 levels. Chart 3 illustrates the range in regional earnings growth since the first quarter of 2001. The upper bound of the shaded area represents real earnings growth in the Southeast region; the lower bound represents real earnings growth in New England. Growth rates for the other regions fall in between.

D Data are suppressed to avoid disclosure of confidential information.

1. Earnings by place of work is the sum of wage and salary disbursements (payrolls), supplements to wages and salaries, and proprietors' income.

2. "Other" consists of the wage and salary disbursements to U.S. residents employed by international organizations and foreign embassies and consulates in the U.S.

3. Not meaningful.

Revised Estimates

Annual revisions for 2001–2003

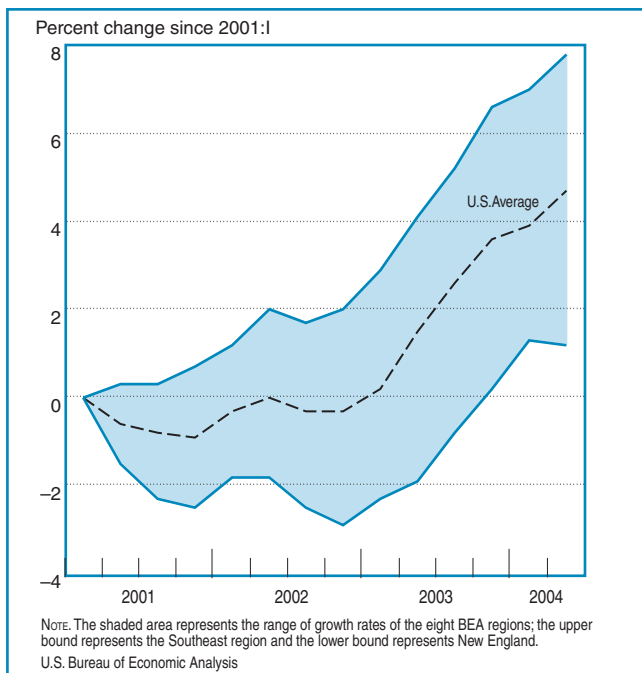

BEA has also released revised estimates of state personal income for 2001–2003. These estimates incorporate the results of the recent annual revision of the national income and product accounts and newly available state source data that are more complete, more detailed, and otherwise more appropriate than those that were previously available.⁴ In general, the revisions to personal income were relatively small. The Nation's personal income for 2003 was revised down 0.5 percent. It was revised down 0.4 percent in 2002 and up 0.2 percent in 2001 (table D).

Since the NIPA personal income estimates control the state estimates, revisions in the Nation's personal income estimates are a major source of revisions at the state level.⁵ Many of the revisions to the national estimates involve detailed estimation that cannot be replicated at the state level, because the underlying source data are not available. These revisions, however, are implicitly incorporated into the state estimates since

4. See Eugene P. Seskin and Shelly Smith, "Annual Revision of the National Income and Product Accounts: Annual Estimates, 2001–2003, and Quarterly Estimates, 2001:I–2004:I," *SURVEY OF CURRENT BUSINESS* 84 (August 2004): 7–28. For a detailed description of the sources and methods used to prepare the estimates of state personal income, go to BEA's Web site at <www.bea.gov/region/articles/spi2002>.

5. NIPA personal income estimates control state personal income estimates: The sum of state personal income estimates must equal the NIPA estimate after adjusting for small differences in coverage.

Chart 3. Earnings by Place of Work
(deflated by the national implicit price deflator
for personal consumption expenditures)

they are derived directly from national estimates.

The use of new state-level source data also contributed to the revisions:

- Farm proprietors' income incorporates new and revised estimates of farm expenses, production income, and government subsidy payments from the U.S. Department of Agriculture.
- Nonfarm proprietors' income incorporates newly available Internal Revenue Service tabulations of income tax returns for 2001.

- Current personal transfer receipts incorporates newly available data from the agencies that administer benefit programs, such as data from the Social Security Administration and Centers for Medicare and Medicaid Services.

More details of the new and revised data are presented in table E.

In 2003, the average revision of all 50 states and the

District of Columbia was -0.5 percent.⁶ In 2002, the average revision was only -0.2 percent.⁷ In 2001, the average revision was up 0.4 percent.⁸ Ignoring whether the revisions were up or down, the revisions averaged

6. The standard deviation was 1.0.

7. The results were also more tightly clustered around the mean. The standard deviation was 0.7.

8. The standard deviation was again 0.7.

Table E. Major New and Revised Source Data for State Personal Income

Component of personal income	Annual estimates			Quarterly estimates	
	2001	2002	2003	2004:I	2004:II
Wage and salary disbursements by industry	Revised USDA farm labor expenses; new CBP estimates.	Revised QCEW wage data; revised USDA farm labor expenses; new RRB state payroll data; new <i>Official Catholic Directory</i> data; new Census of Governments data.	Revised QCEW wage data; revised DOD personnel and average pay data; revised Coast Guard payroll data; new USDA farm labor expenses.	New QCEW wage data; revised DOD personnel and average pay data; revised Coast Guard payroll data; revised CES data for March; revised Department of Transportation payroll data.	New CES employment and earnings data for April, May, and June 2004; new DOD personnel and average pay data; new Coast Guard payroll data; new Department of Transportation payroll data.
Supplements to wages and salaries by industry	New NASI self-insured benefits data.	Revised QCEW data on contributions to unemployment insurance; new NAIC earned premium data; new Census Bureau data on contributions to state and local government retirement systems; new Census Bureau data on state-administered workers' compensation programs.	New QCEW data on contributions to unemployment insurance; new FRA data on casualties; new TIAA-CREF state government contributions to pension plans; revised estimates of wages and salaries.	Revised estimates of wages and salaries by industry.	New estimates of wages and salaries by industry.
Farm proprietors' income	Revised USDA estimates of gross income and expenses.	Revised USDA estimates of gross income and expenses.	New USDA estimates of gross income and expenses.	Revised USDA estimates of farm cash receipts for January and February, 2004; new estimates for March 2004.	New USDA estimates of farm cash receipts for April and May 2004.
Nonfarm proprietors' income by industry	New IRS net receipts and profits of proprietorships and partnerships; new CBP data.				
Dividends, interest, and rent			New DOD investment income data for military retirees' pensions.		
Personal current transfer receipts		New Census Bureau state government finance data on disability and income maintenance payments.	New SSA benefits data; new CMS and DOD medical payments data; new DVA payments to veterans data; new HHS family assistance data; new USDA food stamps data; revised Department of Labor unemployment benefits data.	Revised Department of Labor unemployment benefits data.	New Department of Labor unemployment benefits data.
Contributions for government social insurance		Revised QCEW data on contributions to unemployment insurance; new Census Bureau data on state-administered workers' compensation programs.	New QCEW data on contributions to unemployment insurance; new SSA data on OASDHI coverage rates for state and local government employees; new CMS supplemental medical insurance enrollment data; new DVA data on premiums paid for veterans' life insurance.	Revised estimates of wages and salaries by industry.	New estimates of wages and salaries by industry.

0.6 percent in both 2001 and 2002 and 0.9 percent in 2003.⁹ Chart 4 displays frequency distributions of the revisions.

For 2001, proprietors' income and property income were generally the largest contributors to the revisions.

9. A detailed analysis of the revisions to state personal income is presented in Robert L. Brown, Bruce T. Grimm, and Marian B. Sacks, "The Reliability of the State Personal Income Estimates," *SURVEY OF CURRENT BUSINESS* 83 (December 2003): 52–66.

Notable exceptions include the District of Columbia, where wages and salaries was the largest contributor, and West Virginia, where transfers was the largest contributor. For 2002 and 2003, there were upward revisions in employer contributions to privately administered pension and welfare funds in every state, downward revisions in property income in every state, and revisions (some upward, some downward) in nonfarm proprietors' income in every state. Revisions

Data Availability

This article presents summary estimates of annual personal income and disposable personal income for 1998–2003; estimates of annual personal income by major source and earnings by industry for 2001–2003; estimates of quarterly personal income for the third quarter of 2000 to the second quarter of 2004; and quarterly personal income by major source and earnings by major industry for the fourth quarter of 2002 to the second quarter of 2004. These estimates and more detailed estimates of personal income and employment for states are available interactively on BEA's Web site.

The following annual state estimates are available at <www.bea.gov/bea/regional/spi>:

- Personal income, per capita personal income, and population for 1969–2003
- Disposable personal income and per capita disposable personal income for 1969–2003
- State income and employment summary, 1969–2003
- Personal income by major source and earnings by industry (North American Industry Classification System (NAICS) three digit) for 2001–2003 and (Standard Industrial Classification System (SIC) two digit) for 1969–2000
- Personal income by major source and earnings by major industry (SIC division level) for 2001
- Compensation of employees by industry (NAICS three digit) for 2001–2003 and (SIC two digit) for 1998–2000
- Compensation of employees by industry (SIC division level) for 2001
- Wage and salary disbursements by industry (NAICS three digit) for 2001–2003 and (SIC two digit) for 1969–2000
- Wage and salary disbursements by major industry (SIC division level) for 2001
- Full-time and part-time employment by industry (NAICS three digit) for 2001–2003, (SIC two digit) for 1969–2000, and (SIC division level) for 2001
- Full-time and part-time wage and salary employment by industry (NAICS three digit) for 2001–2003, (SIC two digit) for 1969–2000, and (SIC division level) for 2001

- State economic profiles (a selection of personal income and employment data for each state) for 1969–2003
- Personal current transfer receipts by major program for 1969–2003
- Farm income and expenses (including the major categories of gross receipts and expenses for all farms and for measures of farm income) for 1969–2003
- Personal current tax receipts by level of government and by type for 1969–2003

The following quarterly state estimates are available at <www.bea.gov/bea/regional/sqpi>:

- Personal income for the first quarter of 1969 to the second quarter of 2004
- Personal income by major source and earnings by major industry (NAICS two digit) for the first quarter of 2001 to the second quarter of 2004
- Personal income by major source and earnings by major industry (SIC division level) for the first quarter of 1969 to the fourth quarter of 2001
- Wage and salary disbursements by major industry (NAICS two digit) for the first quarter of 2001 to the second quarter of 2004
- Wage and salary disbursements by major industry (SIC division level) for the first quarter of 1969 to the fourth quarter of 2001

In addition, the entire set of estimates for all states will be available in October 2004 on CD-ROM with links to an updated description of the sources and methods used to estimate state personal income. To order the CD-ROM State Personal Income, 1969–2003 (no charge, product number RCN-0452), call the Order Desk at 1-800-704-0415 (outside the United States, call 202-606-9666).

The state personal income estimates are also available through the members of the BEA User Group, which consists of state agencies and universities that help BEA disseminate the estimates in their states. For a list of the BEA User Group on BEA's Web site, go to <www.bea.gov/bea/regional/docs/usergrp.cfm>.

For more information about these estimates, call the Regional Economic Information System at 202-606-5360, fax 202-606-5322, or e-mail reis.remd@bea.gov.

to farm proprietors' income were notable in the Dakotas. There were again relatively large upward revisions to transfer payments in West Virginia. Revisions to transfer payments in the other states were generally downward and slightly larger in 2003 than in 2002.

Chart 4. Frequency Distribution of Revisions to State Personal Income, 2001–2003

First-quarter-2004 revisions

BEA now incorporates newly available tabulations of wages and salaries of employees covered by state unemployment insurance (UI) from the Bureau of Labor Statistics (BLS). Previously, the estimates were based on extrapolations of fourth-quarter data using data from the BLS monthly Current Employment Statistics survey. The newly available data cover the first quarter of 2004 and are incorporated into revised first-quarter estimates.

Nationally, personal income was revised down 0.9 percent for the first quarter. Personal income for the majority of states was also revised down. Personal income in only eight states was revised up; it was essentially unchanged in one state (table D). The average revision of all 50 states and the District of Columbia was -0.8 percent.¹⁰

The pattern of revisions to most components of income generally followed the pattern exhibited in 2003 since, in the absence of much source data, the estimates of many of these components for first quarter 2004 are largely trend extrapolations. Wage and salary disbursements in the first quarter, however, were previously estimated on the basis of employment growth. The revisions to wage and salary disbursements across states tended to offset each other.¹¹

10. The standard deviation was 0.9. The mean absolute revision was 1.0 percent. The mean absolute revision is an average of the revisions, ignoring whether the revisions were upward or downward.

11. The mean revision was only -0.2 percent. The standard deviation was 1.1.

Tables 1 through 5 follow.

p Preliminary.

r Revised.

D Not shown to avoid disclosure of confidential information, but the estimates for this item are included in the total.

1. The estimates of earnings for 2002–2004 are based on the 2002 North American Industry Classification System (NAICS).

2. Contributions for government social insurance are included in earnings by type and industry, but they are excluded from personal income.

3. The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers: Wage and salary disbursements to U.S. residents commuting to Canada less

wage and salary disbursements to Canadian and Mexican residents commuting into the United States.

4. Rental income of persons includes the capital consumption adjustment.

5. Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.

6. "Other" consists of the wage and salary disbursements of U.S. residents employed by international organizations and foreign embassies and consulates in the United States.

NOTE: The personal income level shown for the United States is derived as the sum of the state estimates. It differs from the estimate of personal income in the national income and product accounts (NIPAs) because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data.

Table 3. Annual Personal Income and Per Capita Personal Income by State and Region

Area name	Personal income							Per capita personal income ¹							Rank in U.S.

r Revised.

1. Per capita personal income was computed using midyear population estimates of the Bureau of the Census.

2. Percent change was calculated from unrounded data.

NOTE: The personal income level shown for the United States is derived as the sum of the state estimates. It differs from the estimate of personal income in the national income and product accounts because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data.
