

## Newly Available NIPA Tables

As part of the revisions of the national income and product accounts (NIPAs), this report presents NIPA tables 3.15.1–3.15.6, tables 3.16–3.19, and tables 8.1–8.6. Tables 3.15.1–3.15.6 and 3.16–3.19 present the results of both the 2003 comprehensive NIPA revision and the 2004 annual NIPA revision; the article “Estimates of Real Government Consumption Expenditures and Gross Investment by Function for 1959–2003” in this issue presents

additional information about tables 3.15.1–3.15.6.

Tables 8.1–8.6 present the results of the 2004 annual NIPA revision. The August 2004 issue of the SURVEY OF CURRENT BUSINESS includes an article that describes the annual revision; it also includes most of the full set of NIPA tables.

Tables 2.9 and 7.20 will be published in the November SURVEY.

NOTE: Government consumption expenditures and gross investment is net of sales to other sectors. Thus, growth in the prices or quantities of sales to other sectors may partially, exactly, or more than offset the growth in the prices or quantities of gross consumption expenditures and gross investment. For example, the quantity index for state and local health (table 3.15.3, line 34) has decreased since 1999 and the price index (table 3.15.4, line 34) decreased in 2002 and 2003.

1. Consists of consumption expenditures to administer social insurance funds, including old age and survivors insurance (social security) and railroad retirement. Excludes government employee retirement plans.  
 2. Consists of consumption expenditures to administer Federal revenue sharing grants to state and local

governments beginning with 1972 and ending with 1987.  
 3. Consists primarily of unallocable state and local government consumption expenditures and gross investment.

NOTE: Government consumption expenditures and gross investment is net of sales to other sectors. Thus, growth in the prices or quantities of sales to other sectors may partially, exactly, or more than offset the growth in the prices or quantities of gross consumption expenditures and gross investment. For example, the quantity

index for state and local health (table 3.15.3, line 34) has decreased since 1999 and the price index (table 3.15.4, line 34) decreased in 2002 and 2003.  
 The residual line is the difference between the first line and the sum of the most detailed lines.

1. Equals Federal Government current expenditures less grants-in-aid to state and local governments plus state and local government current expenditures. Federal grants-in-aid to state and local governments by function are shown in table 3.17.

2. Prior to 1960, Federal interest receipts are not available separately but are included in interest payments, which is shown net of Federal interest receipts.

3. Equals unallocable state and local government expenditures, less "wage accruals less disbursements" shown in table 3.1; includes Federal Government revenue sharing grants to state and local governments beginning with 1972 and ending with 1987.

4. Consists of state and local government publicly owned liquor store systems, government-administered

lotteries and parimutuels, and other commercial activities.

5. Consists of social insurance funds, including old age, survivors, and disability insurance (social security), and railroad retirement. Excludes government employee retirement plans.

6. Consists primarily of Federal Government revenue sharing grants to state and local governments beginning with 1972 and ending with 1987, less "wage accruals less disbursements" shown in table 3.2.

7. Equals unallocable state and local government expenditures less "wage accruals less disbursements" shown in table 3.3.

8. Consists of current expenditures for sanitation.

1. Equals consumption expenditures, government social benefits, interest payments, subsidies, less "wage accruals less disbursements"; for Federal Government, also includes grants-in-aid to state and local governments and other current transfer payments to the rest of the world (net). Government, Federal Government, and state and local government current expenditures are shown separately in tables 3.1, 3.2, and 3.3.

2. Federal grants-in-aid to state and local governments are included in Federal current expenditures; because the grants are transactions between levels of government, they are eliminated in the consolidation of the government sector.

3. No state and local government capital transfers have been identified.

4. Consists of forgiveness of debts owed by foreign governments to the U.S. Government, and the December 1999 transfer to the Republic of Panama of the U.S. Government's assets in the Panama Canal Commission.

5. Consists of Federal Government investment grants to state and local governments.

6. Consists of maritime construction subsidies paid to business by the Federal Government.

7. Consists of Federal Government investment grants to state and local governments and payments to the Uniformed Services Retiree Health Care Fund to amortize the unfunded liability.

1. Contributions received, interest received, and dividends received are included in the NIPA personal sector. Capital gains net of losses are excluded from the NIPAs.

2. Consists of employer and employee contributions, except employer contributions to their own employee retirement plans.

3. Prior to 1968, dividends received is included in interest received (line 5).

4. Prior to 1985, capital gains (net of losses) of state and local employee retirement plans is included in line 11.

5. Unemployment insurance is recorded as a Federal program in the NIPAs.

6. Consists of estate and gift taxes and Federal investment grants.

7. Excludes current expenditures of Indian tribal government enterprises.

8. In the NIPAs, final expenditure components of GDP are recorded net of sales or receipts; all current-account sales by general government are therefore deducted in the calculation of NIPA current expenditures. However, most sales by general government are included in Census total revenue; a reconciliation item for

these sales is therefore required for both receipts and expenditures. The amount of the reconciliation item is less than the sales shown in table 3.10.5 because Census total revenue does not include medical vendor payments made by state and local governments to public institutions (classified as an intragovernmental transaction by Census) or the administrative expenses of state and local employee retirement plans (treated in the NIPAs as sales by government to the personal sector).

9. Includes timing differences that arise from restating the Census Bureau data to a year ending June 30. Census Bureau measures of state and local government revenue and expenditures (lines 1 and 25) primarily represent a fiscal year ending June 30, but some governments use other fiscal years. The NIPA measures shown in this table are for the fiscal year ending June 30, and are consistent with the not seasonally adjusted estimates in table 8.4.

10. These transactions are included in the NIPA personal sector.

11. Net investment is gross investment less consumption of fixed capital for government enterprises and general government.
