

Local Area Personal Income, 1992–94

THIS REPORT presents new estimates of personal income and per capita personal income for local areas—that is, for counties, metropolitan areas, and BEA economic areas—for 1994 and revised estimates for 1992–93. It also discusses the source data used to prepare the estimates.

Table 1 presents the estimates for the metropolitan areas, including the new metropolitan statistical areas (MSA's) of Flagstaff, AZ-UT, and Grand Junction, CO, which were defined by the Office of Management and Budget (OMB) in June 1995.¹ The metropolitan areas in all States are defined in terms of counties and county equivalents.²

The 10 areas with the highest per capita personal income in 1994 were generally “large” in terms of total personal income and population and were all located on the east or west coasts (table A). Seven of the ten areas are primary metropolitan statistical areas that are part of the New York-Northern New Jersey-Long Island, NY-NJ-CT-PA Consolidated Metropolitan Statistical Area. The 10 areas with the lowest per capita personal income in 1994 were “small” in terms of total personal income and population and were generally located in the Southeast or Southwest regions.

Table 2 presents the estimates for the BEA economic areas; each area consists of one or more economic nodes—usually metropolitan areas—and the surrounding counties that are economically related to the node.³ The economic areas

1. The Flagstaff, AZ-UT MSA consists of Coconino County, Arizona and Kane County, Utah. The Grand Junction, CO MSA consists of Mesa County, Colorado.

2. For the New England region, OMB's preferred definitions of the metropolitan areas are in terms of cities and towns, but the available data for cities and towns are not sufficient to prepare estimates of personal income.

The list of the metropolitan areas and their constituent counties and county equivalents is available from three sources:

(1) BEA, on the Regional Economic Information System CD-ROM; see the section “Data availability.”

(2) The National Technical Information Service (NTIS), in hard copy (Accession No. PB 95-208880) and in electronic format (Wordperfect 5.1, Accession No. PB 95-503371); write to NTIS, Document Sales, 5205 Port Royal Road, Springfield, VA 22161, or call (703) 487-4650.

(3) The Bureau of the Census, on the Internet; go to <http://www.census.gov>, select Geography, and then select Metropolitan area definitions.

3. For a description of the economic areas and the methodology used to define them, see “Redefinition of the BEA Economic Areas,” SURVEY OF CURRENT BUSINESS 75 (February 1995): 75–81. See also the map showing the economic areas on page 58 in the article “Metropolitan Area and BEA Economic Area Projections of Economic Activity and Population to the Year 2005” in this issue.

encompass all counties and county equivalents in the Nation.

Table 3 presents the estimates for counties and county equivalents. For Virginia, the estimates are presented for the larger independent cities as well as for most counties; the estimates for the smaller independent cities are combined with the estimates for adjacent counties.

Source data for the estimates

The estimates for 1992–93 were revised to reflect the annual revision of the State estimates of the components of personal income that were released in August 1995 and the routine incorporation of source data that are more current than the data that were available when the local area estimates for 1993 were prepared.⁴ The incorporation of the new source data mainly affected

A list of the economic areas and their constituent counties and county equivalents is included on the Regional Economic Information System CD-ROM; see the section “Data availability.”

4. See “State Personal Income, Revised Estimates for 1992–94,” SURVEY 75 (August 1995): 35–51.

In addition, the local area estimates of per capita personal income for 1990–91 have been recomputed to reflect revised Census Bureau estimates of population.

Table A.—Per Capita Personal Income for Selected Metropolitan Areas, 1994

	Per capita personal income (dollars)	Rank	Percent of national average
Metropolitan areas with highest per capita personal income:			
San Francisco, CA	34,281	1	158
West Palm Beach-Boca Raton, FL	33,518	2	154
New Haven-Bridgeport-Stamford-Danbury-Waterbury, CT	32,118	3	148

El Paso, TX	12,940	310	60
Brownsville-Harlingen-San Benito, TX	11,346	311	52
Laredo, TX	11,289	312	52
McAllen-Edinburg-Mission, TX	10,346	313	48

the estimates of nonfarm proprietors' income, of dividends, interest, and rent, and of the residence adjustment, which is the net inflow of the earnings of interarea commuters.

The 1992–93 estimates of nonfarm proprietors' income were revised to incorporate 1992 data on the number of small establishments by industry from the Census Bureau's *County Business Patterns*.

The 1993 estimates of dividends, interest, and rent and of the residence adjustment were revised to incorporate Internal Revenue Service tabulations of individual income tax return data for 1993.

The 1994 local area estimates are based on the most current county source data that are available.⁵ The 1994 estimates of most of wage and salary disbursements are based on 1994 data from the Bureau of Labor Statistics, and the estimates of other labor income and of personal contributions for social insurance are based mainly on the estimates of wages and salaries. For farm proprietors' income, the estimates of government payments for all States and of gross receipts for most of the major farm States are based on 1994 data from the Department of Agriculture and its State government affiliates. For transfer payments, the estimates of most or all of social security benefits, medicare benefits, and veterans benefits are based on 1994 data from the Department of Health and Human Services and from the Department of Veterans Affairs. The estimates of unemployment com-

5. A detailed description of the methodology used to prepare the local area estimates is available; see the section "Data availability."

pensation and of transfer payments under most of the major means-tested programs—including medicaid, aid to families with dependent children, supplemental security income, and food stamps—for most States are based on 1994 data from the State government agencies that administer the programs. The 1994 estimates of nonfarm proprietors' income, of dividends, interest, and rent, and of the residence adjustment are based mainly on extrapolations of the data that were used to prepare the 1993 estimates.

Further, the State totals of the county estimates of personal income presented in this article incorporate source data that were not able to be incorporated into the State estimates published last month.⁶ These data, as well as the revised estimates of personal income from the recent comprehensive revision of the national income and product accounts, will be incorporated into the State estimates as part of a comprehensive revision that is scheduled for release this September.⁷ In turn, the local area estimates will be revised in summer 1997 to incorporate this comprehensive revision of the State estimates.

6. This year, the preparation of the regional estimates of personal income was interrupted by the shutdowns of the Federal Government in November, December, and January. As a result, the release of the local area estimates was delayed for a month to allow for the incorporation of all of the source data that would normally be incorporated into these estimates; some of these data—particularly some of the data used to estimate the residence adjustment—were not incorporated into the State estimates published last month in "Total and Per Capita Personal Income by State and Region," SURVEY 76 (May 1996): 94–101.

7. Until the release of the comprehensive revision of the State estimates, the "official" estimates of State personal income and per capita personal income are those that were published last month.

Acknowledgments

The estimates of local area personal income were prepared by the Regional Economic Measurement Division under the direction of Robert L. Brown, Chief. The preparation of the estimates was a divisionwide effort.

Estimates of nonfarm labor earnings (wages and salaries and other labor income) were prepared by the Regional Wage Branch under the supervision of Sharon C. Carnevale, Chief. Major responsibilities were assigned to Elizabeth P. Cologer, Lisa C. Ninomiya, Michael G. Pilot, John A. Rusinko, and James M. Scott. Contributing staff members were Lisa A. Bradburn, Susan P. Den Herder, Elizabeth A. Freeman, John D. Laffman, Lela S. Lester, Russell C. Lusher, Richard A. Lutyk, Paul K. Medzerian, Adrienne T. Pilot, Mauricio Ortiz, Michael Phillips, William E. Reid, Jr., Victor A. Sahadachny, and Jaime Zenzano.

Estimates of farm earnings (wages and salaries, other labor income, and proprietors' income) and the residence adjustments were prepared by the Quarterly Income

Branch. Major responsibilities were assigned to James M. Zavrel. Contributing staff members were Elaine M. Briccetti, Carrie L. Case, Daniel R. Corrin, and Daniel Zabronsky.

Estimates of nonfarm proprietors' income, property income, transfer payments, and personal contributions for social insurance were prepared by the Proprietors' Income Branch. Major responsibilities were assigned to Charles A. Jolley. Contributing staff members were Toan A. Ly, Ellen M. Wright, and Marianne A. Ziver.

The public use tabulations and data files were assembled and the text and tables for this article were prepared by the Regional Economic Information System Branch. Major responsibilities were assigned to Kathy A. Albetski, Wallace K. Bailey, and Gary V. Kennedy. Contributing staff members were H Steven Dolan, Jeffrey L. Newman, Michael J. Paris, Albert Silverman, Nancy E. Smith, Callan S. Swenson, Monique B. Tyes, and Mary C. Williams.

Data availability

Personal income by type of payment, earnings by Standard Industrial Classification (SIC) division, population, and per capita personal income are available for local areas for 1969–94 (see table B). Data are also available as follows: A version of table B that includes earnings by SIC two-digit industry; a set of tables that includes only the three summary statistics—personal income, per capita personal income, and population; and supplemental tables for employment by SIC division, for transfer payments by program, and for major categories of farm income and expenses.

The summary statistics are presented in *Local Area Personal Income, 1969–92*, which also presents a description of the sources and methods used to prepare the estimates and a list of

the State agencies and universities from which the more detailed tables can be obtained.⁸

The entire set of the detailed and summary tables for all areas and for all years is available on a CD-ROM. This CD-ROM also contains the quarterly State estimates of personal income for 1969–95; the estimates of gross state product for 1977–92; the projections of personal income and employment to 2045 for States, metropolitan areas, and BEA economic areas; and a description of the sources and methods used to estimate local area personal income. The CD-ROM is designed for use with microcomputers equipped with either the MS-DOS or the Windows operating system and

8. U.S. Department of Commerce, Bureau of Economic Analysis, *Local Area Personal Income, 1969–92* (Washington, DC: U.S. Government Printing Office, September 1994).

The 1991–92 estimates of personal income and the 1990–92 estimates of population and per capita personal income in that publication have been superseded by revisions.

1. 1989–94 based on 1987 SIC.

2. Farm income consists of proprietors' net farm income, the wages of hired labor, the pay-in-kind of hired farm labor, and the salaries of officers of corporate farms.

3. Census Bureau midyear population estimates. Estimates for 1990–94 reflect county population estimates available as of October 1995.

4. Personal contributions for social insurance are included in earnings by type and industry but excluded from personal income.

5. U.S. adjustment for residence consists of adjustments for border workers: Income of U.S. residents commuting

outside U.S. borders to work less income of foreign residents commuting inside U.S. borders to work plus certain Caribbean seasonal workers.

6. Includes the capital consumption adjustment for rental income of persons.

7. Includes the inventory valuation and capital consumption adjustments.

8. "Other" consists of wages and salaries of U.S. residents employed by international organizations and foreign embassies and consulates in the U.S.

D Not shown to avoid disclosure of confidential information. Estimates are included in totals.

L Less than \$50,000. Estimates are included in totals.

includes a program to help users select, display, print, and copy the tables. The price is \$35.00.

These tables are also available on magnetic tapes, computer printouts, and microcomputer diskettes. Each table for all years for all the metropolitan areas, for all the BEA economic areas, or for all the counties is available on a single reel of magnetic tape, but the table for counties that includes earnings by SIC two-digit industry requires two reels at standard blocksize; the price of each reel of magnetic tape is \$100. The tables on computer printouts are priced by the number of pages; the minimum charge is \$10. The tables on diskette are priced at \$20 per diskette; as many as nine diskettes are required for all of the local

areas in a series, but users can limit their orders to the local areas in particular States.

In addition, the following information is free: A sample packet of all tables, a list of the State agencies and universities from which the State and local area estimates can be obtained, and a description of sources and methods used to prepare the local area estimates.

For information on ordering these products, write to the Regional Economic Information System, BE-55, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230, or call (202) 606-5360. Visa or Mastercard are accepted for telephone orders.

Tables 1 through 3 follow.
