

Authors, Titles, and Subjects in the *Marine Fisheries Review* 54(1-4), 1992

A

- Anchovy, northern
abundance levels, 1:13
oil spill effects on, 1:12
- Anderson, James L., and Sofia U. Bettencourt, "Status, constraints, and opportunities for salmon culture in the United States: A review," 4:25
- Anglers,
billfish
annual harvest estimate, 1:5
annual trip estimate, 1:5
characteristics, 1:3
expenditures, 1:4-5
opinion on management options, 1:3-4
species preferences, 1:3
typical trip, 1:3
- Anguilla anguilla*—see Eel, European
Anguillicola crassus—see Worms, nematode
Anguillicola japonica—see Eel, Japanese
Argopecten irradians—see Scallop, bay

B

- Bacterium
Pacific oyster, 3:5
- Bakkala, Richard G.—see Wilderbuer et al.
- Barotrauma, preventing, 3:29-31
- Bering Sea, eastern
bottom trawl survey, 4:10-11
continental shelf characteristics, 4:1-3
yellowfin sole, 4:1-18
- Bettencourt, Sofia U.—see Anderson and Bettencourt
- Billfish
Fishery Management Plan, 1:1
angler species preference, 1:3, 4
- Bluefish
Fishery Management Plan and PCB's, 4:19, 22-24
harvest strategies, 4:20-22
PCB's, size related concentrations of, 4:20
spawning seasons/areas, 4:20
yield-per-recruit and PCB's, 4:20-21
- Bonamia ostreae*, 3:5
- Bonito, Pacific
abundance levels, 1:13
oil spill effects on, 1:13
- Bryan, C. E.—see Griffin et al.
- By-catch
caridean shrimp, 1:27
deep-water eel, 1:27
dolphin, 2:7-14

C-D

- Chaceon affinis*—see Crab, geryonid
Chaceon bicolor—see Crab, geryonid
Chaceon fenneri—see Crab, geryonid
Chaceon granulatus—see Crab, geryonid
Chaceon maritae—see Crab, geryonid
Chaceon notialis—see Crab, geryonid
Chaceon quinquedens—see Crab, geryonid
"Characteristics of billfish anglers in the U.S. Atlantic Ocean," by Mark R. Fisher and Robert B. Ditton, 1:1
- Charter boat—see Vessel
- Clark, Jerry—see Griffin et al.
- Coan, Attilio L., Jr., Kenneth E. Wallace, and

- Alan R. Jackson, "Differences in dolphin mortality rates in night and day sets for the U.S. eastern tropical Pacific tuna purse seine fishery," 2:7
- Copepod, parasitic
Pacific oyster, 3:5
- Crab, geryonid
deep-water remote camera procedures, 1:15-16
results, 1:19-21
deep-water trapping procedures, 1:15-16
results, 1:17-19
trapping survey
depth range, 1:29
management, 1:30
marketability, 1:28, 30
physical characteristics, 1:28
procedures, 1:26-27
results, 1:27
sex ratios, 1:29-30
- Crassostrea virginica*—see Oyster, American
"Differences in dolphin mortality rates in night and day sets for the U.S. eastern tropical Pacific tuna purse seine fishery," by Attilio L. Coan, Jr., Kenneth E. Wallace, and Alan R. Jackson, 2:7
- Disease
nonindigenous marine animals, 3:1-10
oyster parasites, 2:1-6
salmon culture, 3:3-4, 4:31
"Disease risks associated with importation of nonindigenous marine animals," by Carl J. Sindermann, 1:1
- Ditton, Robert B., Stephen M. Holland, and Duane A. Gill, "The U.S. Gulf of Mexico party boat industry: Activity centers, species targeted, and fisheries management opinions," 2:15
- Ditton, Robert B.—see Fisher and Ditton
- Ditton, Robert B.—see Holland et al.
- Dolphin mortality
purse seines, eastern tropical Pacific day vs. night sets, 2:7-14
high-intensity vs. other lights, 2:7, 9, 13-14

E

- "An economic analysis of Texas shrimp season closures," by Wade Griffin, Holly Hendrickson, Chris Oliver, Gary Matlock, C. E. Bryan, Robin Riechers, and Jerry Clark, 3:21
- Economics
fish imports, 4:26
salmon culture, 4:31
salmon price declines, 4:29
seafood consumption, 4:25-26
Texas shrimp season closure, 3:25-27
- Eel
deep-water
geryonid fishery by-catch, 1:27
- European
nematode worms, 3:5-6
- Japanese
nematode worm introduction in Europe, 3:6
- "Effects of the Santa Barbara, Calif., oil spill on the apparent abundance of pelagic fishery resources," by James L. Squire, 1:7
- Eldridge, Peter J., and G. Malcolm Meaburn,

"Potential impact of PCB's on bluefish, *Pomatomus saltatrix*, management," 4:19
Engraulis mordax—see Anchovy, northern

Nets, purse seine
 dolphin entanglement, 2:7

This statement is required by the Act of August 12, 1970, Section 3685, Title 39, U.S. Code, showing ownership, management, and circulation of the *Marine Fisheries Review*, publication number 366-360, and was filed on 18 September 1991. The *Review* is published quarterly (four issues annually) with an annual subscription price of \$9.00 (sold by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402). The complete mailing address of the office of publication is: NMFS Scientific Publications Office, F/NWR1, NOAA, 7600 Sand Point Way NE, BIN C15700, Seattle, WA 98115. The complete mailing address of the headquarters of the publishing agency is: National Marine Fisheries Service, NOAA, Department of Commerce, 1335 East-West Highway, Silver Spring, MD 20910. The name of the publisher is Willis Hobart and the editor and managing editor is Willis Hobart; their mailing address is: NMFS Scientific Publications Office, 7600 Sand Point Way NE, BIN C15700, Seattle, WA 98115. The owner is the U.S. Department of Commerce, 14th St., N.W., Washington, DC 20230; there are no bondholders, mortgages, or other security holders. The purpose, function, and nonprofit status of the organization (agency) and the exempt status for Federal income tax purposes has not changed during the preceding 12 months. The extent and nature of circulation is as follows: Total number of copies (A) (average number of copies of each issue during the preceding 12 months) was 2307 and the actual number of copies of the single issue published nearest to the filing date was 2310. Paid circulation (B) is handled by the U.S. Government Printing Office, Washington, DC 20402, and (C) the total number of printed for their sales (mail subscriptions and individual sales) was 750 for both the average number of copies each issue during the preceding 12 months and the actual number of copies of the single issue published nearest to the filing date. Free distribution (D) by mail, carrier, or other means; samples, complimentary, and other free copies (average number of copies each issue during the preceding 12 months) was 1557 and the actual number of copies of the single issue published nearest to the filing date was 1560. The total distribution (E: sum of C and D) (average number of copies each issue during the preceding 12 months) was 2307 and the actual number of copies of the single issue published nearest to the filing date was 2310. There were no copies not distributed or returned from news agents (F). The total (G: sum of E and F) is equal to the net press run figures shown in Item A: 2307 and 2310 copies, respectively. I certify that the statements made by me above are correct and complete: (Signed) Willis Hobart, Publisher.
