

Relative to its population, Nevada had a high number of food service, construction, sales, and personal care occupations.

FIGURE 37

● Nationally, construction and extraction occupations represent about 5 percent of employment, while in Nevada, these occupations make up 9.1 percent of State employment. Personal care and service occupations represented about 2.5 percent of employment nationally, but more than double this percentage in Nevada, at 5.6 percent of State employment.

Percent of employment in Nevada by occupation, May 2007
