HOUSING STARTS AND BUILDING PERMITS

Privately owned housing starts in June 1999 were at a seasonally adjusted annual rate of 1,571,000; this is 6 (± 6) percent below the revised May rate of 1,665,000 and 3 (± 7) percent below the June 1998 figure of 1,626,000.

Single-family housing starts in June 1999 were at a rate of 1,274,000; this is 9 (± 6) percent below the May figure of 1,395,000. The June rate for units in buildings with five units or more was 267,000. The June rate for units in buildings with two to four units was 30,000.

During the first 6 months of this year, 823,900 housing units were started compared with 772,700 units for the same period in 1998. This is an increase of 7 (± 2) percent.

New privately owned housing construction was authorized in June in the 19,000 permit-issuing places at a seasonally adjusted annual rate of 1,621,000 units; this is 2 (± 1) percent above the revised May rate of 1,591,000, and 6 (± 1) percent above the June 1998 figure of 1,531,000.

Single-family authorizations in June 1999 were at a rate of 1,231,000; this is 1 (± 1) percent below the May figure of 1,243,000. Authorizations of units in buildings with five units or more were at a rate of 330,000 in June; this is 14 percent above the May estimate of 289,000. The June rate of permit-authorized units in buildings with two to four units was 60,000.

During the first 6 months of this year, 830,600 housing units were authorized by permits in the 19,000 places compared with 777,300 units for the same period in 1998. This is an increase of 7 (± 1) percent.

In interpreting changes in housing starts and building permits, note that month-to-month changes in seasonally adjusted statistics often show movements which may be irregular. It may take 5 months to establish an underlying trend for total starts, 3 months for building permit authorizations.

The statistics in this report are estimated from sample surveys and are subject to sampling variability as well as nonsampling error including bias and variance from response, nonreporting, and undercoverage. Estimated average relative standard errors of preliminary data are shown in the tables. Whenever a statement such as "2 (± 3) percent above" appears in the text, this indicates the range (-1 to +5 percent) in which the actual percent change is likely to have occurred. All ranges given are 90-percent confidence intervals and account for only sampling variability. If a range contains zero, it is uncertain whether there was an increase or decrease; that is, the change is not statistically significant. For any comparison cited without a confidence interval, the change is statistically significant. Explanations of confidence intervals and sampling variability appear in the appendix to the April 1999 Current Construction Reports, C20/99-4. On average, the preliminary seasonally adjusted estimates of total housing starts and building permits are revised about ± 1 percent.

Housing starts and building permits data do not include manufactured home units. Manufactured home statistics are available through the Internet at: www.census.gov/const/www/index.html. For further information on these data, contact Construction Expenditures Branch Manufacturing and Construction Division, telephone 301-457-1605.

HISTORICAL DATA

Historical data on housing starts and residential permit authorizations are available from Residential Construction Branch, Manufacturing and Construction Division, U.S. Census Bureau, Washington, DC 20233-6900. Telephone 301-457-1321.

A list of tables and special supplements is shown below:

Title	C20 issues

^PPreliminary. ^RRevised.

¹Average Relative Standard Errors: Average for the latest 6-month period (January through June or July through December).

Note: These backlog data represent the number of housing units authorized in all months up to and including the last day of the reporting period and not started as of that date without regard to the months of original permit issuance. Cancelled, abandoned, expired, and revoked permits are excluded from the backlog.

STANDARD ERRORS³																					
Annual (percent) . .	1	1	3	1	1	3	3	4	9	3	2	17	2	3	5	1	2	4	1	1	2
Quarterly (percent) . .	1	1	5	1	1	5	6	6	22	3	4	8	4	4	18	2	2	6	2	1	6

^PPreliminary.

¹Metropolitan statistical areas.

²Includes units started in structures with two to four units.

³Average Relative Standard Errors (Avg. RSE): Annual—Avg. RSE for the last 2 years; Quarterly—Avg. RSE for the latest 2-quarter period (quarter 1 through quarter 2 or quarter 3 through quarter 4).

^pPreliminary. ^rRevised.

¹The implicit seasonal index is the ratio of the unadjusted number of housing units started in the United States to the seasonally adjusted national total of housing units started. It provides an indication of the overall seasonality for the particular month.

Note: These seasonal indexes include trading-day adjustment factors.

Table 6. Seasonal Indexes Used to Adjust Housing Units Authorized in Permit-Issuing Places

Period	United States implicit index ¹	In structures with—						All units			
		1 unit				2 to 4 units	5 units or more	North-east	Midwest	South	West
		North-east	Midwest	South	West
