Attention Small Business Owners!

- Are you a for-profit high-tech firm with 500 employees or less?
- Are you developing and commercializing cutting-edge environmental technologies?
- Are you interested in funding for your proposal preparation and research& development of your technology?

If so, this FREE workshop is for you!

The U.S. Environmental Protection Agency, Region 7 will hold a workshop for small businesses to learn about the Small Business Innovation Research (SBIR) Program.

EPA is one of 11 federal agencies that participate in the SBIR Program established by the Small Business Innovation Development Act of 1982. The purpose of this Act is to strengthen the role of small businesses in federally funded research and development, and help develop a stronger national base for technical innovation.

EPA issues annual solicitations for Phase I and Phase II research proposals from science and technology-based firms.
