

Richard Carlson

Chief Operating Officer

Extengine

Mr. Carlson has over 30 years of varied experience in vehicular and engine testing and the application of catalysts and emission control technologies to gasoline and diesel engines. He has worked in close cooperation with component manufacturers, customers, test laboratories, and regulatory agencies regarding certification of emission control systems.

Mr. Carlson joined Extengine in 2004 during the final phases of verifying its ADEC-I retrofit system and is responsible for on-going development, demonstration, and verification of ADEC-II, MaxTRAP, and LEV2 retrofit systems.

Prior to joining Extengine, Mr. Carlson served for 12 years as Director of Research and Quality for Car Sound Exhaust System, Inc., a major privately owned manufacturer of aftermarket automotive catalytic converters and performance exhaust systems.

Mr. Carlson received his MS in Environmental Engineering from UCLA and has co-authored a number of technical papers.
