

Biography of Erik White

Erik is Chief of the Heavy-Duty Diesel In-Use Strategies Branch at the California Air Resources Board. Erik received his Bachelor of Science degree in Aerospace Engineering from UCLA in 1993. In his current capacity with ARB, he oversees the development of proposed new statewide fleet requirements for operators of off-road equipment and on-road trucks. Erik's staff is also responsible for implementing the statewide emission reduction strategies for fleet operators, including transit fleets, refuse hauler fleets, and public and utility fleets. In addition, Erik oversees the ARB's diesel retrofit verification program, and the ARB's heavy-duty diesel emission testing laboratory. During his tenure at ARB, Erik has also had the opportunity to work on ARB's emission reduction strategies for locomotives, ocean-going vessels, and harborcraft, as well as the development and implementation of California's reformulated fuels regulations.
