MEETING SUMMARY:

This meeting covered several proposed changes to the current ASME A17.1 code on escalators and moving walks. Of particular interest to the agency was TR-0044 that was submitted by Tim Smith, from CPSC's Human Factors Division. This TR recommends changes to the current Caution sign used on escalators. After a review of the TR and some discussion, the sub-committee requested that CPSC develop specific examples of the proposed changes and to present them at the next meeting, on April 5, 2001.
