SUBJECT:

Glycol Ethers

DATE OF MEETING:

June 15, 1995

PLACE:

Chemical Manufacturers Association
Washington, DC

LOG ENTRY SOURCE:

Laureen E. Burton

COMMISSION REPRESENTATIVES:

Laureen E. Burton
Valentine Schaeffer

NON-COMMISSION REPRESENTATIVES:

Ethylene Glycol Ethers Panel of CMA

SUMMARY OF MEETING:

The meeting was begun with an explanation by CPSC of the purpose and history of the glycol ethers project. This was followed by a representative of the EG panel giving a description of the work being done by the EG panel. Then the meeting was opened up to discuss the type of information that the staff was hoping to obtain from the CMA. It was decided that the EG panel would put together some charts/graphs of information for discussion which will include the types of EG available, production levels, and consumer use information. Using the information obtained from CMA's submission, along with findings of the economics report and the toxicity reviews staff will submit a report to technical management with possible suggestions for future work, if necessary.
