

LOG OF MEETING

DIRECTORATE FOR ENGINEERING SCIENCES

20 APR 2004

SUBJECT: Sleep Products Safety Council (SPSC) Mattress Flammability Meeting

DATE OF MEETING: April 7, 2004

DATE OF LOG ENTRY: April 19, 2004

SOURCE OF LOG ENTRY: Allyson Tenney, Engineering Sciences *AT*

LOCATION: CPSC Offices, Bethesda Towers, Bethesda, Maryland

CPSC ATTENDEES: See attached attendees list

NON-CPSC ATTENDEES: See attached attendees list

SUMMARY OF MEETING:

CPSC staff met with the Sleep Products Safety Council (SPSC) to discuss various issues relating to the mattress standard development process. The discussions focused on product definitions, prototypes, and testing options.

CPSC staff asked for comments regarding mattress and related product definitions for use in a proposed mattress standard. Much of the discussion involved defining mattress and foundation model designs and defining the various components. The discussion evolved to include prototypes and pooling options. Individual mattress producers may have test data to support that certain components do not influence mattress flammability. CPSC staff is interested in discussing available test data and will look at the possibility of obtaining this information in future meetings.

Mattress production unit identification numbers and labeling issues were also discussed. The meeting concluded with a short discussion regarding very limited test data on various mattress sizes. These topics will be discussed in further detail as the standard development process progresses.
