

## Comments for U.S. Copyright Office

I am writing to encourage you to continue facilitating the use of copyrighted material for recorded and electronic formats. I have been legally blind since the mid-60's and the use of recorded textbooks made it possible for me to a college education and two graduate degrees. I use NLS recorded books for my work and for recreation. I now that for most blind people, recorded books are their lifeline to the rest of the world.

I have always believed that if the federal government did nothing else but facilitate accessible books and periodicals my taxes would be well spent. Thank you so much for your consideration of these comments.
