

**Congress of the United States**  
Washington, DC 20515

April 25, 2008

The Honorable William E. Kovacic  
Federal Trade Commission  
600 Pennsylvania Avenue, N.W.  
Washington, DC 20580

Dear Chair Kovacic:

In light of nationwide consumer concern about the record prices for oil and gas at the pump, we urge the Federal Trade Commission (FTC) to immediately initiate a rulemaking to implement the market manipulation authority mandated by Congress in the Energy Independence and Security Act of 2007 (P.L. 110-140). Congress provided this authority to the FTC four months ago -- but to date, the FTC has failed to exercise its power to protect consumers from skyrocketing energy costs. Recent price volatility and investor speculation in the oil market require the diligent oversight Congress called for, especially when oil prices break records daily, hitting \$119 per barrel this week.

The Energy Independence and Security Act, which became law last December, directs the FTC to ensure that the U.S. petroleum market is free from price or supply manipulation. Congress gave you the power to levy tough penalties against those who might seek to profit from such illegal activities. Utilized effectively, this new authority will substantially strengthen consumer protections against high energy prices. More importantly, vigorous enforcement will help lower and stabilize prices, increase market transparency, and provide Americans with confidence that retail gasoline and diesel prices are free from the influence of anticompetitive practices and the exercise of market power.

This new authority granted to the FTC is modeled on the anti-manipulation authorities utilized by other agencies such as the Securities and Exchange Commission (SEC) and the Federal Energy Regulatory Commission (FERC). Specifically, Title VIII, Subtitle B of the Energy Independence and Security Act is modeled on section 10(b) of the Securities Exchange Act of 1934 for which a substantial body of case law has been developed over the last half century. In fact, the Supreme Court has compared this body of law to "a judicial oak which has grown from little more than a legislative acorn." *Blue Chip Stamps v. Manor Drug Stores*, 421 U.S. 723, 737 (1975).

FTC has acknowledged that oil and gas markets are susceptible to manipulation. In 2006, the FTC's Congressionally-mandated investigation of gasoline prices after Hurricane Katrina acknowledged the possibility that the petroleum industry can manipulate prices by reducing production, distribution, or inventories or increasing margins.

We need aggressive oversight to ensure such actions are not presently occurring, and to punish them if they are cheating consumers. The FTC must no longer delay action on implementing the mandate from Congress to stop market manipulation as American families and businesses struggle to deal with record gas prices.

Sincerely,

  
Nancy Pelosi  
Speaker of the House

  
Steny Hoyer  
House Majority Leader

  
James E. Clyburn  
House Majority Whip

  
Rahm Emanuel  
Chairman, Democratic Caucus

  
John Dingell  
Chairman, Energy and  
Commerce Committee

  
Henry Waxman  
Chairman, Oversight  
and Government Reform

THE CHAIRMAN

FEDERAL TRADE COMMISSION  
WASHINGTON, D.C. 20580

May 2, 2008

The Honorable Nancy Pelosi  
Speaker of the House of Representatives  
United States Congress  
Washington, DC 20515

Dear Speaker Pelosi:

Thank you for the letter of April 25, 2008, from you and your House colleagues about the Federal Trade Commission's new authority, under Section 811 of the Energy Independence and Security Act of 2007, regarding manipulation in wholesale crude oil, gasoline, or petroleum distillate markets. Today, the Commission will make public an Advance Notice of Proposed Rulemaking (ANPR), and our goal is to complete the Rulemaking process this year. We look forward to working with you and your colleagues as this Rulemaking moves forward.

Our staff has worked hard to move as speedily as possible. To date, an FTC task force has examined the development and use of anti-manipulation authority by other federal agencies, as well as by the states; met with other government officials (including the Commodity Futures Trading Commission, the Federal Energy Regulatory Commission, and the Securities and Exchange Commission); and, undertaken other tasks, both substantive and administrative, in connection with this legislation. The ANPR announces a comment period of 30 days, following which the agency expects expeditiously to analyze the comments received, draft a proposed rule, and issue a Notice of Proposed Rulemaking (NPR), with a 30-day comment period. We appreciate your efforts to combat high and volatile gasoline prices, and we will keep you apprised of significant developments throughout the Rulemaking process.

The learning that will accompany the ANPR/NPR process is crucial. The Commission has not previously sought to develop a legal definition of the term "manipulation" or prosecuted a case alleging manipulation. Moreover, there are challenges involved in appropriately applying this broad concept to markets that, unlike electricity or natural gas, are not subject to comprehensive regulatory, disclosure, or reporting regimes. The pursuit of a case alleging manipulation in wholesale markets for crude oil, gasoline, or distillates may encounter other complexities arising from the differences between such products and the other markets in which manipulation cases have been brought, but we hope to overcome those challenges as we avail ourselves of the methods and opportunities contemplated by the ANPR/NPR procedures. Specifically, we believe that there is no better way to generate meaningful comments that will assist in our development of a workable rule for the benefit of the American public.

Enclosed please find a copy of the ANPR which we expect to be published in the Federal Register on Monday, May 5, 2008. The Commission greatly appreciates your interest in this topic. Please feel free to contact Chairman Kovacic at any time with any additional questions or comments, or have your staff call Jeanne Bumpus, the Director of our Office of Congressional Relations, at (202) 326-2195.

Sincerely,

William E. Kovacic  
Chairman

Pamela Jones Harbour  
Commissioner

Jon Leibowitz

The Honorable Rahm Emanuel  
The Honorable John D. Dingell  
The Honorable Henry Waxman  
The Honorable Edward J. Markey

THE CHAIRMAN

FEDERAL TRADE COMMISSION  
WASHINGTON, D.C. 20580

May 2, 2008

The Honorable Steny H. Hoyer  
U.S. House of Representatives  
United States Congress  
Washington, DC 20515

Dear Congressman Hoyer:

Thank you for the letter of April 25, 2008, from you and your House colleagues about the Federal Trade Commission's new authority, under Section 811 of the Energy Independence and Security Act of 2007, regarding manipulation in wholesale crude oil, gasoline, or petroleum distillate markets. Today, the Commission will make public an Advance Notice of Proposed Rulemaking (ANPR), and our goal is to complete the Rulemaking process this year. We look forward to working with you and your colleagues as this Rulemaking moves forward.

Our staff has worked hard to move as speedily as possible. To date, an FTC task force has examined the development and use of anti-manipulation authority by other federal agencies, as well as by the states; met with other government officials (including the Commodity Futures Trading Commission, the Federal Energy Regulatory Commission, and the Securities and Exchange Commission); and, undertaken other tasks, both substantive and administrative, in connection with this legislation. The ANPR announces a comment period of 30 days, following which the agency expects expeditiously to analyze the comments received, draft a proposed rule, and issue a Notice of Proposed Rulemaking (NPR), with a 30-day comment period. We appreciate your efforts to combat high and volatile gasoline prices, and we will keep you apprised of significant developments throughout the Rulemaking process.

The learning that will accompany the ANPR/NPR process is crucial. The Commission has not previously sought to develop a legal definition of the term "manipulation" or prosecuted a case alleging manipulation. Moreover, there are challenges involved in appropriately applying this broad concept to markets that, unlike electricity or natural gas, are not subject to comprehensive regulatory, disclosure, or reporting regimes. The pursuit of a case alleging manipulation in wholesale markets for crude oil, gasoline, or distillates may encounter other complexities arising from the differences between such products and the other markets in which manipulation cases have been brought, but we hope to overcome those challenges as we avail ourselves of the methods and opportunities contemplated by the ANPR/NPR procedures. Specifically, we believe that there is no better way to generate meaningful comments that will assist in our development of a workable rule for the benefit of the American public.
