Dear Robert Atofsky

August 7 1997

I Suzanne Wiggins an employce of New Balance in Nerridgewock, Maine very strongly support the New 75% Standard of Made in the USA. I very much value my job and need to keep working to make ends meet. losing jobs in maine because of the 100% Made in the USA would be very tragic to our economy. If we can buy materials at a cheaper cost overseas and still assemble them here in maine it will keep us employed and also keep the cost of our shoes we sell to the customers down inable to compete with todays economy. Thanks for letting us express our opinion on the new standard

Sincerely,
Sue Wiggins
