

Please honor the Made In America symbol to really be completely made in America. We need more jobs for people here & not minimum wage jobs but jobs people can support a family on.

We need less free trade. I actually let the mark decide if I will buy an item that I am not really sure I want to buy. I say - if it's made in America I'll buy it. I'm also concerned that many items no longer have any label telling when they are made.

also, these made in foreign country items are not inspected for toxic paints & things that are unsafe & they should have to follow some codes as we have. It costs a lot for companies to comply with safe materials, paints, etc. & everything coming into U.S.A. should be inspected here for safe consumption

Thank you, Marion Jones 815-476-5641
