TTO Whom It MAY concern,

I am writing concerning your proposal to weaken standards for products that say "MADE IN THE USA." I wish to express a feeling of outrage and disappointment! This is one of the things we look at first when shopping. If we can't trust that label, we can't trust the government that is supposed to protect it. Your position that consumer expectations have changed is FIAT WRONG. OR maybe they have. There should be more products made in the USA!! Not Less!! Please reconsider your position on this important issue.

Respectfully,  
Larry D Sylvester
