2000 CONSUMER EXPENDITURE INTERVIEW SURVEY
PUBLIC USE MICRODATA
DOCUMENTATION

February 15, 2002

U.S. Department of Labor
Bureau of Labor Statistics
Division of Consumer Expenditure Surveys

TABLE OF CONTENTS   Links to Pages

I. INTRODUCTION

The Consumer Expenditure Survey (CE) program provides a continuous and comprehensive flow of data on the buying habits of American consumers. These data are used widely in economic research and analysis, and in support of revisions of the Consumer Price Index. To meet the needs of users, the Bureau of Labor Statistics (BLS) produces population estimates for consumer units (CUs) of average expenditures in news releases, reports, issues, and articles in the Monthly Labor Review. Tabulated CE data are also available on the Internet and by facsimile transmission (See Section XVI. APPENDIX 5). The microdata are available on CD-ROMs.

These microdata files present detailed expenditure and income data from the Interview component of the CE for 2000 and the first quarter of 2001. The Interview survey collects data on up to 95 percent of total household expenditures. In addition to the FMLY, MEMB, MTAB, and ITAB files, the microdata include files created directly from the expenditure sections of the Interview survey (EXPN files). The EXPN files contain expenditure data and ancillary descriptive information, often not available on the FMLY or MTAB files, in a format similar to the Interview questionnaire. In addition to the extra information available on the EXPN files, users can identify distinct spending categories easily and reduce processing time due to the organization of the files by type of expenditure.

Estimates of average expenditures in 2000 from the Interview Survey, integrated with data from the Diary Survey, are published in *Consumer Expenditures in 2000, Report 958* (2002). A list of recent publications containing data from the CE appears at the end of this documentation.

The microdata files are in the public domain and, with appropriate credit, may be reproduced without permission. A suggested citation is: "U.S. Department of Labor, Bureau of Labor Statistics, Consumer Expenditure Survey, Interview Survey, 2000."

II. CHANGES FROM THE 1999 MICRODATA FILES

A. FMLY File

1. Variable Additions

Beginning in 2000Q1 the FMLY file will contain the following new variables.

Variable name	Variable Description	Start Position	Format

UNISTRQ	How many housing units, both occupied and vacant, are in this structure?
	
	Coded:
	  01 Only OTHER units
	  02 Mobile home or trailer
	  03 One, detached
	  04 One, attached
	  05 2
	  06 3-4
	  07 5-9
	  08 10-19
		4606	CHAR(2)

Variable name	Variable Description	Start Position	Format
	09 20-49 10 50 or more Control Card 15		
UNISTRQ_	Flag	4608	CHAR(1)

Beginning in 2000Q1 the FMLY file will contain the following new summary outlays variables (EVARS).

These new summary variables are based on outlays and thus include mortgage and vehicle principal payments along with interest when these items are financed. In addition, expenditures for down payments are included where applicable. If these items are not financed, the expenditure is calculated in a similar fashion as the main summary level expenditure variables, the full purchase price is used as the expenditure amount. As is the convention with the main summary level expenditure variables above, each of the E-variable categories are sorted by expenditures that took place during the previous calendar quarter and current calendar quarter. However for the E-variables, the previous quarter expenditure variables are appended with "P" and the current quarter expenditure variables are appended with "C". For start positions and variable descriptor information see section III.F.1.M. of the Detailed Variable Descriptions. The EVAR categories and definitions follow :

TOTAL OUTLAYS:

ETOTALP(C)--Total outlays (5th interview-only data not adjusted to account for CUs in interviews 2-4).
ETOTALP(C) = FOODPQ(CQ) + ALCBEVPQ(CQ) + EHOUSNGP(C) + APPARPQ(CQ) + ETRANPTP(C)
   + HEALTHPQ(CQ) + EENTRMTP(C) + PERSCAPQ(CQ) + READPQ(CQ) +
   EDUCAPQ(CQ) + TOBACCPQ(CQ) + EMISCELP(C) + CASHCOPQ(CQ) +
   PERINSPQ(CQ)

ETOTAP(C)X4--Total outlays (5th interview-only data is adjusted to account for CUs in interviews 2-4).
ETOTAP(C)X4 = FOODPQ(CQ) + ALCBEVPQ(CQ) + EHOUSNGP(C) + APPARPQ(CQ) +
   ETRANPTP(C) + HEALTHPQ(CQ) + EENTRMTP(C) + PERSCAPQ(CQ) +
   READPQ(CQ) + EDUCAPQ(CQ) + TOBACCPQ(CQ) + MISC1PQ(CQ) +
   MISC2PQ(CQ) * (4) + EMISCMTP(C) + CASHCOPQ(CQ) * (4) + PERINSPQ(CQ)

HOUSING OUTLAYS:

EHOUSNGP(C)--Total housing outlays.
EHOUSNGP(C) = ESHELTRP(C) + UTILPQ(CQ) + HOUSOPPQ(CQ) + HOUSEQPQ(CQ)

  ESHELTRP(C)--Outlays on shelter.
  ESHELTRP(C) = EOWNDWLP(C) + RENDWEPQ(CQ) + EOTHLODP(C)

    EOWNDWLP(C)--Outlays on owned dwellings.
    EOWNDWLP(C) = OWNDWEPQ(CQ) + EMRTPNOP(C)

      EMRTPNOP(C)--Mortgage principal paid, owned home.
      EMRTPNOP(C) = 830201, 830203, 880120

    EOTHRLODP(C)--Outlays on other lodging.

EOTHRLODP(C) = OTHLODPQ(CQ), EMRTPNVP(C)

EMRTPNVP(C)--Mortgage principal paid, owned vacation home.
EMRTPNVP(C) = 830202, 830204, 880320

TRANSPORTATION OUTLAYS:

ETRANPTP(C)--Total transportation outlays.
ETRANPTP(C) = EVEHPURP(C) + GASMOPQ(CQ) + MAINRPPQ(CQ) + VEHINSPQ(CQ) +
              VRNTLOPQ(CQ) + PUBTRAPQ(CQ)

EVEHPURP(C)--Outlays on purchased vehicles.
EVEHPURP(C) = ECARTKNP(C) + ECARTKUP(C) + EOTHVEHP(C)

ECARTKNP(C)--Outlays on new car or truck.
ECARTKNP(C) = 870101, 870102, 870103, 870104

ECARTKUP(C)--Outlays on used car or truck.
ECARTKUP(C) = 870201, 870202, 870203, 870204

EOTHVEHP(C)--Outlays on other vehicles.
EOTHVEHP(C) = 870301, 870302, 870303, 870304

ENTERTAINMENT OUTLAYS:

EENTRMTP(C)--Total entertainment outlays including sporting events, movies, and recreational vehicle
             rentals.
EENTRMTP(C) = FEEADMPQ(CQ), TVRDIOPQ(CQ), PETTOYPQ(CQ), EOTHENTP(C)

EOTHENTP(C)—Miscellaneous entertainment outlays including photographic and sports
            equipment, and boat and RV payments and rentals
EOTHENTP(C) = ENOMOTRP(C) + EMOTRVHP(C) + EENTMSCP(C)

ENOMOTRP(C)--Outlays for non-motored recreational vehicles
ENOMOTRP(C) = 870401, 870402, 870403, 870404, 870501, 870502, 870503, 870504

EMOTRVHP(C)--Outlays for motored recreational vehicles
EMOTRVHP(C) = 870605, 870606, 870607, 870608, 870701, 870702, 870703, 870704,
             870801, 870802, 870803, 870804

EENTMSCP(C)--Miscellaneous entertainment outlays including photographic and sports
             equipment, and boat and RV rentals.
EENTMSCP(C) = 520901, 520904, 520907, 600110, 600210, 600310, 600410, 600420,
             600430, 600901, 600902, 610210, 610230, 620320, 620330, 620905,
             620906, 620908, 620909, 620919, 620921, 620922

MISCELLANEOUS OUTLAYS:

EMISCELP(C)--Miscellaneous outlays including reduction of mortgage principal (lump sum home equity
                loan) on other property.
EMISCELP(C) = MISCPQ(CQ) + EMISCMTP(C)

        EMISCMTP(C)--Mortgage principal outlays for other property.
        EMISCMTP(C) = 790920, 790940, 880220

*Please note that the absolute value of COST is used for the associated UCCs for variables **EMRTPNOP
/ EMRTPNOC, EMRTPNVP / EMRTPNVC, and EMISCMTP / EMISCMTC**. The MTAB UCCs used to
construct these variables take on negative values.*

B. MEMB File

There are no changes to the MEMB file for the 2000 release.

C. MTAB File

1. UCC Deletions

Starting in 2000Q1, The MTAB file will no longer contain the following UCCs.

790820   MORT HELD AFTER SALE OTH PROP
820201   PRIN AMT TRUST HELD OWND
820202   PRIN AMT TRUST HELD OWNV

MTAB PUBFLAG Changes

a. The following are MTAB Pub_Flag value changes **beginning in Q20001.**

UCC	New PUBFLAG value
320512	2
360120	2
360340	2
360901	2
370311	2
380311	2
380902	2
410120	2
410140	2
620310	2
610120	2
620320	2

D. EXPN Files

1. OPD file

a. Variable Deletions

Beginning in 2000Q1, the following variables will no longer be recorded. The positions for these deleted variables will be left blank.

Variable name	Start position	Format
TRUSTX	48	NUM(8)
TRUSTX_	56	CHAR(1)

2. RNT File

a. Survey Source Changes

Beginning in 2000Q1, the following source changes to the RNT file takes effect.

Variable name	New source
RTASPAY	S02A/B 4a/3a
RTCOMPX	S02A/B 4b/3b
RTCMPPD	S02A/B 4c/3c

III. FILE INFORMATION

The microdata on CD-ROM are provided as SAS data sets or ASCII text files. The 2000 Interview release contains four groups of Interview data files (FMLY, MEMB, MTAB, and ITAB), 48 EXPN files, and five processing files. The FMLY, MEMB, MTAB, and ITAB files are organized by the calendar quarter of the year in which the data were collected. (See Section V.A.1.b. CALENDAR PERIOD VERSUS COLLECTION PERIOD for a description of calendar and collection years.) There are five quarterly data sets for each of these files, running from the first quarter of 2000 through the first quarter of 2001. The FMLY files contain CU characteristics, income, and summary level expenditures; the MEMB files contain member characteristics and income data; the MTAB files contain expenditures organized on a monthly basis at the UCC level; and the ITAB files contain income data converted to a monthly time frame and assigned to UCCs. Each of the 48 EXPN files contains five quarters of data. The EXPN files contain data directly derived from their respective questionnaire sections.

The five processing files enhance computer processing and tabulation of data, and provide descriptive information on item codes. The five processing files are: a sample table aggregation file (AGGI), a sample table label file (LABELI), a Universal Classification Codes file (UCCI), a vehicle make and model file (VEHI), and a file (SAMPLI) containing the sample program (See Section VII. A. SAMPLE PROGRAM). The processing files are further explained in Section III.F.6. PROCESSING FILES.

Since space in this documentation prohibits the explanation of all information in the EXPN files, we strongly suggest the user refer to the questionnaire. A list of the 48 EXPN file names and the sections of the questionnaire to which they relate follows.

APL Section 1, Part C	General Survey Information - Major Household Appliances
RNT Section 2, Parts A and B	Rented Living Quarters - CU Tenure, Rental Payments, Facilities, and Services for Sample Unit and Other Units
OPB Section 3, Part B	Owned Living Quarters and Other Owned Real Estate - Detailed Property Description
OPD Section 3, Part D	Owned Living Quarters and Other Owned Real Estate - Disposed of Property
MOR Section 3, Part F	Owned Living Quarters and Other Owned Real Estate - Mortgages
HEL Section 3, Part G	Owned Living Quarters and Other Owned Real Estate - Lump Sum Home Equity Loans
OPH Section 3, Part H	Owned Living Quarters and Other Owned Real Estate - Line of Credit Home Equity Loans
OPI Section 3, Part I	Owned Living Quarters and Other Owned Real Estate - Ownership Costs
UTA Section 4, Part A	Utilities and Fuels for Owned and Rented Properties - Telephone Expenses
UTB Section 4, Part B	Utilities and Fuels for Owned and Rented Properties - Screening Questions
UTC Section 4, Part C	Utilities and Fuels for Owned and Rented Properties - Detailed Questions
CRA Section 5, Part A	Construction, Repairs, Alterations, and Maintenance of Owned and Rented Property - Screening Questions
CRB Section 5, Part B	Construction, Repairs, Alterations, and Maintenance of Owned and Rented Property - Job Description

APA Section 6, Part A Appliances, Household Equipment, and Other Selected Items - Purchase of Household Appliances

APB Section 6, Part B Appliances, Household Equipment and Other Selected Items - Purchase of Household Appliances and Other Selected Items

EQB Section 7, Part B Household Equipment Repairs, Service Contracts, and Furniture Repair and Reupholstering - Household Equipment Repairs and Service Contracts

EQD Section 7, Part D Household Equipment Repairs, Service Contracts, and Furniture Repair and Reupholstering - Furniture Repair or Reupholstering

FRA Section 8, Part A Home Furnishings and Related Household Items - Purchases

FRB Section 8, Part B Home Furnishings and Related Household Items - Rental or Leasing of Furniture

CLA Section 9, Part A Clothing and Sewing Materials - Clothing

CLB Section 9, Part B Clothing and Sewing Materials - Infants Clothing, Watches, Jewelry, and Hairpieces

CLC Section 9, Part C Clothing and Sewing Materials - Sewing Materials

CLD Section 9, Part D Clothing and Sewing Materials - Clothing Services

RTV Section 10, Part A.1 Rented and Leased Vehicles - Screening Questions

LSD Section 10, Part B Rented and Leased Vehicles - Detailed Questions for Leased Vehicles

OVB Section 11, Part B Owned Vehicles - Detailed Questions

OVC Section 11, Part C Owned Vehicles - Disposed of Vehicles

VEQ Section 12, Part A Vehicle Operating Expenses - Vehicle Maintenance and Repair, Parts, and Equipment

VLR Section 12, Part B Vehicle Operating Expenses - Licensing, Registration, and Inspection of Vehicles

VOT Section 12, Part C Vehicle Operating Expenses - Other Vehicle Operating Expenses

INB Section 13, Part B Insurance Other Than Health - Detailed Questions

IHB Section 14, Part B Hospitalization and Health Insurance - Detailed Questions

IHC Section 14, Part C Hospitalization and Health Insurance - Medicare, Medicaid and Other Health Insurance Plans Not Directly Paid For By The CU

MDB Section 15, Part B Medical and Health Expenditures - Payments For Medical Expenses

MDC Section 15, Part C Medical and Health Expenditures - Reimbursements For Medical Expenses

EDA Section 16 Educational Expenses

SUB Section 17, Part A Subscriptions, Memberships, Books, and Entertainment Expenses -

Subscriptions and Memberships

ENT Section 17, Part B   Subscriptions, Memberships, Books, and Entertainment Expenses - Books and Entertainment Expenses

TRV Section 18,
  Parts B and C   Trips and Vacations - Trips Paid Entirely by CU and Partially Reimbursed Trips

TRD Section 18, Part D   Trips and Vacations - 100% Reimbursed Trips

TRE Section 18, Part E   Trips and Vacations - Trip Expenses for Non-CU Members

TRF Section 18, Part F   Trips and Vacations - Local Overnight Stays

MIS Section 19   Miscellaneous Expenses

XPA Section 20, Part A   Expense Patterns For Food, Beverages, and Other Selected Items - Food and Beverages

XPB Section 20, Part B   Expense Patterns For Food, Beverages, and Other Selected Items - Selected Services and Goods

FN2 Section 21, Part A.1   Credit Liability - Credit Balances - Second Quarter Only

FNA Section 21, Part A.2   Credit Liability - Credit Balances - Fifth Quarter Only

FNB Section 21, Part B   Credit Liability - Finance Charges - Fifth Quarter Only

Note that the variable NEWID, the CU's identification number, is the common variable among files by which matching is done.

A. DATA SET NAMES

The file naming convention on the ASCII CD-ROM is as follows.
("X" references the designated drive letter for your CD.)

X:\INTRVW00\FMLYI001x.TXT (Interview FMLY file for first quarter, 2000)
X:\INTRVW00\MEMBI001x.TXT (Interview MEMB file for first quarter, 2000)
X:\INTRVW00\MTABI001x.TXT (Interview MTAB file for first quarter, 2000)
X:\INTRVW00\ITABI001x.TXT (Interview ITAB file for first quarter, 2000)

C. DATA FLAGS

Data fields on the FMLY, MEMB, and EXPN files are explained by flag variables following the data field. The names of the flag variables are derived from the names of the data fields they reference. In general the rule is to add an underscore to the last position of the data field name, for example, SALARYX becomes SALARYX_. However, if the data field name is eight characters in length, then the fifth position is replaced with an underscore; thus WELFAREX becomes WELF_REX. If the fifth position is already an underscore, then the fifth position is changed to a zero, so that EDUC_REF becomes EDUC0REF.

The flag values are defined as follows:

A flag value of "A" indicates a valid blank; that is, a blank field where a response is not anticipated.

A flag value of "B" indicates a blank resulting from an invalid nonresponse; that is, a nonresponse that is not consistent with other data reported by the CU.

A flag value of "C" refers to a blank resulting from a "don't know", refusal, or other type of nonresponse.

A flag value of "D" indicates that the data field contains a valid or good data value.

A flag value of "T" indicates topcoding has been applied to the data field.

A flag value of "H" identifies an expenditure that has been allocated to other records with the original expenditure being overwritten with a blank. (EXPN records only).

A flag value of "R" for recode has been created for the variable STATE_. Some Primary Sampling Units (PSUs) in some states are given "false" STATE codes for nondisclosure reasons. CUs with STATE_='R' (for recode) indicate that not all CUs with that particular STATE code are from that state. See Section IV.A. CU CHARACTERISTICS AND INCOME FILE (FMLY) on topcoding of CU characteristics and income for more detail.

D. FILE NOTATION

Every record from each data file includes the variable NEWID, the CU's unique identification number, which is used to link records of one CU from several files across all quarters in which they participate.

Data fields for variables on the microdata files have either numeric or character values. The format column in the detailed variable descriptions (Section III.F. DETAILED VARIABLE DESCRIPTIONS)

distinguishes whether a variable is numeric (NUM) or character (CHAR) and shows the number of field positions the variable occupies. Variables that include decimal points are formatted as NUM(t,r) where t is the total number of positions occupied, and r is the number of places to the right of the decimal.

In addition to format, these detailed listings give an item description, questionnaire source, identification of codes where applicable, and start position for each variable. The questionnaire source, which identifies where the data for that variable is collected on the questionnaire, is listed beneath the variable description and is formatted "S03B 2b", which denotes Section 3, Part B, Question 2b of the questionnaire.

A star (*) is shown in front of new variables, those which have changed in format or definition, and those which have been deleted. Variables whose format has expanded are moved to the end of the files, and their original positions are left blank. New variables are added to the end of the files after variables whose format has changed. The positions of deleted variables are left blank.

Some variables require special notation. The following notation is used throughout the documentation for all files:

*D(Yxxq) identifies a variable that is deleted as of the quarterly file indicated. The year and quarter are identified by the 'xx' and 'q' respectively. For example, the notation *D(Y003) indicates the variable is deleted starting with the data file of the third quarter of 2000.

*N(Yxxq) identifies a variable that is added as of the quarterly file indicated. The year and quarter are identified by the 'xx' and 'q' for new variables in the same way as for deleted variables.

*L indicates that the variable can contain negative values.

E. ALLOCATION AND RECORD ORIGIN (EXPN)

Expenditures on the EXPN files that have been allocated can be identified through their flag variable, which will have a value, set to 'H' (see Section III.C. DATA FLAGS). These expenditures can be recreated using the fields SEQNO and ALCNO. SEQNO is a counter assigned to make records unique. ALCNO is zero for all original expenditure records. If ALCNO is greater than zero, the corresponding expenditure record is the result of allocation of an original record whose expenditure field has been replaced with a blank for that CU. By summing expenditures for records with ALCNO greater than zero and the same SEQNO as the original record, one can arrive at the value which was allocated.

The codes for the variable REC_ORIG, which are common to every EXPN file record, can be interpreted as follows:

CODED
1   Data reported in the current quarter's interview.

2   Data reported in the previous quarter's interview that are encompassed by the current reference period. These data are brought forward through the reference period adjustment process.

3   Data reported in the previous quarter's interview that are encompassed by the current reference period, and this logical record duplicates a logical record from the current interview month. These data are brought forward through the reference period adjustment process; the data duplication is also identified during this process.

4   Inventory data reported in previous quarters' interviews brought forward through the inventory update process. No updates are applied to this logical record as none are indicated in the current inventory chart.

5   Inventory data reported in previous quarters' interviews brought forward through the inventory update process. Updates are applied based upon data contained in the current inventory chart.

6   Data created by the processing system.

F. DETAILED VARIABLE DESCRIPTIONS

1. *CONSUMER UNIT (CU) CHARACTERISTICS AND INCOME FILE (FMLY)*

The "FMLY" file, also referred to as the "Consumer Unit Characteristics and Income" file, contains CU characteristics, CU income, and characteristics and earnings of the reference person and of the spouse. The file includes weights needed to calculate population estimates and variances. (See Sections V. ESTIMATION PROCEDURES and VI. RELIABILITY STATEMENT.)

Summary expenditure variables in this file can be combined to derive quarterly estimates for broad consumption categories. Demographic characteristics, such as family size, refer to the CU status on the date of the interview. Demographic characteristic information may change between interviews if, for example, a member enters or leaves the CU. Income variables contain annual values. Income data are collected in the second and fifth interviews only and cover the 12 months prior to the date of interview. Income data collected in the second interview are copied to the third and fourth interviews. Income data are updated only if a CU member over 13 is new to the CU or has not worked in previous interviews and has now started working. When there is a valid nonresponse, or where nonresponse occurs and there is no imputation, there will be missing values. The type of nonresponse is explained by associated data flag variables described in Section III.C. DATA FLAGS.

a. *CU AND INTERVIEW IDENTIFIERS*

VARIABLE	ITEM DESCRIPTION	START POSITION	FORMAT
NEWID	CU identification number. Digits 1-7 (CU sequence number, 1 through 9999999) uniquely identify the CU. Digit 8 is the interview number, 2 through 5.	1	NUM(8)
	It is possible for a CU to skip an interview. For example, a CU could have a 2nd, 3rd and 5th interview but no 4th interview.		
	BLS derived		
HH_CU_Q	Count of CUs in household	3269	NUM(2)
	BLS derived

SUMMARY EXPENDITURE DATA

Main Summary Level Expenditure Variables

For each summary expenditure category listed below there are two variables. They apportion expenditures reported for the three-month reference period of the interview to the calendar quarters, relative to the month of interview, in which the expenditures occurred. The first variable contains expenditures made by the CU in the calendar quarter previous to the month of interview. These "previous quarter" expenditure variables are identified by "PQ" placed as the last two letters of the variable name. The second variable contains expenditures made in the calendar quarter of the month of interview (last 2 letters of the variable name 'CQ'). So if CUs were interviewed in May (when they reported their February, March, and April expenditures), the "PQ" variable would contain their February and March expenditures since the previous calendar quarter to a May interview is from January to March. The "CQ" variable for these CUs would contain only their April expenditures. The variables are set up this way to facilitate analysis by calendar time period. For example, to calculate an expenditure category mean for a given calendar quarter, expenditures from the "CQ" variable for interviews conducted during the quarter of interest are added to amounts from the "PQ" variable for interviews conducted during the subsequent quarter prior to dividing by the number of observations. To derive expenditure statistics by collection period, i.e., for interviews conducted during a specific period, it is necessary to obtain all expenditures reported during each interview by summing the "PQ" and "CQ" variables of the desired expenditure category. See Section V.A.1.b. CALENDAR PERIOD VERSUS COLLECTION PERIOD for a detailed explanation of calendar and collection periods.

All of the following summary level variables are BLS derived. The composition of each summary expenditure variable is given below the variable description. An underlined UCC represents either a new UCC or a deleted UCC. Please note that new UCCs may not be represented in all quarters. The quarter in which the addition (deletion) to the summary expenditure variable occurs is denoted by a leading superscript directly prior to the UCC code. For example, ^{N001}<UCC> or ^{D001}<UCC> identifies an addition or deletion of a given UCC to the summary expenditure variable beginning in Q001.

PLEASE NOTE THE FOLLOWING:

During the CU's fifth interview, respondents are asked to provide annual (not quarterly) expenditure amounts for cash contributions, occupational expenses, and finance charges (excluding auto loans and home mortgages) in the questionnaire's annual supplement. These data are mapped to a quarterly time frame and are assigned to UCCs 710110, 800801, 800810, 800820, 800830, 800840, 800850, 800860, and 900001. There are no values for these UCCs for CUs in their second through fourth interviews. These UCCs are components of CASHCOPQ(CQ) (800801 800810 800820 800830 800840 800850 800860) and MISC2PQ(CQ) (710110 900001).

CASHCOPQ(CQ) requires some modification depending on the type of analysis performed. If the intent is to analyze the behavior of cash giving, only fifth interview families should be selected for the analysis. If population or sample estimates such as expenditure means are desired, CASHCOPQ(CQ) needs to be multiplied by 4 to approximate values for those CUs that are not in their fifth interview.

MISC2PQ(CQ) contains UCCs that are a subset of those included in MISCPQ(CQ) – miscellaneous expenditures. Component UCCs in MISCPQ(CQ) have been separated according to collection method. UCCs for which the values are obtained from questions asked in interviews 2 through 5 are now in MISC1PQ(CQ), while MISC2PQ(CQ) contains those UCCs from questions asked only in the fifth interview. To obtain population or sample estimates, the summary variable MISCX4PQ(CQ) has been created. It is comprised of MISC1PQ(CQ) expenditures and MISC2PQ(CQ) expenditures that have been multiplied by four, in order to account for families not in their fifth interviews. Similarly, TOTEX4PQ(CQ) reflects the adjustments for "non-fifth interview" families in MISC2PQ(CQ) and CASHCOPQ(CQ). Please be aware that MISCX4CQ(PQ) and TOTEX4PQ(CQ) overestimate the values of CASHCOPQ(CQ) and MISC2PQ(CQ) for "fifth interview" CUs and should only be used for population estimates.

Travel related summary expenditure variables

The following summary level "travel" expenditure variables (T-variables) describe expenditures by consumer units on out-of-town trips. These variables have been constructed to facilitate research on travel related spending. Because the UCCs describing these items are scattered across several categories, they are collected in one format for the convenience of the user. As is the convention with the main summary level expenditure variables above, each of the T-variable categories are sorted by expenditures that took place during the previous calendar quarter and current calendar quarter. However for the T-variables, the previous quarter expenditure variables are appended with "P" and the current quarter expenditure variables are appended with "C".

VARIABLE	ITEM DESCRIPTION	START POSITION	FORMAT
TTOTALP	Total of all trip expenditures last quarter (TFOODTOP+TALCBEVP+TOTHRLOP+TTRANPRP+ TENTRMNP)	3462	NUM(10,3)

TOTHENTC	Trip expenditures on recreational vehicle rentals this quarter including campers, boats, and other vehicles same UCCs as above	3852	NUM(10,3)

The following variables include expenditures related to vacation homes. Because these types of expenditures are not directly related to travel, they are not included in TOTALP(C) and hence the names of these variables do not start with a "T". While principal and interest payments for owned vacation homes are included in the variables below, please be aware that rent paid for vacation homes is included in TOTHRLOP(C).

VARIABLE	ITEM DESCRIPTION	START POSITION	FORMAT

Expenditure Outlays Summary Variables

Expenditure outlay summary level variables (EVARS) are used to provide a measurement of all expenditure outlays.   These variables are constructed similarly to the main summary level expenditure variables in that they contain interest payments for home mortgage and vehicles when financed. The difference with with the EVARS are that they also include payments on principle for home mortgages and vehicles.   Note: main summary level expenditure variables are components of the higher aggregated EVARS. The EVARS follow the same naming convention as the main summary level expenditure variables. Expenditures within the collection quarter are sorted by whether they occurred in the previous calendar quarter or in the current calendar quarter. As in the Travel related summary variables, the EVARS are appended with a "P" for previous or "C" for current.

VARIABLE	ITEM DESCRIPTION	START POSITION	FORMAT

2. *MEMBER CHARACTERISTICS AND INCOME (MEMB) FILE*

The "MEMB" file, also referred to as the "Member Characteristics and Income" file, contains selected characteristics for each CU member, including identification of relationship to reference person. Characteristics for the reference person and spouse appear on both the MEMB file and FMLY file.

Demographic characteristic data, such as age of CU member, refer to the member status on the date of the interview. Characteristic information may change between interviews. Income data are collected in the second and fifth interviews for all CU members over 13 years of age and in the third and fourth interviews for members over 13 who are new to the CU or who previously reported not working and are now working. Member income data from the second interview are carried over to the third and fourth interviews subject to the above conditions. Income variables contain annual values for the 12 months prior to the interview month. Income taxes withheld and pension and retirement contributions are shown both annually and as deductions from the member's last paycheck. When there is a valid nonresponse, or where nonresponse occurs and there is no imputation, there will be missing values. The type of nonresponse is explained by associated data flag variables described in Section III.C. DATA FLAGS.

a. *CU AND MEMBER IDENTIFIERS*

VARIABLE	ITEM DESCRIPTION	START POSITION	FORMAT
NEWID	CU identification number. Digits 1-7 (CU sequence number, 1 through 9999999) uniquely identify the CU. Digit 8 is the interview number, 2 through 5. It is possible for a CU to skip an interview. For example, a CU could have a 2nd, 3rd and 5th interview but no 4th interview. BLS derived	1	NUM(8)

3. *MONTHLY EXPENDITURES (MTAB) FILE*

In the MTAB file, each expenditure reported by a CU is identified by UCC, gift/nongift status, and month in which the expenditure occurred. UCCs are six digit codes that identify items or groups of items. (See Section XIII.A for a listing of UCCs.) The expenditure data record purchases that were made during the three month period prior to the month of the interview. There may be more than one record for a UCC in a single month if that is what was reported to the interviewer. There are no missing values in this file. If no expenditure was reported for the item(s) represented by a UCC, then there is no record for the UCC on the file.

The following UCCs are from questions asked only in the 2nd or 5th interviews.

      006001   Total amount owed to creditors (2nd interview)
      006002   Total amount owed to creditors (5th interview)
      710110   Finance charges, excluding mortgage and vehicles (5th interview)

NOTE: To be used at the macro level, the above UCCs need to be multiplied by 4 in order to account for those CUs that are not asked these questions.

VARIABLE	ITEM DESCRIPTION	START POSITION	FORMAT
NEWID	CU identification number. Digits 1-7 (CU sequence number, 1 through 9999999) uniquely identify the CU. Digit 8 is the interview number, 2 through 5. It is possible for a CU to skip an interview. For example, a CU could have a 2nd, 3rd and 5th interview but no 4th interview. BLS derived	1	NUM(8)
UCC	Universal Classification Code See Section XIII.A. for a listing of MTAB UCC codes and titles. BLS derived	9	CHAR(6)

		BLS derived		

4. *INCOME (ITAB) FILE*

The "ITAB" file, also referred to as the "Income" file, contains CU characteristics and income data. This file is created directly from the FMLY file and contains the same annual and point-of-interview data in a monthly format. It was created to facilitate computer processing when linking CU income and characteristics data with MTAB expenditure data. As such, the file structure is similar to MTAB. Each characteristic and income item is identified by UCC (See Section XIII.B. for a listing of UCCs), gift/nongift status, and month. There are no records with missing values in ITAB. If the corresponding FMLY file variable contained a missing value, there is no record for the UCC.

The following UCCs are from questions asked only in the 5th interview. Therefore, there will be no values for these UCCs for CUs in their 2nd through 4th interviews. They have been multiplied by 4 because these data are used as estimated values for those CUs not asked the questions in that particular quarter. Therefore, to be used at the micro level they should be divided by 4. For example, if a CU reports $50,000 for cash contributions for support to persons not in the CU for the past 12 months, the amount of (($50,000*4)/12 = $16666.67) is entered as the cost for each of the 3 months of the quarter for UCC 800801. It is multiplied by 4 because only one-fourth of all CUs interviewed in a quarter are asked this question (those in the fifth interview) and it is divided by 12 to make it a monthly figure. To obtain the annual value for the CU, sum the cost for the 3 months, for the following UCCs:

001000	800810
001010	800820
001210	800830
001220	800840
002010	800850
002020	800860
002030	900001
003000	920010
003100	920020
800801	920030
800802	920040

UCCs, 800801, 800810-800860, and 900001 are used to calculate total expenditures in CE publications. These UCCs are not included when calculating total expenditures for creating the FMLY variable ERANKMTH, which is used for expenditure ranking, because including these UCCs would increase total expenditures of only CUs asked these questions, resulting in misleading rankings. For the summary variables in the FMLY file, these UCCs were included, but not multiplied by 4.

VARIABLE	ITEM DESCRIPTION	START POSITION	FORMAT
NEWID	CU identification number. Digits 1-7 (CU sequence number, 1 through 9999999) uniquely identify the CU. Digit 8 is the interview number, 2 through 5. 5. *DETAILED EXPENDITURES (EXPN) FILES*

a. *SECTION 1 GENERAL SURVEY INFORMATION (APL)*

<u>PART C Major Household Appliances - For New Consumer Units Only</u>

VARIABLE	ITEM DESCRIPTION	START POSITION	FORMAT

QYEAR	Quarter and year of the interview, for use in matching to the other files
	CODED
	  20001 2000, 1st quarter
	  20002 2000, 2nd quarter
	  20003 2000, 3rd quarter
	  20004 2000, 4th quarter
	  20011 2001, 1st quarter
	
	BLS derived
		1	CHAR(5)

NEWID	CU identification number. Digits 1-7 (CU sequence number, 1 through 9999999) uniquely identify the CU. Digit 8 is the interview number, 2 through 5. It is possible for a CU to skip an interview. For example, a CU could have a 2nd, 3rd and 5th interview but no 4th interview. BLS derived	6	NUM(8)
SEQNO	Sequence number, uniquely identifies each EXPN record based on order of entries on survey questionnaire BLS derived	14	NUM(3)
ALCNO	Allocation number, field in common to all rows. Identifies rows that are the result of allocation. If ALCNO is greater than zero then the observation is a result of allocation. ALCNO can be used in conjunction with SEQNO to derive a value which has been allocated and written over with the flag H (see the notes under "ALLOCATION AND RECORD ORIGIN" for instructions). BLS derived	17	NUM(3)
REC_ORIG	Describes the origin of the record, field in common to all records (see "ALLOCATION AND RECORD ORIGIN" for the codes and their descriptions). CENSUS derived	20	CHAR(1)

This file contains an inventory of major household appliances belonging to the CU. These questions are asked at the first interview and the information is carried forward to subsequent interviews through the inventory update process. Note that the title of this section on the questionnaire each user has received indicates it is asked "For New Consumer Units Only". This is because this questionnaire is used for the second through fifth interviews. The section would only be completed if a new CU had moved to the sample address, replacing an old CU that had previously participated.

6. _PROCESSING FILES_

a. _AGGregation file_

X:\INTRVW00\AGGI00.TXT

The AGG file shows which UCC/Gift code combinations go into each category listed in the sample table produced by the microdata file verification and estimation program (see Section VII.A. SAMPLE PROGRAM). It designates each category with a unique 6-digit line number. It is formatted as follows:

DESCRIPTION	START POSITION	FORMAT
UCC (Universal Classification Code)	3	CHAR(6)

Gift
    CODED
      1 Yes
      2 No
	10	CHAR(1)

Line Number: represents a line in the sample table	15	CHAR(6)

b. _LABel file_

      X:\INTRVW00\LABELI00.TXT

The LAB file assigns an identification label to each AGG file line number. It is formatted as follows:

DESCRIPTION	START POSITION	FORMAT
Line Number: represents a line in the sample table	1	CHAR(6)
Label: descriptive label in the sample table (with leading blanks)	8	CHAR(73)

c. _UCC file_

      X:\INTRVW00\UCCI00.TXT

The UCC file contains UCCs and their abbreviated titles, identifying the expenditure, income, or demographic item represented by each UCC. It is formatted as follows:

DESCRIPTION	START POSITION	FORMAT
UCC	1	CHAR(6)
UCC title	8	CHAR(50)

      (See Section XIII.A. EXPENDITURE UCCS ON MTAB FILE and XIII.B.
      INCOME AND RELATED UCCS ON ITAB FILE for a list of UCCs and
      their full titles by file—expenditure (MTAB) or income (ITAB).)

d. _VEHicle file_

      X:\INTRVW00\VEHI00.TXT

The VEH file contains vehicle make and model codes created by the Bureau of the Census. These codes can be found under the variables MODEL in EXPN Section 10, Part B (Rented and Leased Vehicles – Detailed Questions for Leased Vehicles) and MKMDLY in EXPN Section 11, Part B (Owned Vehicles - Detailed Questions). The file is formatted as follows:

DESCRIPTION	START POSITION	FORMAT
Make/model code	1	CHAR(4)
Make and model	6	CHAR(69)

e. _**SAMPLe program file**_

      X:\PROGRAMS\SAMPLI00.TXT (SAS)

The SAMPLI00 file contains the computer program used in Section VII.A. SAMPLE PROGRAM of the documentation. This file has been created to provide programming assistance.

IV. TOPCODING AND OTHER NONDISCLOSURE REQUIREMENTS

      Sensitive CU data are changed so that users will not be able to identify CUs who participated in the survey. Topcoding refers to the replacement of data in cases where the value of the original data exceeds prescribed critical values. Critical values for each variable containing sensitive data are calculated in accordance with Census Disclosure Review Board guidelines. Each observation that falls outside the critical value is replaced with a topcoded value that represents the mean of the subset of all outlying observations. All five quarters of data in the CE microdata release are used when calculating the critical value and topcode amounts. If an observation is topcoded, the flag variable assigned to that observation is set to 'T'.

      Since the critical value and mean of the set of values outside the critical value may differ with each annual (five-quarter) release, the topcode values may change annually and be applied at a different starting point. By topcoding values in this manner, the first moment will be preserved for each five-quarter data release when using the total sample. This, however, will not be the case when means are estimated by characteristic, because topcode values are not calculated by characteristic.

A. CU CHARACTERISTICS AND INCOME FILE (FMLY)

The following FMLY file variables are subject to topcoding.

AGE_REF	Age of reference person
AGE2	Age of spouse
ALIOTHX	Amount received from other regular contributions including alimony
BSINVSTX	Amount of investment in own farm or business
CHDLMPX	Amount received from lump sum child support payment
CHDOTHX	Amount received from other child support payments
CKBKACTX	Amount in checking, brokerage and other similar accounts
COMPBNDX	Difference in amount held in U.S. Savings bonds
COMPCKGX	Difference in amount held in checking accounts
COMPOWDX	Difference in amount of money owed to CU
COMPSAVX	Difference in amount held in savings accounts
COMPSECX	Difference in estimated market value of all stocks, bonds, or mutual funds including broker fees
FEDRFNDX	Amount of refund received from Federal income tax
FEDTAXX	Amount of Federal income tax paid in addition to that withheld
FININCX	Amount received from regular income from dividends, royalties, estates or trusts
INCLOSSA	Amount of net income or loss received from roomers or boarders
INCLOSSB	Amount of net income or loss received from other rental units
INSRFNDX	Amount of refund received from insurance policies
INTEARNX	Amount received from interest on savings accounts or bonds
LUMPSUMX	Amount received from lump sum receipts
MISCTAXX	Amount of other taxes paid but not reported elsewhere
MONYOWDX	Amount of money owed to CU by persons outside CU
OCCEXPNX	Amount of occupational expenses

OTHRFNDX	Amount of refund received from other sources				
OTHRINCX	Amount received from other money income				
PENSIONX	Amount received from pensions or annuities				
PTAXRFDX	Amount of refund received from property taxes				
PURSSECX	Purchase price of stocks, bonds, or mutual funds				
RENTEQVX	Rental equivalence of owned home				
SALEINCX	Amount received from sale of household furnishings, equipment				
SAVACCTX	Amount in savings accounts				
SECESTX	Estimated market value of all stocks, bonds, mutual funds				
SELLSECX	Net amount received from sales of stocks, bonds, mutual funds				
SETLINSX	Amount received from settlement on surrender of any insurance policies				
SLOCTAXX	Amount of state and local income tax paid in addition to that withheld				
SLRFUNDX	Amount of refund received from state and local income taxes				
SSOVERPX	Amount of refund received from overpayment on Social Security				
TAXPROPX	Amount of personal property taxes paid				
USBNDX	Amount in U.S. Savings bonds				
WDBSASTX	Amount of assets withdrawn from own farm or business				
WDBSGDSX	Amount of goods or services withdrawn from own farm or business				

The critical values and topcode values associated with the above variables follow.

Variable	Critical value +	Critical value -	Topcode value +	Topcode value -	Condition
AGE_REF	90	-	94	-	-
AGE2	90	-	93	-	-
ALIOTHX	45,000	-	66,340	-	-
BSINVSTX	85,000	-	252,667	-	-
CHDLMPX	8,600	-	13,183	-	-
CHDOTHX	14,400	-	21,765	-	-
CKBKACTX	25,000	-	210,061	-	-

Some income variables that are subject to topcoding are constructed by summing up the values of "lower level" MEMB or FMLY file component variables. These variables are not topcoded by the conventional method of replacement with a topcode value. Instead the variables' components are summed normally and the variables are flagged as topcoded if one of their component variables is topcoded. Following are the income variables that are calculated using values of their component variables. (See the descriptions of each variable in Sections III.F.1.e. INCOME - III.F.1.h. RETIREMENT AND PENSION DEDUCTIONS for a list of component variables.)

EARNINCX	Amount of CU income from earnings before taxes
FAMTFEDX	Amount of Federal income tax deducted from last pay, annualized for all CU members
FFRMINCX	Amount of income or loss received from own farm
FGOVRETX	Amount of government retirement deducted from last pay, annualized for all CU members
FINCATAX	Amount of CU income after taxes
FINCBTAX	Amount of CU income before taxes
FINDRETX	Amount of money placed in individual retirement plan
FJSSDEDX	Estimated amount of annual Social Security contribution
FNONFRMX	Amount of income or loss received from nonfarm business
FPRIPENX	Amount of private pension fund deducted from last pay, annualized for all CU members
FRRDEDX	Amount of Railroad Retirement deducted from last pay, annualized for all CU members
FSALARYX	Amount received from wage and salary income before deductions
FSLTAXX	Amount of state and local income taxes deducted from last pay, annualized for all CU members
NO_EARNX	Amount of income from sources other than earnings before taxes
NONINCMX	Amount of other money receipts excluded from family income
TOTTXPDX	Amount of personal taxes paid

Here are some examples of situations that may occur. The value for the variable FFRMINCX (Family income or loss from farm) is computed as the sum of the values reported for the variable FARMINCX (member income or loss from farm) from the MEMB file. FARMINCX is subject to topcoding beyond the critical value of $150,000 (-$9,999). The topcode value for FARMINCX is $212,500 (-$32,795). (See Section IV.B. MEMBER CHARACTERISTICS AND INCOME FILE (MEMB)).

| | | FARMINCX | | FFRMINCX | |
| | | | AFTER | | FLAGGED AS |
CU		*REPORTED*	*TOPCODING*	*VALUE*	*TOPCODED?*
CU 1:	MEMB1	$145,000	$145,000		
	MEMB2	145,000	145,000	290,000	No
CU 2:	MEMB1	270,000	212,500		
	MEMB2	20,000	20,000	232,500	Yes
CU 3	MEMB1	170,000	212,500		
	MEMB2	50,000	50,000	262,500	Yes
CU 4	MEMB1	100,000	100,000		
	MEMB2	-11,000	-32,795	67,205	Yes

While CUs 1 and 2 each originally report $290,000 in FARMINCX, topcoding is done only on the value reported by MEMB1 of CU2. Thus, the value for FFRMINCX for CU2 is lower than for CU1 and is flagged as topcoded while CU1 is not. By using the mean of the subset of observations that are above (below) the critical value as the topcode amount, values on the public use data can be either below or above the actual reported value. Note that while CU2 has a topcoded value slightly below the reported value, CU3's topcoded FFRMINCX value ($262,500) is higher than the amount that it reported ($220,000). The case of CU4 demonstrates that the value for FFRMINCX can be much lower than other topcoding situations, yet still be flagged as topcoded. This is due to the presence of a negative value (loss) for FARMINCX reported by MEMB2. The reverse can also occur.

The value of the variable, STATE, which identifies the state of residence, must be suppressed for some observations to meet the Census Disclosure Review Board's criterion that the smallest geographically identifiable area have a population of at least 100,000. STATE data were evaluated vis-à-vis the POPSIZE, REGION, and BLS_URBN variables, which show the population size of the geographic area that is sampled, the four Census regions, and urban/rural status respectively. Some STATE codes were suppressed because, in combination with these variables, they could be used to identify areas of 100,000 or less. On approximately 17 percent of the records on the FMLY files the STATE variable is blank. The STATE flag (STATE_) is given a value of 'T' if STATE is suppressed.

A small proportion of STATE codes are replaced with codes of states other than the state where the CU resides. By re-coding in this manner, suppression of POPSIZE and REGION may be avoided. (In past releases selected observations of POPSIZE and REGION required suppression.) If a CU's state of residence is re-coded with another state's code, the flag variable (STATE_) of the re-coded observation is assigned an 'R'. The flag variable is also assigned an 'R' for either all or a portion of other observations from that state. In total, approximately 4% of observations of STATE_ are assigned an 'R'.

01	Alabama	*28	Mississippi
02	Alaska	**29	Missouri
RR04	Arizona	31	Nebraska
*05	Arkansas	R32	Nevada
**06	California	R33	New Hampshire
08	Colorado	34	New Jersey
09	Connecticut	*35	New Mexico
10	Delaware	RR**36	New York
R11	District of Columbia	**37	North Carolina
**12	Florida	RR39	Ohio

**13	Georgia		**40	Oklahoma
15	Hawaii		**41	Oregon
16	Idaho		42	Pennsylvania
**17	Illinois		45	South Carolina
RR**18	Indiana		*46	South Dakota
*19	Iowa		**47	Tennessee
**20	Kansas		48	Texas
21	Kentucky		49	Utah
22	Louisiana		50	Vermont
R*23	Maine		**51	Virginia
24	Maryland		**53	Washington
25	Massachusetts		R54	West Virginia
**26	Michigan		55	Wisconsin
**27	Minnesota			

* indicates that the STATE code has been suppressed for all sampled CUs in that state (STATE_ = 'T' for all observations).

** indicates that the STATE code has been suppressed for some sampled CUs in that state (STATE_ = 'T' for some observations).

R indicates that either all observations from this state have been re-coded or all strata[1] of observations from this state include "re-codes" from other states.

RR indicates that either some observations from this state have been re-coded or at least one stratum[1] of observations from this state includes "re-codes" from other states.

R* indicates that the STATE code has been suppressed for some sampled CUs in that state and, either STATE has been re-coded or the state includes "re-codes" from other states in all strata[1].

RR** indicates that the STATE code has been suppressed for some sampled CUs in that state and, either STATE has been re-coded or the state includes "re-codes" from other states in at least one stratum[1].

[1] A STATE stratum is a unique POPSIZE and BLS_URBN combination.

States not listed are not in the CE sample.

B. MEMBER CHARACTERISTICS AND INCOME FILE (MEMB)

The following MEMB file variables are subject to topcoding.

AGE	Age of member
AMTFED	Amount of Federal income tax deducted from last pay
ANFEDTX	Annual amount of Federal income tax deducted from pay
ANGOVRTX	Annual amount of government retirement deducted from pay
ANPRVPNX	Annual amount of private pension fund deducted from pay
ANRRDEDX	Annual amount of Railroad Retirement deducted from pay
ANSLTX	Annual amount of state and local income taxes deducted from pay
FARMINCX	Amount of income or loss received from own farm
GOVRETX	Amount of government retirement deducted from last pay
GROSPAYX	Amount of last gross pay
INDRETX	Amount of money placed in individual retirement plan
JSSDEDX	Estimated annual Social Security contribution
NONFARMX	Amount of income or loss received from own nonfarm business
PRIVPENX	Amount of private pension fund deducted from last pay
RRRDEDX	Amount of Railroad Retirement deducted from last pay
SALARYX	Amount received from wage and salary income before deductions
SLFEMPSS	Amount of self-employment Social Security contribution
SLTAXX	Amount of state and local income taxes deducted last pay

The critical values and topcode values associated with the above variables follow.

Variable	Critical value +	Critical value -	Topcode value +	Topcode value -
AGE	90	-	94	-
AMTFED	978	-	2,502	-
ANFEDTX	20,438	-	36,883	-
ANGOVRTX	7,176	-	8,931	-
ANPRVPNX	11,983	-	16,000	-
ANRRDEDX	7,500	-	8,200	-
ANSLTX	6,094	-	11,035	-
FARMINCX	150,000	-9,999	212,500	-32,795
GOVRETX	400	-	1,044	-
GROSPAYX	5,401	-	22,558	-
INDRETX	14,000	-	29,928	-
JSSDEDX	6,435	-	9,005	-
NONFARMX	150,000	-9,999	333,886	-47,811
PRIVPENX	500	-	2,079	-
RRRDEDX	405	-	2,200	-
SALARYX	150,000	-	260,209	-
SLFEMPSS	13,219	-	17,324	-
SLTAXX	300	-	1,001	-

Special suppression for MEMB file variables

The five MEMB file variables--AMTFED, GOVRETX, PRIVPENX, RRRDEDX, and SLTAXX--describe deductions from the most recent pay. These variables are used in conjunction with GROSPAYX (amount of last gross pay) and SALARYX (annual wage and salary income) to derive ANFEDTX, ANGOVRTX, ANPRVPNX, ANRRDEDX, and ANSLTX, which represent the estimated annual deductions for each of these income deduction categories. For example, the estimated annual Federal income tax deduction from pay is calculated as

(1)   ANFEDTX = (SALARYX (AMTFED/GROSPAYX)).

Note that SALARYX can be estimated by using the above terms and rearranging such that

(2)   SALARYX = (ANFEDTX (GROSPAYX/AMTFED)).

In the above example, a problem with disclosure may arise when neither ANFEDTX, GROSPAYX, nor AMTFED are topcoded, *but SALARYX is*. In this situation SALARYX can be recalculated to obtain its original value by inserting the non-topcoded values into equation (2) and solving. In order to prevent this, the non-topcoded terms in equation (2) will be suppressed (blanked out) and their associated flags will be assigned a value of 'T'. The following chart describes in detail the specific rules that are applied to prevent the potential disclosure outlined above.

If SALARYX is greater than the critical value but ANFEDTX, GROSPAYX, and AMTFED are not, then the values for ANFEDTX, GROSPAYX, and AMTFED are suppressed and their flag variables are assigned a value of 'T'.

If SALARYX is greater than the critical value but ANGOVRTX, GROSPAYX, and GOVRETX are not, then the values for ANGOVRTX, GROSPAYX, and GOVRETX are suppressed and their flag variables are assigned a value of 'T'.

If SALARYX is greater than the critical value but ANPRVPNX, GROSPAYX, and PRIVPENX are not, then the values for ANPRVPNX, GROSPAYX, and PRIVPENX are suppressed and their flag variables are assigned a value of 'T'.

If SALARYX is greater than the critical value but ANRRDEDX, GROSPAYX, and RRRDEDX are not, then the values for ANRRDEDX, GROSPAYX, and RRRDEDX are suppressed and their flag variables are assigned a value of 'T'.

If SALARYX is greater than the critical value but ANSLTX, GROSPAYX, and SLTAXX are not, then the values for ANSLTX, GROSPAYX, and SLTAXX are suppressed and their flag variables are assigned a value of 'T'.

C. MONTHLY EXPENDITURE FILE (MTAB)

The MTAB variable COST is subject to topcoding for the following UCCs.

UCC	Description
210110	Rent of dwelling
210210	Lodging away from home
210310	Housing for someone at school
210901	Ground rent, owned home
210902	Ground rent, owned vacation home
550320	Medical equipment for general use
550330	Supportive or convalescent medical equipment
560110	Physicians' services
560210	Dental services
560310	Eye care services
560330	Lab tests and x-rays
560400	Services by professionals other than physicians
570110	Hospital room
570210	Hospital service other than room
570220	Nursing or convalescent home care
570230	Other medical care service
570240	Medical care in retirement community
570901	Rental of medical equipment
570903	Rental of supportive, convalescent equipment
600132	Purchase of boat with motor
600138	Trade-in allowance for boats with motors
790710	Purchase other property excluding commons
790810	Sale price of other property
790910	Special or lump mortgage payment, other property
790920	Reduction of mortgage principal, other property
790930	Original mortgage amount, other property
790940	Reduction of mortgage principal, home equity loan, other property
790950	Original loan amount, home equity loan, other property
800721	Market value of owned home
810101	Purchase excluding commons, owned home
810102	Purchase price excluding commons, owned vacation home
820101	Selling price, owned home
820102	Selling price, owned vacation home
830101	Special or lump mortgage payment, owned home
830102	Special or lump mortgage payment, owned vacation home
830201	Reduction mortgage principal, owned home
830202	Reduction mortgage principal, owned vacation home

UCC	Description
830203	Reduction mortgage principal, home equity loan, owned home
830204	Reduction mortgage principal, home equity loan, owned vacation home
830301	Original mortgage amount, owned home
830302	Original mortgage amount, owned vacation home
830303	Original loan amount, home equity loan, owned home
830304	Original loan amount, home equity loan, owned vacation home
860600	Amount boat with motor sold or reimbursed
870701	Boat with motor, purchase not financed
880120	Reduction of principal, line of credit, owned home
880220	Reduction of principal, line of credit, other property
880320	Reduction of principal, line of credit, owned vacation home
910050	Rental equivalence of owned home
910100	Rental equivalence of vacation home

If the value of COST is greater (less) than the designated critical values for the above UCCs, COST is set to the topcode value and the associated flag variable, COST_, is set to 'T'. The critical values and topcode values (rounded to the nearest dollar) of the variable COST that are associated with the above UCCs follow.

UCC	Critical value +	Critical value -	Topcode value +	Topcode value -	Mapped from	Condition

D. INCOME FILE (ITAB)

Data in the ITAB file are selected annual data from the FMLY file expressed in a monthly form (divided by 12). The ITAB variable VALUE is subject to topcoding for the following UCCs.

UCC	Description
001000	Purchase price of stocks, bonds, or mutual funds
001010	Net amount received from sales of stocks, bonds, mutual funds
001210	Amount of investment in own farm or business
001220	Amount of assets, goods, and services withdrawn from own farm or business
002010	Difference in amount held in savings accounts
002020	Difference in amount held in checking accounts
002030	Difference in amount held in U.S. Savings bonds
003000	Difference in amount of money owed to CU
003100	Amount received from settlement on surrender of any insurance policies
800910	Amount of government retirement deducted from last pay, annualized for all CU members
800920	Amount of Railroad Retirement deducted from last pay, annualized for all CU members
800931	Amount of private pension fund deducted from last pay, annualized for all CU members
900001	Amount of occupational expenses
900040	Amount received from pensions or annuities
900050	Amount received from regular income from dividends, royalties, estates or trusts
900060	Amount of net income or loss received from roomers or boarders
900070	Amount of net income or loss received from other rental units
900080	Amount received from interest on savings accounts or bonds
900131	Amount received from other child support payments
900132	Amount received from other regular contributions including alimony
900140	Amount received from other money income
910000	Amount received from lump sum receipts
910010	Amount received from sale of household furnishings, equipment
910020	Amount of refund received from overpayment on Social Security
910030	Amount of refund received from insurance policies
910040	Amount of refund received from property taxes
910041	Amount received from lump sum child support payment
920010	Amount in savings accounts
920020	Amount in checking, brokerage and other similar accounts
920030	Amount in U.S. Savings bonds
920040	Estimated market value all stocks, bonds, mutual funds
950000	Amount of Federal income tax paid
950001	Amount of refund received from Federal income tax
950010	Amount of state and local income taxes paid
950011	Amount of refund received from state and local taxes
950021	Amount of other taxes paid
950022	Amount of personal property taxes paid
950023	Amount of refund received from other sources
980020	Age of reference person

If VALUE is greater (less) than the designated critical values for the above UCCs, VALUE is set to the topcode value and the associated flag variable, VALUE_, is set to 'T'. The critical values and topcode

values (rounded to the nearest dollar) of the variable VALUE that are associated with the above UCCs follow.

UCC	Critical value +	Critical value -	Topcode value +	Topcode value -
001000	83,333	-	1,797,619	-

920030	13,333	-	33,103	-
920040	300,000	-	678,706	-
950000 (FEDTAXX)[1]	2,001		4,206	
950001	-	-458	-	-785
950010 (SLOCTAXX)[2]	406		966	
950011	-	-133	-	-244
950021	357	-	1054	-
950022	358	-	589	-
950023	-	-140	-	-1,199
980020	8	-	8	-

[1] FEDTAXX (amount of Federal tax paid in addition to that withheld) and FAMTFEDX (Federal tax withheld from last pay annualized for all CU members) are both mapped to UCC 950000 as separate records. Records for UCC 950000 that represent FAMTFEDX are topcoded through their components (AMTFED) at the MEMB level and thus, these records will not have an ITAB critical value. ITAB records for UCC 950000 that represent FEDTAXX are topcoded for all amounts greater than $2,001.

[2] SLOCTAXX (amount of state and local taxes paid in addition to that withheld) and FSLTAXX (state and local income tax deduction from last pay annualized for all CU members) are both mapped to UCC 950010 as separate records. Records for UCC 950010 that represent FSLTAXX are topcoded through their components (SLTAXX) at the MEMB level and thus, these records will not have an ITAB critical value. Create the ITAB VALUE field for these records by dividing FSLTAXX by 12. If FSLTAXX is topcoded, then set VALUE_ to 'T'. ITAB records for UCC 950010 that represent SLOCTAXX are topcoded for all amounts greater than $406.

VALUE for the following income UCCs is topcoded because the FMLY file variables corresponding to these UCCs are topcoded due to recalculation. (See Section IV.A. CU CHARACTERISTICS AND INCOME FILE on topcoding of FMLY variables.)

UCC	FMLY variable	Description
800910	FGOVRETX	Amount of government retirement deducted from last pay, annualized for all CU members
800920	FRRDEDX	Amount of Railroad Retirement deducted from last pay, annualized for all CU members
800931	FPRIPENX	Amount of private pension fund deducted from last pay, annualized for all CU members
800932	FINDRETX	Amount of money placed in individual retirement plan
800940	FJSSDEDX	Estimated amount of annual Social Security contribution
900000	FSALARYX	Amount received from wage and salary income before deductions
900010	FNONFRMX	Amount of income or loss received from own nonfarm business
900020	FFRMINCX	Amount of income or loss received from own farm
980000	FINCBTAX	Amount of CU income before taxes
980070	FINCATAX	Amount of CU income after taxes

E. DETAILED EXPENDITURE FILES (EXPN)

The following EXPN file variables are subject to topcoding.

Survey Section	File name	Variable	Description
2. A&B.	RNT	QRT3MCMX	Total rental payments made in reference period, adjusted for business and rooms rented to others
3. B.	OPB	PROPVALX	About how much do you think this property would sell for on today's market?
		OWN_PURX	What was the total price paid for the property, not including closing costs?
3. D.	OPD	DISPX	What was the selling price (trade-in value)?
3. F.	MOR	ORGMRTX	What was the amount of the mortgage when you obtained it, excluding any interest?
		MRTPMTX	Mortgage payment, including escrow
		QBLNCM1X	Principal balance outstanding at beginning of month, 3 months ago
		QBLNCM2X	Principal balance outstanding at beginning of month, 2 months ago
		QBLNCM3X	Principal balance outstanding at beginning of month, 1 month ago
		QPRINM1X	Amount of principal paid during first month of reference period
		QPRINM2X	Amount of principal paid during second month of reference period
		QPRINM3X	Amount of principal paid during third month of reference period
3. G.	HEL	ORGMRTG	What was the amount of the lump sum home equity loan when you obtained it, excluding any interest?
		MRTPMTG	Loan payment
		QBLNCM1G	Principal balance outstanding at beginning of month, 3 months ago
		QBLNCM2G	Principal balance outstanding at beginning of month, 2 months ago
		QBLNCM3G	Principal balance outstanding at beginning of month, 1 month ago
		QPRINM1G	Amount of principal paid during first month of reference period
		QPRINM2G	Amount of principal paid during second month of reference period
		QPRINM3G	Amount of principal paid during third month of reference period
3. H.	OPH	JLCPRINX	Estimated amount of principal paid on loan during reference period
3. I.	OPI	JFEETOTX	Amount of regular condo fee for management services, adjusted for business
		QSPCLX	Total amount of special payments for management services, adjusted for business
		QLR3MCMX	Amount paid for ground or land rent, adjusted for business
		QLMPSUMX	Amount paid for mortgage in special or lump sum payments during reference period
		RNTEQVX	Monthly rental equivalence of owned home
11. B.	OVB		*For confidentiality reasons, records with VEHICYB='190' (private plane) are not included on the public use files.*
		NETPURX	Amount paid for boat with motor
			If NETPURX is topcoded, then the following variables are suppressed (blanked out) and their flags are given a 'T'.

Survey Section	File name	Variable	Description
		TRADEX	How much was the trade in allowance received?
		EMPLEXPX	How much of the amount or price was paid by an employer?
		DNPAYMTX	What was the amount of the cash down payment?
		PRINCIPX	How much was borrowed, excluding any interest?
		PAYMENTX	What is the amount of each payment?
		QBALNM1X	Principal balance outstanding at the beginning of first month of reference period
		QVINTM1X	Amount of interest paid during first month of reference period
		QVPRIM1X	Amount of principal paid during first month of reference period
		QBALNM2X	Principal balance outstanding at the beginning of second month of reference period
		QVINTM2X	Amount of interest paid during second month of reference period
		QVPRIM2X	Amount of principal paid during second month of reference period
		QBALNM3X	Principal balance outstanding at the beginning of third month of reference period
		QVINTM3X	Amount of interest paid during third month of reference period
		QVPRIM3X	Amount of principal paid during third month of reference period
		QTRADEX	Amount paid for vehicle after trade- in allowance minus amount of cost paid by employer
		QADITR1X	Amount of interest paid during first month of reference period, adjusted for business
		QADITR2X	Amount of interest paid during second month of reference period, adjusted for business
		QADITR3X	Amount of interest paid during third month of reference period, adjusted for business
		QDNPYMTX	Amount of down payment, adjusted for business
11. C.	OVC		*For confidentiality reasons, records with VEHICYC='190' (private plane) are not included on the public use files.*
		SALEX	Amount boat with motor sold for
			If SALEX is topcoded, then the variable FINPAYMX (How much was the final payment made on any outstanding loan?) is suppressed for that record, and flagged as topcoded.
12. A.	VEQ		*For confidentiality reasons, records with VOPVEHYA= '190' (Private plane) are not included on the public use microdata.*
15. B.	MDB	MEDPMTX	Amount of payment for medical supplies or services
15. D.	MDC	MEDRMBX	Amount of reimbursement for medical supplies or services
16.	EDA	JEDUCNET	Net amount paid for educational expenses (housing)
18. B&C.	TRV	LDGCOSTX	Cost for hotels, motels, cottages, trailer camps, or other lodging including taxes and tips
18. D.	TRD	TOTYUPDX	Amount of (lodging) expense not covered by a business, employer, or other non-CU member (for trips funded by non-CU member)
18. E.	TRE	TRNONCUX	Amount of the (lodging) expense paid for non CU member

The critical values and topcode values associated with the above EXPN variables follow.

Survey Section	File name	Variable	Critical value +	Topcode value +	Condition

V. ESTIMATION PROCEDURE

A. DESCRIPTION OF PROCEDURES

The following section describes procedures for using microdata for the estimation of descriptive statistics such as aggregates and means. A sample program written in SAS that illustrates this methodology is in Section VII. MICRODATA VERIFICATION AND ESTIMATION METHODOLOGY

1. *GENERAL CONCEPTS*

a. *SAMPLE VERSUS POPULATION ESTIMATES*

As described in Section X.C. WEIGHTING, each CU in the CE sample represents a given number of CUs in the U.S. population. The translation of sample CUs into a population estimate is accomplished by weighting. FINLWT21, one of the 45 weight variables associated with each CU, is used to estimate the population. Procedures for estimating sample (unweighted) and population (weighted) statistics are described in Sections V.A.2. ESTIMATION OF UNWEIGHTED STATISTICS and V.A.3. ESTIMATION OF WEIGHTED STATISTICS below.

b. *CALENDAR PERIOD VERSUS COLLECTION PERIOD*

Because the rotating panel design of the Interview survey has an effect on the structure of the data files, one must be aware of the distinction between calendar period and collection period in producing estimates. (See Section X.A. SURVEY SAMPLE DESIGN for a description of the panel rotation scheme.)

Respondents are asked to report expenditures made since the first of the month three months prior to the interview month. For example, if a CU is interviewed in February of 2000, they are reporting expenditures for November and December of 1999, and January of 2000. This is illustrated in the rotation chart below. The period between November 1 and January 31 is referred to as the reference period for the interview.

Month of Expenditure	Month of Interview					
	January Panel A	*February* Panel B	*March* Panel C	*April* Panel A	*May* Panel B	*June* Panel C
October	X					
November	X	X				
December	X	X	X			
January		X	X	X		
February			X	X	X	
March				X	X	X
April					X	X
May						X

Please note that UCCs 006001 and 006002 -- total amount owed to creditors (2nd and 5th interviews) – do not adhere to the above mapping scheme. They are mapped to the month of the interview, *not* to preceding months.

The microdata files are organized and identified by collection period, i.e., the month of the interview. Thus, the MTAB file for the second quarter of 2000 contains expenditure data collected in interviews that took place in April, May, and June of 2000. Referring to the rotation chart, one can see that this MTAB file contains expenditures made between January 2000 and May 2000. Similarly, the MTAB file for the third quarter of 2000 (interviews conducted between July and September) contains expenditures made between April and August 2000. To obtain all expenditures made in January 2000, one should access the MTAB files for both the first and second quarters of 2000. The MTAB file for the first quarter of 2000 would contain January expenditures made by CUs interviewed in February and March 2000, while the MTAB file for the second quarter of 2000 would contain January expenditures made by CUs interviewed in April 2000.

As a consequence, users should be clear as to whether they desire estimates based on when expenditures were reported (collection period) or when expenditures were made (calendar period).

To produce an annual estimate for 2000 based on collection period, that is, from all interviews conducted in 2000, data users need data only from Q001 through Q004 files. However, to produce a 2000 annual estimate based on expenditures made in 2000 (calendar period), one needs to access five collection-quarter files, the first quarter of 2000 through the first quarter of 2001. (The estimates published by BLS are based on calendar periods that require the subsequent year's first quarter data).

The ITAB files are derived in a slightly different manner than MTAB. As was mentioned in the description of the ITAB file, the data on the file represents the conversion of annual and point-of-interview data into a monthly format compatible with MTAB. Looking at a CU interviewed in January 2000, as an example, nonfarm business income earned over the previous 12 months would be collected and recorded as such on the FMLY file. For the ITAB file, this annual amount would be divided by 12, and separate records would be created for October, November, and December each containing that amount.

The variables REF_MO, REF_YR, QINTRVMO, and QINTRVYR indicate reference month of expenditure, reference year of expenditure, interview month, and interview year, respectively. REF_MO and REF_YR, in the MTAB and ITAB files, can be used to select all data for the desired period in which expenditures were made. Because of the interview rotation pattern, there is a one-month to three-month lag between the time an expenditure occurs and the time it is reported. QINTRVMO and QINTRVYR can be used to identify the collection reference period.

In addition to its effect on the selection of data prior to estimation, this distinction between collection period and calendar period also directly affects the estimation procedure for producing means. In computing means based on data collected from all CUs interviewed in a given time frame (e.g., year, quarter, 8 months), the potential contribution of each CU to the mean is the same. That is each CU can contribute data from the entire reference period to the estimate. On the other hand, in computing means based on expenditures made in a given time frame, the potential contribution of each CU to the mean varies depending on how closely the reference period for an interview coincides with the time frame desired. To see this more clearly, refer once again to the rotation chart. To compute a mean for expenditures made during the first quarter of the year, one would obtain data from CUs interviewed between February and June. However, their potential contributions to the mean are not equal. CUs interviewed in February only contribute 'one-third' of the expenditures they made during the reference period to the estimate (their January expenditures), while CUs interviewed in April contribute all their expenditures to the estimate.

As a result, the population (the denominator in the equation for a mean) has to be adjusted to account for the difference in contribution among CUs. At BLS, we create a variable, MO_SCOPE that shows the number of months a CU's interview can contribute to the mean or is "in scope" for the time period the estimate will cover. All CUs interviewed in the same month will have identical values for MO_SCOPE, as their potential contribution to the mean is the same. Thus, MO_SCOPE will be conditioned on the value of QINTRVMO (and possibly QINTRVYR).

Continuing with our example of estimating a mean for expenditures made during the first quarter of the year, we would access data from files for the first and second quarter of the year. MO_SCOPE would be derived as explained below.

If QINTRVMO is 1 then MO_SCOPE is 0
if QINTRVMO is 2 then MO_SCOPE is 1
if QINTRVMO is 3 then MO_SCOPE is 2
if QINTRVMO is 4 then MO_SCOPE is 3
if QINTRVMO is 5 then MO_SCOPE is 2
if QINTRVMO is 6 then MO_SCOPE is 1

Note that MO_SCOPE has a value of 0 for CUs interviewed in January, as they report expenditures for October through December, totally outside the period of interest. One could extract a data set of only CUs interviewed between February and June to eliminate that condition. How MO_SCOPE is used in estimation will be discussed later.

c. *TIME PERIOD DIFFERENCES*

It has been mentioned previously that these files contain data that can cover a variety of time periods. Values for MTAB and ITAB variables are monthly. Values for variables on the FMLY and MEMB files can vary. For example income variables are for annual time periods and demographic variables are as of the time of interview. As such, users should pay particular attention to the descriptions of variables in the detailed listings of Section III.E. DETAILED VARIABLE DESCRIPTIONS.

This is particularly important where the user may have a choice between variables on two files that contain the same data adjusted to reflect different time periods. For instance, FMLY income data are annual covering the 12-month period prior to the collection month, whereas in ITAB these income data

have been converted into monthly values. Selected demographic characteristic variables in the FMLY files contain values as of the date of interview. In the ITAB files, these values are treated as if they were "annual" amounts, and are converted to monthly records by dividing the values by 12. To illustrate each of these cases, the following example looks at a CU interviewed in April whose reference person is 60 years old at the time of interview and where CU income from wages and salaries over the previous 12 months is $48,000.

FMLY VARIABLE	AMOUNT	UCC	ITAB AMOUNT	MONTH
FSALARYX	$48,000	900000	$4,000	JAN
		900000	$4,000	FEB
		900000	$4,000	MAR
AGE_REF	60	980020	5	JAN
			5	FEB
			5	MAR

Users should be aware of these time period differences when using the data.

d. COMPARISONS WITH PUBLISHED CE DATA

The mean values for some income and expenditure items which appear in CE publications are different than those derived from the Interview public-use microdata because some variables are topcoded or suppressed on the public-use files, but are not so treated on BLS's own data base in producing published data. (For detailed topcoding information, see Section IV. TOPCODING AND OTHER NONDISCLOSURE REQUIREMENTS.)

2. ESTIMATION OF UNWEIGHTED STATISTICS

a. AGGREGATE STATISTICS

To compute unweighted aggregate expenditures from data on the MTAB files, one would sum the value of the COST field for MTAB records of interest. These records could be selected on the basis of factors such as item category, month or year of occurrence, or characteristics of the CU or its members. While MTAB is a monthly file, there is no summation done at the monthly level for each CU for expenditures with similar UCC and gift characteristics. Thus one may find multiple MTAB records with identical characteristics including COST, if the CU reported the expenditures as discrete purchases. A similar approach can be applied to estimate aggregate income from data on the ITAB files, summing the VALUE field on the appropriate records.

Certain MTAB and ITAB item categories are collected only in the 5th interview. Therefore, the data are reported by only one-fourth of the sample at any time. For some categories, the reported values have been multiplied by 4 to expand them to represent the total sample, while in other categories, this has not been done. When estimating for these UCCs, values should be multiplied by 4 for total sample representation. (See Sections III.F.3 MONTHLY EXPENDITURES (MTAB) FILE and III.F.4 INCOME (ITAB) FILE.)

The estimation of aggregates for FMLY and MEMB file variables is similar to that for MTAB and ITAB variables. To estimate aggregates from data on the FMLY file, one would sum the value of the desired variable field for FMLY records selected on the basis of, for example, other CU characteristic

variables on the FMLY file, characteristics of CU members, expenditures made, and month or year of interview. Aggregates for MEMB file variables would be developed in a similar fashion.

The user must be careful in interpreting what the aggregate represents because of the time period differences between variables on different files. For example, summing the COST field of MTAB records representing purchases for a UCC that occurred in a specific month will yield an aggregate monthly expenditure for that UCC. However, summing the value of a FMLY file variable such as FSALARYX for all CUs interviewed in a specific month will yield an aggregate annual value for that variable.

In general, one can use an aggregate derived for a certain time period to extrapolate an aggregate estimate for a longer time period. A typical case is the estimation of annual aggregates based on an aggregate using less than 12 months of data. To do this, divide the number of months for which the estimate is desired (12) by the number of months of expenditure data being used and multiply the aggregate by that quotient.

b. *MEANS*

There are two types of means that are customarily derived from CE data. The most common is the sample mean computed over all CUs. The other is the mean of those reporting computed over only those CUs actually reporting the item. The following sections look at each type of mean.

(i) SAMPLE MEANS

Unweighted sample means are derived by computing an aggregate estimate for the desired item and dividing it by the sample size over the time period being estimated. Deriving an aggregate estimate has already been discussed; ascertaining the correct sample size is the next task.

The Interview survey is designed such that the CUs interviewed in each quarter represent one independent sample. Since there is one FMLY record for each sample CU, the national sample for the first quarter of 2000 is 7,860 CUs. (See Section III.B. RECORD COUNTS PER QUARTER.) The appropriate sample size for any time period will reflect the number of interviewed CUs eligible to report data over the period adjusted by the number of independent samples represented. As explained earlier, the major consideration is whether the desired estimate is a collection period estimate or a calendar period estimate.

To calculate the sample size for a collection period estimate, divide the total number of CUs interviewed by the quotient of the number of months in which these interviews occurred divided by 3. For example, one might wish to estimate the annual sample mean expenditure for men's shirts for all CUs interviewed in 2000. If one were to divide the aggregate expenditure on men's shirts from these interviews by the total number of CUs interviewed, one would get an annual sample mean about 1/4 as large as it should be, since the number of CUs interviewed represented four independent samples (one sample for each quarter of 2000). In fact, one would have derived the average quarterly sample mean rather than the annual sample mean. To get the annual sample mean, one would have to divide the total number of CUs interviewed by 4 (or 12 months divided by 3), thereby computing the average sample size over the year, and divide the aggregate by that amount.

As mentioned earlier, when one computes a calendar period estimate, the variable MO_SCOPE is required to adjust the sample size for the difference in potential contribution among CUs. Since one independent sample of CUs is represented in each quarter, the sum of MO_SCOPE for one quarter can be up to 3 times the independent sample (if MO_SCOPE = 3 for every CU interviewed in the quarter, the sum of MO_SCOPE would be equal 3 times the independent sample). To calculate the sample size for a calendar period estimate, sum MO_SCOPE for the appropriate CUs and divide by 3. Note that this

makes sense in those instances where MO_SCOPE does not equal 3. Referring to the example where MO_SCOPE was introduced, we can see that summing MO_SCOPE for CUs interviewed in the second quarter of the year (QINTRVMO = 4-6) would yield approximately one independent sample as CUs interviewed in June would be counted twice while CUs interviewed in April would not be counted. Dividing this amount by 3 would yield a sample size of 1/3 the independent sample. Keep in mind that only 1/3 of the expenditures reported in those interviews occurred within the time period of the aggregate being estimated. Only April data from May interviews and April-May data from June interviews would be included in the aggregate.

One can see how the computation of sample size is affected when one calculates the commonly-used annual calendar period estimate. A 2000 estimate would be based on data from interviews over five quarters. MO_SCOPE would take on the following values:

Interview Month and Year

	2000				**2000**				
	Jan	_Feb_	_Mar_	_Apr_	_May_	_Jun_	_Jul_	_Aug_	_Sep_
MO_SCOPE	0	1	2	3	3	3	3	3	3

			2000	**2001**		**2001**
	Oct	_Nov_	_Dec_	_Jan_	_Feb_	_Mar_
MO_SCOPE	3	3	3	3	2	1

Summing MO_SCOPE for each of the five quarters and dividing by 3 would yield a value of 1/3 the independent sample for the first quarter of 2000, 2/3 the independent sample for the first quarter of 2001, and one independent sample for the second, third, and fourth quarters of 2000. Summed over the five quarters, this represents 4 independent samples, so the result should be divided by 4 to get the correct sample size of one average independent sample. Thus, the general rule in computing sample size for deriving an annual calendar period estimate is to sum MO_SCOPE over the five quarters and divide by 12.

(ii) MEANS OF THOSE REPORTING

The only difference between estimating a mean-of-those-reporting and estimating a sample mean is in selecting the appropriate CUs to use in the computation. The CUs to be used depend on the objective of the analysis. In deriving a sample mean, all sample units interviewed over the time period covered are included in the computation of sample size whether or not they reported the item being estimated. In computing a mean of those reporting, only those CUs reporting the desired item would be included. The aggregate estimate used in the numerator is the same in either case. The adjustments made for MO_SCOPE and the fact that each quarter represents one independent sample would apply in this case as well. It should be noted that means of those reporting are not U.S. population estimates. They cannot be used to calculate total expenditures or expenditure shares for the U.S. population. They are useful only at the computed level.

3. _ESTIMATION OF WEIGHTED STATISTICS_

By applying weights when computing aggregates or means, one transforms the results from sample estimates to population estimates. There are 45 weight variables on the FMLY file, WTREP01-WTREP44 and FINLWT21. All the WTREP variables are half-sample replicate weights that should be used in variance computation. Use FINLWT21 to estimate weighted statistics for the population of CUs.

Users should follow the procedures for estimating unweighted statistics described above. When estimating weighted aggregates, the desired cost or value field should be multiplied by FINLWT21 at the CU level before summing across all appropriate records. In determining the proper sample size when computing collection period means, divide the sum of FINLWT21 for the CUs interviewed by the quotient of the number of months in which these interviews occurred divided by 3. Where calendar period means are to be estimated, multiply MO_SCOPE by FINLWT21 for each CU prior to summing and dividing by 3.

B. DESCRIPTION OF FORMULAS

Expenditure items will be referred to in these descriptions, but income items can be handled similarly except where otherwise stated.

Definition of Terms:

Let

S = all CUs in the subpopulation of interest
x = item(s) of interest
q = number of months for which estimate is desired
m = number of months of interviews whose expenditures are to be used in calculating the estimate (collection period estimate)
r = number of months in which expenditures were made to be used in calculating the estimate (calendar period estimate)
j = individual CU in subpopulation S
t = month of expenditure
i = month of interview
MSC = MO_SCOPE value

Then

$E_{j,x,i}$ = 3-month expenditure by CU$_j$ on item x reported at month i interview
$E_{j,x,t}$ = monthly expenditure by CU$_j$ on item x made during month t
$W_{j,i,F21}$ = weight assigned to CU$_j$ for interview at month i
$W_{j,t,F21}$ = weight assigned to CU$_j$ for interview where CU$_j$ makes expenditure during month t

The F21 denotes FINLWT21, which is used for population estimates.

1. *AGGREGATE EXPENDITURE ESTIMATES (UNWEIGHTED)*

An estimate of unweighted aggregate expenditures for a collection period can be expressed as:

$_{UK}X_{(S,x)(q,m)}$ = an unweighted collection (*UK)* period estimate of aggregate expenditures (*X*) by CUs in subpopulation S, indexed from j = 1 through k, on item x over q months of interviews, where data collected over m months of interviews are used.

or

$$_{UK}X_{(S,x)(q,m)} = \left(\frac{q}{m}\right) \sum_{i=1}^{m} \left(\sum_{j=1}^{k} E_{x,j} \right)_i$$

An estimate of unweighted aggregate expenditures for a calendar period can be expressed as:

$_{UC}X_{(S,x)(q,r)}$ = an unweighted calendar (*UC*) period estimate of aggregate expenditures (*X*) by CUs in subpopulation *S*, indexed from *j* = 1 through *k*, on item x over *q* months, where expenditures made over *r* months are used.

or

$$_{UC}X_{(S,x)(q,r)} = \left(\frac{q}{r}\right) \sum_{t=1}^{r} \left(\sum_{j=1}^{k} E_{x,j} \right)_t$$

2. *SAMPLE MEAN EXPENDITURE ESTIMATES (UNWEIGHTED)*

An estimate of an unweighted mean expenditure for a collection period can be expressed as:

$_{UK}\overline{X}_{(S,x)(q,m)}$ = an unweighted collection period estimate of the mean expenditure by CUs in subpopulation *S* on item *x* over a period of *q* months, where data collected over *m* months of interviews are used.

or

$$_{UK}\overline{X}_{(S,x)(q,m)} = \left(\frac{_{UK}X_{(S,x)(q,m)}}{\dfrac{\sum_{i=1}^{m}\left(\sum_{j=1}^{k} S_j\right)_i}{\left(\dfrac{m}{3}\right)}} \right)$$

An estimate of an unweighted mean expenditure for a calendar period can be expressed as:

$_{UC}\overline{X}_{(S,x)(q,r)}$ = an unweighted calendar period estimate of the mean expenditure by CUs in subpopulation *S* on item *x* over a period of *q* months, where expenditures made over *r* months are used.

or

$$_{UC}\overline{X}_{(S,x)(q,r)} = \left(\frac{_{UC}X_{(S,x)(q,r)}}{\dfrac{\sum_{t=1}^{r+3}\left(MSC\sum_{j=1}^{k} S_j\right)_t}{r}} \right)$$

Note: For *t* =1, MO_SCOPE (*MSC*) = 0, since CUs interviewed in the first month for which the estimate is to be generated report expenditures outside the estimate period, i.e., in the previous quarter, month, etc. For *t* = (*r+3*), MO_SCOPE = 1 since only 1 month's worth of expenditures have a chance to contribute to the calendar period of *r* months.

3. *AGGREGATE EXPENDITURE ESTIMATES (WEIGHTED)*

An estimate of weighted aggregate expenditures for a collection period can be expressed as:

$_{WK}X_{(S,x)(q,m)}$ = a weighted collection (*WK*) period estimate of aggregate expenditures by CUs in subpopulation *S* on item *x* over a period of *q* months, where data collected over *m* months of interviews are used.

> or

$$_{WK}X_{(S,x)(q,m)} = \left(\frac{q}{m}\right)\sum_{i=1}^{m}\left(\sum_{j=1}^{k}(W_{j,F21}E_{x,j})\right)_i$$

An estimate of weighted aggregate expenditures for a calendar period can be expressed as:

$_{WC}X_{(S,x)(q,r)}$ = a weighted calendar (*WC*) period estimate of aggregate expenditures by CUs in subpopulation *S* on item *x* over *q* months, where expenditures made over *r* months are used.

> or

$$_{WC}X_{(S,x)(q,r)} = \left(\frac{q}{r}\right)\sum_{t=1}^{r}\left(\sum_{j=1}^{k}(W_{j,F21}E_{x,j})\right)_t$$

4. *SAMPLE MEAN EXPENDITURE ESTIMATES (WEIGHTED)*

An estimate of a weighted mean expenditure for a collection period can be expressed as:

$_{WK}\overline{X}_{(S,x)(q,m)}$ = a weighted collection (*WK*) period estimate of the mean expenditure by CUs in subpopulation *S* on item *x* over a period of *q* months, where data collected over *m* months of interviews are used.

> or

$$_{WK}\overline{X}_{(S,x)(q,m)} = \left(\frac{_{WK}X_{(S,x)(q,m)}}{\dfrac{\sum_{i=1}^{m}\left(\sum_{j=1}^{k}W_{j,F21}\right)_i}{\left(\dfrac{m}{3}\right)}}\right)$$

An estimate of a weighted mean expenditure for a calendar period can be expressed as:

$_{WC}\overline{X}_{(S,x)(q,r)}$ = a weighted calendar (*WC*) period estimate of the mean expenditure by CUs in subpopulation *S* on item *x* over a period of *q* months, where expenditures made over *r* months are used.

or

$$_{WC}\overline{X}_{(S,x)(q,r)} = \left(\frac{_{WC}X_{(S,x)(q,r)}}{\sum_{t=1}^{r+3} \left[(MSC) \left(\sum_{j=1}^{k} W_{j,F21} \right) \right]_t} \right)$$

Note: For *t* =1, MO_SCOPE (*MSC*) = 0, since CUs interviewed in the first month for which the estimate is to be generated report expenditures outside the estimate period, i.e., in the previous quarter, month, etc. For *t* = (*r+3*), MO_SCOPE = 1 since only 1 month's worth of expenditures have a chance to contribute to the calendar period of *r* months.

VI. RELIABILITY STATEMENT

A. DESCRIPTION OF SAMPLING AND NONSAMPLING ERRORS

Sample surveys are subject to two types of errors, sampling and non-sampling. Sampling errors occur because observations are not taken from the entire population. The standard error, which is the accepted measure for sampling error, is an estimate of the difference between the sample data and the data that would have been obtained from a complete census. The sample estimate and its estimated standard error enable one to construct confidence intervals.

Assuming the normal distribution applies to the means of expenditures, the following statements can be made:

1) The chances that an estimate from a given sample would differ from a complete census figure by less than one standard error are approximately 68 out of 100.

2) The chances that the difference would be less than 1.6 times the standard error are approximately 90 out of 100.

3) The chances that the difference would be less than two times the standard error are approximately 95 out of 100.

Nonsampling errors can be attributed to many sources, such as definitional difficulties, differences in the interpretation of questions, inability or unwillingness of the respondent to provide correct information, mistakes in recording or coding the data obtained, and other errors of collection, response, processing, coverage, and estimation of missing data. The full extent of the nonsampling error is unknown. Estimates using a small number of observations are less reliable. A small amount of nonsampling error can cause a small difference to appear significant even when it is not. It is probable that the levels of estimated expenditures obtained in the Interview survey are generally lower than the "true" level due to the above factors.

B. ESTIMATING SAMPLING ERROR

1. *VARIANCE ESTIMATION*

Variances can be estimated in many ways. The method illustrated below (a pseudo replication technique) is chosen because it is accurate and simple to understand. The basic idea is to construct several artificial "subsamples" from the original sample data such that the variance information of the original data is preserved in the subsamples. The subsamples (or pseudo replicates) can then be used to approximate variances for the estimates. Forty-four separate subsamples can be extracted from the data base using the replicate weight variables, WTREP01-WTREP44, associated with each CU. Note that only half of the CU's are assigned to each of the 44 replicates. The replicate weight variable contains a value greater than 0 for CU's assigned to that replicate. A value of missing is assigned to the weight variable for those CU's not included in a particular replicate.

The notation for the weighted collection period and calendar period estimates of aggregate expenditures in Section V.B.3 AGGREGATE EXPENDITURE ESTIMATES (WEIGHTED) does not explicitly identify the replicate as a variable because to calculate an aggregate (or mean) only FINLWT21 is used.

An estimate for the variance of an aggregate or mean estimate can be computed by generating 44 separate estimates using the 44 replicate weights and employing the standard formula for computing sample variance. To illustrate the estimation of variance, the notation must first be expanded to include the replicates explicitly.

Expenditure items will be referred to in these descriptions, but income items can be handled similarly except where otherwise stated.

Let the subscript "a" represent one of the 44 sets of replicate weights on the FMLY files. Following the earlier notation in Section V.B., we have.

$_{AK}X_{(S,x)(q,m),a}$ = a collection period estimate of aggregate expenditures by CU's in subpopulation S on item x over a period of q months, using data collected over m months of interviews, calculated using the weights of the ath replicate

and,

$_{AK}\overline{X}_{(S,x)(q,m),a}$ = a collection period estimate of the mean expenditure by CU's in subpopulation S on item x over a period of q months, using data collected over m months of interviews, calculated using the weights of the ath replicate

Note that an estimate using any one of the first 44 replicate weights uses only part of the expenditure data; in general: $_{AK}X_{(S,x)(q,m),1}, \cdots, {}_{AK}X_{(S,x)(q,m),44} \neq {}_{WK}X_{(S,x)(q,m)}$

Using standard variance formula, the variance of aggregate expenditures can be estimated as follows:

$$V\left({}_{WK}X_{(S,x)(q,m)}\right) = \frac{1}{44}\sum_{a=1}^{44}\left({}_{AK}X_{(S,x)(q,m),a} - {}_{WK}X_{(S,x)(q,m)}\right)^2$$

Similarly, estimates for the variances of $_{WK}\overline{X}_{(S,x)(q,m)}$ can be given as:

$$V\left(_{WK}\overline{X}_{(S,x)(q,m)}\right) = \frac{1}{44}\sum_{a=1}^{44}\left(_{AK}\overline{X}_{(S,x)(q,m),a} - _{WK}\overline{X}_{(S,x)(q,m)}\right)^2$$

2. *STANDARD ERROR OF THE MEAN*

The standard error of the mean, $S.E.(\overline{X})$, is used to obtain confidence intervals that evaluate how close the estimate may be to the true population mean. $S.E.(\overline{X})$ is defined as the square root of the variance of the mean. For example, the weighted calendar period estimated mean expenditure for total food by complete income reporters in 2000 is $5,109.05. The standard error for this estimate is $41.59. A 95 percent confidence interval can be constructed around this estimate, bounded by values 1.96 times the standard error less than and greater than the estimate, that is, from $4,904.48 to $5,038.60. We could conclude with 95 percent confidence that the true population mean expenditure for food for total complete income reporters in 2000 lies within the interval $5,027.53 to $5,190.57.

3. *STANDARD ERROR OF THE DIFFERENCE BETWEEN TWO MEANS*

Standard errors may also be used to perform hypothesis testing, a procedure that evaluates population parameters using sample estimates. The most common types of hypotheses are: 1) the population parameters are identical, and 2) they are different.

For example, the 2000 mean expenditure estimate for apparel and services for complete income reporters in the *$30,000 to $39,999* income range is $1,184.33 and the estimate for complete income reporters in the *$40,000 to $49,999* income range is $1,305.70. The apparent difference between the two mean expenditures is $121.37. The standard error on the estimate of $1,184.33 is $45.86 and the estimated standard error for $1,305.70 is $53.84.

The standard error of a difference is approximately equal to

$$S.E.\left(_{WC}\overline{X}_1, _{WC}\overline{X}_2\right) = \sqrt{\left(V\left(_{WC}\overline{X}_1\right) + V\left(_{WC}\overline{X}_2\right)\right)} \tag{1}$$

where

$$V(\overline{X}_i) = \left(S.E.(\overline{X}_i)\right)^2$$

This assumes the two sample means, $_{WC}\overline{X}_1$ and $_{WC}\overline{X}_2$, are disjoint subsets of the population. Hence the standard error of the difference in apparel and services expenditures between these two income groups of complete income reporters is about

$$\sqrt{\left((45.86)^2 + (53.84)^2\right)} = 70.72 \tag{2}$$

This means that the 95 percent confidence interval around the difference is from -$17.25 to $259.99. Since this interval includes zero, we cannot conclude with 95 percent confidence that the mean apparel and services expenditures for complete reporters in the *$40,000 to $49,999* income range is

different than the mean apparel and services expenditures for complete reporters in the *$30,000 to $39,999* income range.

Analyses of the difference between two estimates can also be performed on nondisjoint sets of population, where one is a subset of the other. The formula for computing the standard error of the difference between two nondisjoint estimates is

$$S.E.\left({}_W\overline{X}_1, {}_W\overline{X}_2\right) = \sqrt{\left(V\left({}_W\overline{X}_1\right) + V\left({}_W\overline{X}_2\right) - 2r\left(V\left({}_W\overline{X}_1\right) * V\left({}_W\overline{X}_2\right)\right)\right)} \tag{3}$$

where

$$V(\overline{X}_i) = \left(S.E.(\overline{X}_i)\right)^2$$

and where r is the correlation coefficient between ${}_W\overline{X}_1$ and ${}_W\overline{X}_2$. The correlation coefficient is generally no greater than 0.2 for CE estimates.

VII. MICRODATA VERIFICATION AND ESTIMATION METHODOLOGY

This section is designed to help users become familiar with the microdata files. The following program gives users a benchmark to verify that their copy of the CD-ROM contains valid data, illustrates the methodology CE uses in producing publication tables, and offers an example of coding to access the data and produce a sample table. The program is written in SAS and utilizes the ASCII data sets available on this CD-ROM. A program written in SAS but utilizing the SAS data sets is also present on the CD-ROM but will not be referenced here. Refer to the table following the program to check output. (Note: CE data published by BLS may not match some values estimated using the microdata due to topcoding of data and CE publication programming methodology.) All variables and ranges referred to in the program are described in detail in Section III.F. DETAILED VARIABLE DESCRIPTIONS in this documentation.

This program produces a table of selected expenditures by income class of the CU. The first section of the program extracts the relevant variables from the FMLY files, while the second section extracts the expenditure and income data from the MTAB and ITAB files. These three data sets are then used along with the AGG and LABEL processing files to construct the sample table output. This output is the product of two SAS arrays. The values in one array are divided by the value in the other array to obtain weighted mean expenditures. The base, or denominator, for the division is a vector consisting of the weighted total population for the U.S. and selected income class categories. The numerator is a matrix of aggregate weighted costs for each line item in the table for the total U.S. population and each income class category.

It should be emphasized that this program has been written solely for the verification of the microdata and as an illustration of the CE estimation methodology. It should not be used for any other purpose.

Note: This program processes large amounts of data. If you are using a PC with limited capabilities it may be necessary to run this program in sections.

NOTE: The data set WORK.FMLY1 has 7860 observations and 4 variables.
NOTE: The DATA statement used 4.71 seconds.

Line 1 sets the year as a macro variable that can be used throughout the program. **Line 2** sets another macro variable as the year plus one.

Lines 5-21 designate the location of the data on the CD-ROM.

Lines 23-24 designate the location of the two processing files.

Line 27 forces the output to be printed landscape.

Lines 32-60 pull in the necessary variables from the fmly files. Newid is the code given to a consumer unit each time it participates. Finlwt21 will be used to weight each consumer unit such that it represents some portion of the population. Qintrvmo is the month that the consumer unit was interviewed. Inclass is a code that represents the range within which the consumer unit's annual income falls.

NOTE: The DATA statement used 0.22 seconds.

221      proc summary nway data = pubray;
222       class line;
223       var grp1-grp10;
224       output out = aggsum sum = ;
225
226

NOTE: The data set WORK.AGGSUM has 232 observations and 13 variables.
NOTE: The PROCEDURE SUMMARY used 0.11 seconds.
```

Lines 207-211 pull in the file that dictates how each ucc will be summed for aggregation.

Lines 215-219 merge the data set containing the weighted costs and the agfile. The agfile will give all costs a code called line that will be used for aggregation.

Lines 221-224 sum the weighted costs for each income group (grp1-grp10) by line and output this into a new data set called aggsum.

```
227  data cstpop1 (drop = _type_ _freq_ popt popc pop1-pop10);
228     if _n_ = 1 then set subagg;
229     set aggsum;
230       grpt = sum (of grp1-grp10);
231       grpc = sum (of grp1-grp9);
232     array ex grpt grpc grp1-grp10;
233     array wt popt popc pop1-pop10;
234      do over ex;
235        ex = ex/wt;
236      end;
237
```

NOTE: The data set WORK.CSTPOP1 has 232 observations and 13 variables.
NOTE: The DATA statement used 0.17 seconds.

Lines 227-236 create two arrays. One array is a vector from the subagg data set that contains the population counts (popt, popc, pop1-pop10). The other is a matrix of the weighted costs by income group. The costs are divided by the population counts.

```
238  data numcus (rename=(popt=grpt popc=grpc pop1=grp1 pop2=grp2
239                 pop3=grp3 pop4=grp4 pop5=grp5 pop6=grp6
240                 pop7=grp7 pop8=grp8 pop9=grp9 pop10=grp10));
241     set subagg;
242     line='000000';
243
```

NOTE: The data set WORK.NUMCUS has 1 observations and 13 variables.
NOTE: The DATA statement used 0.11 seconds.

Lines 238-246 give the population counts a line value so that they can be printed as part of the final output, and then brings them together with the summed cost data set that was calculated with the arrays.

```
244  data cstpop;
245     set numcus cstpop1;
246     by line;
247
```

NOTE: The data set WORK.CSTPOP has 233 observations and 13 variables.
NOTE: The DATA statement used 0.11 seconds.

```
248  data addlab;
249     infile labls lrecl=57;
250     input @1 line $6. @8 title $char50.;
251
```

NOTE: The infile LABLS is:
    FILENAME=d:\intrvw00\labeli00.txt,
    RECFM=V,LRECL=57

NOTE: 116 records were read from the infile LABLS.
    The minimum record length was 57.
    The maximum record length was 57.
NOTE: The data set WORK.ADDLAB has 116 observations and 2 variables.
NOTE: The DATA statement used 0.05 seconds.

Lines 248-250 pull in the label file that will put titles on the final output.

```
252  data pubtab (drop = line);
253     merge cstpop (in = inline)
```

Lines 252-278 merge the summed cost data set with the

```
254        addlab (in = inlabl);
255     by line;
256     if not inlabl then delete;
257
```

titles for printing. The output is formatted and the income groups are given labels. Note that not all groups are printed – the incomplete reporters (grp10) and all consumer units (grpt).

NOTE: The data set WORK.PUBTAB has 116 observations and 13 variables.
NOTE: The DATA statement used 0.11 seconds.

```
258     proc print split='*' uniform;

VIII. DESCRIPTION OF THE SURVEY

The CE program consists of two separate components, each with its own questionnaire and independent sample:

1) An Interview panel survey in which each CU in the sample is interviewed once every 3 months over five consecutive quarters to obtain a year's worth of data. New panels are initiated every month of the year.

2) A Diary or recordkeeping survey completed by the sample CUs for two consecutive 1-week periods; the sample is surveyed across a 12-month period.

Data are collected by the Bureau of the Census under contract with BLS. All data collected in both surveys are subject to Bureau of the Census confidentiality requirements, which prevent the disclosure of any CU member's identity.

The quarterly Interview survey is designed to collect data on major items of expense which respondents can be expected to recall for 3 months or longer. In practice, the Interview survey collects detailed data on an estimated 60 to 70 percent of total household expenditures. In addition, global estimates are obtained for food and other selected items. These global estimates account for an additional 20 to 25 percent of total expenditures. The Interview survey does not collect expenses for housekeeping supplies, personal care products, and nonprescription drugs, which contribute about 5 to 15 percent of total expenditures. Thus, up to 95 percent of total expenditures are covered in the Interview survey. Household characteristics, income, and financial data are also collected. At BLS, each quarter of data is processed independently from other quarters. Thus the annual estimates published by BLS are not dependent on the participation of a CU for the full five interviews.

The initial interview collects demographic and family characteristics data on a Control Card. These pertain to age, sex, race, marital status, education, and CU relationship for each CU member. T his information is updated at each subsequent interview. Expenditures are for the month prior to the interview. They are used along with the inventory information for bounding purposes solely, that is, to prevent the reporting of expenditures from an indefinite past period. Expenditure data from the first interview are not on these files since they are not included in expenditure estimation.

The second through fifth interviews use uniform questionnaires to collect expenditure information from the previous three months. Income information, such as wage, salary, unemployment compensation, child support, and alimony, as well as information on the employment of each CU member age 14 and over, are collected in the second and fifth interviews only.

Income data and employment information collected in the second interview are carried over to the third and fourth interviews. For new CU members and CU members who started work since the previous interview, wage, salary, and other information on employment are collected in the third and fourth interviews. In the fifth interview, a supplement is used to collect information on asset values and changes in balances of assets and liabilities. These data, along with other household characteristics information, permit users to classify sample units for research purposes and allow BLS to adjust population weights for CUs who do not cooperate in the survey.

Each quarter, 20 percent of the sample are new households introduced for the first time. They replace one-fifth of the sample that completed its final interview in the previous quarter. This rotating procedure with overlap is designed to provide more efficient data collection. CUs that move away from their sample address between interviews are dropped from the survey. New CUs that move into the sample address are screened for eligibility and included in the survey. Students living in college- or university-regulated housing report their own expenditures directly, while at school, rather than being considered part of their parents' household.

IX. DATA COLLECTION AND PROCESSING

In addition to its data collection duties, the Bureau of the Census is responsible for field editing and coding, consistency checking, quality control, and data transmittal to BLS. BLS performs additional review and editing procedures in preparing the data for publication and release.

A. BUREAU OF THE CENSUS ACTIVITIES

Data collection activities have been conducted by the Census Bureau on a continuing basis since October 1979. Due to differences in format and design, the Interview survey and the Diary survey data are collected and processed separately. Preliminary Interview survey data processing carried out by the Census Bureau includes keying the data from the questionnaires, clerical data editing, and correcting for inconsistencies in the collected data.

Upon completion by the interviewers, the Interview questionnaires are sent from the regional offices to the Census National Processing Center (NPC) in Jeffersonville, IN. At the NPC, codes are applied to identify demographic characteristics, expenditures, income and assets, and other items such as make and model of automobile and trip destination. Also, missing sections of questionnaires, inconsistencies, and errors are identified and corrected. Prior to microfilming and storage, selected entries from these questionnaires are transcribed to the next quarter's questionnaires to prevent the recording of duplicate reports by respondents. This information is then returned to the regional offices for use by field representatives in subsequent interviews.

After clerical processing at the NPC, the data are transmitted to the Census Processing Center in Suitland, MD, where they pass through basic quality checks of control counts, missing values, etc. The data are then electronically transmitted to BLS in Washington, DC.

B. BUREAU OF LABOR STATISTICS ACTIVITIES

Upon receipt from the Bureau of the Census, the data undergo a series of computer edits that identify and correct irregularities and inconsistencies. Other adjustments eliminate business and reimbursed expenses, apply appropriate sales taxes, and derive CU weights based on BLS specifications. In addition, demographic and work experience items (except income) are imputed when missing or invalid. All data changes and imputations are identified with flags on the Interview data base.

Next, BLS conducts an extensive review to ensure that severe data aberrations are corrected. The review takes place in several stages: a review of counts, weighted means, and unweighted means by region; a review of family relationship coding inconsistencies; a review of selected extreme values for expenditure and income categories; and a verification of the various data transformations.

Cases of extreme data values are investigated by reviewing questionnaires on microfilm. Errors discovered through this procedure are corrected prior to release of the data.

Two major types of data adjustment routines--imputation and allocation--are carried out to classify expenditures and improve estimates. Data imputation routines correct for missing or invalid entries. All fields except income and assets are subject to imputation. Allocation routines are applied when respondents provide insufficient expenditure detail to meet tabulation requirements. For example, reports

of combined expenditures for fuels and utilities are allocated among gas, electricity, and other items in this group. While not strictly an allocation routine, another adjustment separates mortgage and vehicle loan payments into principal and interest components using associated data on the interest rate and term of the loan. Another adjustment is done to prepare the data for the production of calendar year estimates. Time adjustment routines are used to classify expenditures by month. Aggregation can then be done at a monthly level, permitting the production of monthly, quarterly, annual, and other interval estimates. To analyze the effects of these adjustments, tabulations are made before and after the data adjustments. At this point, processing activities are completed and the database is ready for use.

X. SAMPLING STATEMENT

A. SURVEY SAMPLE DESIGN

Samples for the CE are national probability samples of households designed to be representative of the total U. S. civilian population. Eligible population includes all civilian noninstitutional persons.

The first step in sampling is the selection of primary sampling units (PSUs), which consist of counties (or parts thereof) or groups of counties. The set of sample PSUs used for the 2000 and 2001 samples is composed of 105 areas. The design classifies the PSUs into four categories:
- 31 "A" certainty PSUs are Metropolitan Statistical Areas (MSA's) with a population greater than 1.5 million.
- 46 "B" PSUs, are medium-sized MSA's.
- 10 "C" PSUs are nonmetropolitan areas that are included in the CPI.
- 18 "D" PSUs are nonmetropolitan areas where only the urban population data will be included in the CPI.

The sampling frame (that is, the list from which housing units were chosen) for the 2000 and 2001 surveys is generated from the 1990 Census of Population 100-percent-detail file. The sampling frame is augmented by new construction permits and by techniques used to eliminate recognized deficiencies in census coverage. All Enumeration Districts (EDs) from the Census that fail to meet the criterion for good addresses for new construction, and all EDs in nonpermit-issuing areas are grouped into the area segment frame. Interviewers are then assigned to list these areas before a sample is drawn.

To the extent possible, an unclustered sample of units is selected within each PSU. This lack of clustering is desirable because the sample size of the Diary Survey is small relative to other surveys, while the intraclass correlations for expenditure characteristics are relatively large. This suggests that any clustering of the sample units could result in an unacceptable increase in the within-PSU variance and, as a result, the total variance.

The Interview Survey is a panel rotation survey. Each panel is interviewed for five consecutive quarters and then dropped from the survey. As one panel leaves the survey, a new panel is introduced. Approximately 20 percent of the addresses are new to the survey each month.

B. COOPERATION LEVELS

The Interview Survey is a rotating panel survey in which approximately 11,000 sample units are contacted each calendar quarter. Allowing for bounding interviews and nonresponse (including vacancies), the number of participating sample units per quarter is targeted at approximately 7,800. Information on 2000 interview participation follows.

The response rate for the 2000 Interview Survey is 80% as shown below

Consumer units designated for the survey	Type B or C ineligible cases	Eligible housing unit interviews		
		Number of potential interviews	Type A nonresponse	Total respondent interviews
47,498	8,752	38,746	7,736	31,010

Type B or C cases are housing units that are vacant, nonexistent, or ineligible for interview. Type A nonresponses are housing units that the interviewers were unable to contact or the respondents refused to participate in the survey. The response rate stated above is based only on the eligible housing units (i.e., the designated sample cases less Type B and Type C ineligible cases).

C. WEIGHTING

Each CU included in the CE represents a given number of CUs in the U.S. population, which is considered to be the universe. The translation of sample families into the universe of families is known as weighting. However, since the unit of analysis for the CE is a CU, the weighting is performed at the CU level. Several factors are involved in determining the weight for each CU for which an interview is obtained. There are four steps in the weighting procedure:

1) The basic weight is assigned to an address and is the inverse of the probability of selection of the housing unit.

2) A weight control factor is applied to each interview if subsampling is performed in the field.

3) A noninterview adjustment is made for units where data could not be collected from occupied housing units. The adjustment is performed as a function of region, housing tenure, family size and race.

4) A final adjustment is performed to adjust the sample estimates to national population controls derived from the Current Population Survey. The adjustments are made based on both the CU's member composition and the CU as a whole. The weight for the CU is adjusted for individuals within the CU to meet the controls for 14 age/race categories, 4 regions, and 4 region/urban categories. The CU weight is also adjusted to meet the control for total number of CUs and total number of CUs who own their living quarters. The weighting procedure uses an iterative process to ensure that the sample estimates meet all the population controls.

NOTE: The weight for a consumer unit (CU) can be different for each quarter in which the CU participates in the survey, as the CU may represent a different number of CUs with similar characteristics.

D. STATE IDENTIFIER

Since the CE is not designed to produce state-level estimates, summing the CU weights by state will not yield state population totals. A CU's basic weight reflects its probability of selection among a group of primary sampling units of similar characteristics. For example, sample units in an urban nonmetropolitan area in California may represent similar areas in Wyoming and Nevada. Among other adjustments, CUs are post-stratified nationally by sex-age-race. For example, the weights of CUs containing a black male, age 16-24 in Alabama, Colorado, or New York, are all adjusted equivalently. Therefore, weighted population state totals will not match population totals calculated from other surveys that are designed to represent state data.

To summarize, the CE sample was not designed to produce precise estimates for individual states. Although state-level estimates that are unbiased in a repeated sampling sense can be calculated for various statistical measures, such as means and aggregates, their estimates will generally be subject to large variances. Additionally, a particular state population estimate from the CE sample may be far from the true state population.

XI.INTERPRETING THE DATA

Several factors should be considered when interpreting the expenditure data. The average expenditure for an item may be considerably lower than the expenditure by those CUs that purchased the item. The less frequently an item is purchased, the greater the difference between the average for all CUs and the average of those purchasing. (See Section V.A.2.b.ii. for MEANS OF THOSE REPORTING.) Also, an individual CU may spend more or less than the average, depending on its particular characteristics. Factors such as income, age of family members, geographic location, taste and personal preference influence expenditures. Furthermore, even within groups with similar characteristics, the distribution of expenditures varies substantially.

Expenditures reported are the direct out-of-pocket expenditures. Indirect expenditures, which may be significant, may be reflected elsewhere. For example, rental contracts often include utilities. Renters with such contracts would record no direct expense for utilities, and therefore, appear to have lower utility expenses. Employers or insurance companies frequently pay other costs. CU with members whose employers pay for all or part of their health insurance or life insurance would have lower direct expenses for these items than those who pay the entire amount themselves. These points should be considered when relating reported averages to individual circumstances.

XII.APPENDIX 1 -- GLOSSARY

Population
    The civilian noninstitutional population of the United States as well as that portion of the institutional population living in the following group quarters: Boarding houses, housing facilities for students and workers, staff units in hospitals and homes for the aged, infirm, or needy, permanent living quarters in hotels and motels, and mobile home parks. Urban population is defined as all persons living in a Metropolitan Statistical Area (MSA's) and in urbanized areas and urban places of 2,500 or more persons outside of MSA's. Urban, defined in this survey, includes the rural populations within MSA. The general concept of an MSA is one of a large population nucleus together with adjacent communities that have a high degree of economic and social integration with that nucleus. Rural

population is defined as all persons living outside of an MSA and within an area with less than 2,500 persons.

Consumer unit (CU)

A consumer unit comprises either: (1) all members of a particular household who are related by blood, marriage, adoption, or other legal arrangements; (2) a person living alone or sharing a household with others or living as a roomer in a private home or lodging house or in permanent living quarters in a hotel or motel, but who is financially independent; or (3) two or more persons living together who use their income to make joint expenditures. Financial independence is determined by the three major expense categories: housing, food, and other living expenses. To be considered financially independent, at least two of the three major expense categories have to be provided entirely or in part by the respondent.

Reference person

The first member mentioned by the respondent when asked to "Start with the name of the person or one of the persons who owns or rents the home." It is with respect to this person that the relationship of other CU members is determined.

Income before taxes

The combined income earned by all CU members 14 years old or over during the 12 months preceding the interview. The components of income are: Wage and salary income, business income, farm income, Social Security income and Supplemental Security income, unemployment compensation, workmen's compensation, public assistance, welfare, interest, dividends, pension income, income from roomers or boarders, other rental income, income from regular contributions, other income, and food stamps.

Income after taxes

Income before taxes minus personal taxes which includes Federal income taxes, state and local taxes, and other taxes.

Complete income reporters

The distinction between complete and incomplete income reporters is based in general on whether the respondent provides values for major sources of income, such as wages and salaries, self-employment income, and Social Security income. Even complete income reporters may not provide a full accounting of all income from all sources. In the current survey, CUs that report across-the-board zero income are categorized as incomplete reporters.

Geographic regions

CUs are classified by region according to the address at which they reside during the time of participation in the survey. The regions comprise the following States:

Northeast - Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, and Vermont.

Midwest - Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.

South - Alabama, Arkansas, Delaware, District of Columbia, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia.

West - Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming.

XIII. APPENDIX 2 -- UNIVERSAL CLASSIFICATION CODE (UCC) TITLES

*L denotes UCCs that could have negative values Medical care UCCs have negative values if they are reimbursements. Reduction in loan principal UCCs are all negative for programming convenience. However, they are considered positive expenditures in CE publications.

Underlined UCCs represent either a new UCC or a deleted UCC. Please note that new UCCs may not be represented in all quarters. The quarter in which the addition (deletion) occurs is denoted by a leading superscript directly prior to the UCC code. For example, [N(D)001](UCC) identifies a new (deleted) UCC beginning in Q001.

A. EXPENDITURE UCCS ON MTAB FILE

002120 Other non-health insurance
006001 Total amount owed to creditors, 2nd interview
006002 Total amount owed to creditors, 5th interview
*L 006003 Total amount owed to creditors, 2nd interview, asked first quarter, current year (2000)
*L 006004 Total amount owed to creditors, 5th interview, asked first quarter, current year (2000)
006005 Total amount owed to creditors, 2nd interview, asked first quarter, current year + 1 (2001)
006006 Total amount owed to creditors, 5th interview, asked first quarter, current year +1 (2001)
190901 Food or board, at school and rooming/boarding houses
190902 Catered affairs
190903 Food and non-alc beverages at restaurants, cafes, fast food places on trips
190904 Food and beverages purchased and prepared by CU on trips
200900 Alcoholic beverages at restaurants, cafes, bars on trips
210110 Rent of dwelling
210210 Lodging away from home on trips
210310 Housing for someone at school
210901 Ground rent - owned home
210902 Ground rent - owned vacation home
220121 Homeowners insurance - owned home includeng fire and extended coverage; management fees for property insurance in coops (non-vacation)
220122 Same as 220121 - owned vacation home, vacation coops
220311 Mortgage interest - owned home; portion of management fees for repayment of loans in coops (non-vacation)
220211 Property taxes - owned home; management fees for property taxes in coops (non-vacation)
220212 Same as 220211 - owned vacation home, vacation coops
220312 Same as 220311 - owned vacation home; vacation coops
220313 Interest on home equity loan - owned home
220314 Interest on home equity loan - owned vacation home
220321 Penalty charges on special or lump-sum mortgage payment - owned home
220322 Penalty charges on special or lump-sum mortgage payment - owned vacation home
220512 Cost of supplies purchased for jobs considered addition, alteration, or new construction incl. dwellings and additions being built, finishing basement or attic, remodeling rooms, landscaping, building outdoor patios, driveways, or permanent swimming pools, and insulation - owned home
220513 Same as 220512 - owned vacation home
220611 Contractors' labor and material costs, and cost of supplies rented for jobs considered addition, alteration, or new construction (see 220512) - owned home; management fees for capital improvements in condos and coops (non-vacation)
220612 Built-in dishwasher, garbage disposal, or range hood for jobs considered addition, alteration, or new construction - owned home and vacation home
220615 Same as 220611 - owned vacation home; vacation condos and coops

220616 Installed and non-installed original wall to wall carpeting for owned homes
220901 Parking at owned home; management fees for parking in condos and coops (non-vacation)
220902 Parking at owned vacation home, vacation condos and coops
230112 Contractors labor and material costs, and cost of supplies rented for inside and outside painting and papering for jobs considered replacement or maintenance/repair - owned home; management fees for similar jobs in condos and coops (non-vacation)
230113 Same as 230112 for plumbing or water heating installations and repairs
230114 Same as 230112 for electrical work and heating or air - conditioning jobs (incl. service contracts)
230115 Same as 230112 for roofing, gutters, or downspouts
230117 Built-in dishwasher, garbage disposal, or range hood for jobs considered replacement or maintenance/repair - renter
230118 Same as 230117 - owned home
230121 Contractors' labor and material costs, and cost of supplies rented for repair or replacement of hard surfaced flooring - renter
230122 Contractors' labor and material costs, and cost of supplies rented for repair or replacement of hard surfaced flooring for jobs considered replacement or maintenance/repair- owned home; management fees for similar jobs in condos and coops (non-vacation)
230123 Same as 230122 - owned vacation home; vacation condos and coops
230133 Installed and non-installed replacement wall to wall carpeting for owned homes
230134 Installed and non-installed original wall to wall carpeting for rental homes
230141 Service contract charges and cost of maintenance or repair for built-in dishwasher, garbage disposal, or range hood - renter
230150 Repair or maintenance services (renter)
230151 Other repair or maintenance services (owned)
230152 Repair and remodeling services (owned vacation)
230142 Same as 230141 - owned home and vacation home
230901 Property management fees - owned home; condos and coops (non-vacation)
230902 Same as 230901 - owned vacation home; vacation condos and coops
240111 Cost of paint, wallpaper, and supplies purchased for inside and outside painting and papering - renter
240112 Same as 240111 - for jobs considered replacement or maintenance/repair - owned home
240113 Same as 240112 - owned vacation home
240121 Cost of equipment purchased for inside and outside painting and papering - renter
240122 Same as 240121 - for jobs considered replacement or maintenance/repair - owned home
240123 Same as 240122 - owned vacation home
240211 Cost of supplies purchased for plastering, paneling, roofing and gutters, siding, windows, screens, doors, awnings; portion of cost of supplies purchased for patios, walks, fences, driveways, swimming pools - renter
240212 Cost of supplies purchased for plastering, paneling, siding, windows, screens, doors, awnings for jobs considered replacement or maintenance/repair; portion of cost of supplies purchased for patios, walks, fences, driveways, swimming pools for jobs considered replacement or maintenance/repair - owned home
240213 Cost of supplies purchased for roofing, gutters, or downspouts for jobs considered replacement or maintenance/repair - owned home
240214 Same as 240212-240213 - owned vacation home
240221 Cost of supplies purchased for masonry, brick or stucco work; portion of cost of supplies purchased for patios, walks, fences, driveways, swimming pools - renter
240222 Same as 240221 for jobs considered replacement or maintenance/repair - owned home
240223 Same as 240222 - owned vacation home
240311 Cost of supplies purchased for plumbing or water heating installations and repairs - renter
240312 Same as 240311 for jobs considered replacement or maintenance/repair - owned home
240313 Same as 240312 - owned vacation home
240321 Cost of supplies purchased for electrical work, heating or air conditioning jobs - renter
240322 Same as 240321 for jobs considered replacement or maintenance/repair - owned home
240323 Same as 240322 - owned vacation home

250111 Fuel oil - renter
250112 Fuel oil - owned home; portion of management fees for utilities in condos and coops (non
       vacation)
250113 Same as 250112 - owned vacation home; vacation condos and coops
250114 Fuel oil - rented vacation property
250211 Gas, bottled or tank - renter
250212 Gas, bottled or tank - owned home
250213 Gas, bottled or tank - owned vacation home
250214 Gas, bottled or tank - rented vacation property
250221 Coal - renter
250222 Coal - owned home
250223 Coal - owned vacation home
250224 Coal - rented vacation property
250901 Wood, kerosene, and other fuels - renter
250902 Wood, kerosene, and other fuels - owned home
250903 Wood, kerosene, and other fuels - owned vacation home
250904 Wood, kerosene, and other fuels - rented vacation property
260111 Electricity - renter
260112 Electricity - owned home; portion of management fees for utilities in condos and coops (non-
       vacation)
260113 Same as 260112 - owned vacation home; vacation condos and coops
260114 Electricity - rented vacation property
260211 Natural or utility gas - renter
260212 Natural or utility gas - owned home; portion of management fees for utilities in condos and
       coops (non-vacation)
260213 Same as 260212 - owned vacation home; vacation condos and coops
260214 Natural or utility gas - rented vacation property
270101 Telephone services, excluding mobile car phones
270102 Telephone service for mobile car phones
270211 Water and sewerage maintenance - renter
270212 Water and sewerage maintenance - owned home; portion of management fees for utilities in
       condos and coops (non-vacation)
270213 Same as 270212 - owned vacation home; vacation condos and coops
270214 Water and sewerage maintenance - rented vacation property
270310 Community antenna or cable TV; portion of management fees for utilities in condos and
       coops
270411 Trash and garbage collection - renter
270412 Trash and garbage collection - owned home; management fees for trash collection in condos
       and coops (non-vacation)
270413 Same as 270412 - owned vacation home; vacation condos and coops
270414 Trash and garbage collection - rented vacation property
270901 Septic tank cleaning - renter
270902 Septic tank cleaning - owned home
270903 Septic tank cleaning - owned vacation home
270904 Septic tank cleaning - rented vacation property
280110 Bathroom linens
280120 Bedroom linens
280130 Kitchen and dining room linens
280210 Curtains and drapes
280220 Slipcovers, decorative pillows, and cushions
280230 Sewing materials for slipcovers, curtains, and other home handiwork
280900 Other linens
290110 Mattresses and springs
290120 Other bedroom furniture
290210 Sofas
290310 Living room chairs

290320 Living room tables
290410 All kitchen and dining room furniture
290420 Infants' furniture
290430 Patio, porch, or outdoor furniture
290440 Modular wall units, shelves or cabinets; other living room, family or recreation room furniture including desks
300111 Purchase and installation of refrigerator or home freezer - renter
300112 Purchase and installation of refrigerator or home freezer - homeowner
300211 Purchase and installation of clothes washer - renter
300212 Purchase and installation of clothes washer - homeowner
300221 Purchase and installation of clothes dryer - renter
300222 Purchase and installation of clothes dryer - homeowner
300311 Purchase and installation of cooking stove, range or oven, excl. microwave - renter
300312 Purchase and installation of cooking stove, range or oven, excl. microwave - homeowner
300321 Purchase and installation of microwave oven - renter
300322 Purchase and installation of microwave oven - homeowner
300331 Purchase and installation of portable dishwasher - renter
300332 Purchase and installation of portable dishwasher - homeowner
300411 Window air conditioner - renter
300412 Window air conditioner - homeowner
310110 Black and white TV, and combinations of TV with other items
310120 Color TV console and combinations of TV; large screen color TV projection equipment; color monitor and other items
310130 Color TV (portable and table models)
310210 VCR, video disc player, video camera, and camcorder
310220 Video cassettes, tapes, and discs
310230 TV computers games and computer game software
310311 Radio
310313 Tape recorder and player
310320 Sound components, component systems, and compact disc sound systems
310333 Accessories and other sound equipment including phonographs
310334 Satellite dishes
310341 Compact discs, tapes, videos, or records purchased from a club
310342 Compact discs, tapes, needles, or records not from a club
320111 Carpet squares for owned and rented homes (Non-Permanent)
320120 Venetian blinds, window shades and other window coverings
320130 Infants' equipment
320150 Outdoor equipment
320162 Non-installed wall to wall carpeting (replacement) and carpet squares - homeowner
320163 Installed and non-installed replacement wall to wall carpeting for rental homes
320210 Clocks
320220 Lamps and other lighting fixtures
320231 Other household decorative items
320232 Telephones and accessories
320310 Plastic dinnerware
320320 China and other dinnerware
320330 Stainless, silver and other flatware
320340 Glassware
320350 Silver serving pieces
320360 Serving pieces other than silver
320370 Non-electric cookware
320410 Lawnmowing equipment and other yard machinery
320420 Power tools
320511 Electric floor cleaning equipment
320512 Sewing machines
320521 Small electrical kitchen appliances

320522 Portable heating and cooling equipment
320611 Cost of supplies purchased for insulation and other improvements/repairs; materials and supplies purchased not for any specific job - renter
320612 Cost of supplies purchased for insulation and other improvements/repairs for jobs considered replacement or maintenance/repair; materials and supplies purchased not for any specific job - owned home
320613 Cost of supplies purchased for insulation and other improvements/repairs for jobs considered replacement or maintenance/repair - owned vacation home
320621 Cost of supplies purchased for repair or replacement of hard surfaced flooring - renter
320622 Cost of supplies purchased for repair or replacement of hard surfaced flooring for jobs considered replacement or maintenance/repair - owned home
320623 Same as 320622 - owned vacation home
320631 Cost of supplies purchased for landscaping - renter
320632 Cost of supplies purchased for landscaping for jobs considered replacement or maintenance/repair - owned home
320633 Same as 320632 - owned vacation home
320901 Office furniture for home use
320902 Non-power tools
320903 Fresh flowers or potted plants
320904 Closet storage items
330511 Cost of materials purchased for termite and pest control for jobs considered replacement or maintenance/repair
340211 Babysitting or other child care in your own home
340212 Babysitting or other child care in someone else's home
340310 Housekeeping service, incl. management fees for maid service in condos
340410 Gardening and lawn care services, incl. management fees for lawn care in coops and condos
340420 Water softening service
340510 Moving, storage, and freight express
340520 Non-clothing household laundry or dry cleaning - not coin-operated
340530 Non-clothing household laundry or dry cleaning - coin-operated
340610 Repair of television, radio, and sound equipment, excluding installed in vehicles
340620 Repair of household appliances, excl. garbage disposal, range hood, and built-in dishwasher
340630 Furniture repair, refinishing, or reupholstering
340901 Rental or repair of equipment and other yard machinery, power and non-power tools
340902 Rental of televisions
340903 Miscellaneous home services and small repair jobs not already specified
340904 Rental of furniture
340905 Rental of VCR, radio, and sound equipment - see 310210, 310311-310330
340906 Care for invalids, convalescents, handicapped or elderly persons in the CU
340907 Rental and installation of household equipment - see 300111-300332
340908 Rental of office equipment for non-business use - see 320232, 690111, 690112, 690210-690230
340910 Adult day care centers
340911 Management fees for security, incl. guards and alarm systems in coops and condos (non-vacation)
340912 Management fees for security, incl. guards and alarm systems in coops and condos (vacation)
340914 Services for termite/pest control maintenance
340915 Service fee expenditures for home security systems
350110 Tenant's insurance
360110 Men's suits
360120 Men's sport coats
360210 Men's coats, jackets, and furs
360311 Men's underwear
360312 Men's hosiery

360320 Men's nightwear
360330 Men's accessories
360340 Men's sweaters and vests
360350 Men's active sportswear
360410 Men's shirts
360511 Men's pants
360512 Men's shorts and shorts sets, excl. athletic
360901 Men's uniforms
360902 Men's other clothing, incl. costumes
370110 Boys' coats, jackets, and furs
370120 Boys' sweaters
370130 Boys' shirts
370211 Boys' underwear
370212 Boys' nightwear
370213 Boys' hosiery
370220 Boys' accessories
370311 Boys' suits, sport coats, and vests
370312 Boys' pants
370313 Boys' shorts and shorts sets, excl. athletic
370902 Boys' other clothing, incl. costumes
370903 Boys' uniforms
370904 Boys' active sportswear
380110 Women's coats, jackets, and furs
380210 Women's dresses

980300   Percent reference person with high school education
980310   Percent reference person with college education
980320   Percent reference person with no education/other
980330   Percent vehicle owner
980340   Percent of CUs with at least one leased auto, truck, or van
980350   Percent of CUs with at least one owned or leased vehicle
980360   Number of vehicles leased

XIV. APPENDIX 3 -- UCC AGGREGATION

The following shows the UCC aggregation used in the sample program. This information is provided on the AGGregation and LABel files (Section III.F.6. PROCESSING FILES). New and used aircraft purchases are not on the microdata files for confidentiality reasons. They are included in the published CE tables so transportation estimates based on these data may vary slightly from BLS published tables.

TOTAL EXPENDITURES
    002120, 190901-220322, 220901-450110, 450210, 450220, 450310, 450313-450410, 450413-

XVI.APPENDIX 5 -- PUBLICATIONS AND DATA RELEASES FROM THE CONSUMER EXPENDITURE SURVEY

A partial list of publications containing data from the CE program appears below. Bulletins may be purchased from the Chicago regional sales center, from the U.S. Government Printing Office, Washington D.C., 20402, or from National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22161. To place a telephone order with National Technical Information Service, call (703)-487-4650, or for a rush order, call 1(800)-553-NTIS.

Consumer Expenditures in 2000, Report 958 (2002)	Consumer unit income and expenditures, integrated data from Diary and Interview Surveys, classified by consumer unit characteristics. 10 tables. Available on request (202)691-6900.
Consumer Expenditure Survey, 1998-99, Report 955	Consumer unit income and expenditures, integrated data from Interview and Diary Surveys, classified by consumer unit characteristics: one way and cross tabulations, relative and aggregate shares. 64 tables.
Consumer Expenditures in 1999, Report 949 (2001)	Consumer unit income and expenditures, integrated data from Diary and Interview Surveys, classified by consumer unit characteristics. 10 tables. Available on request (202)691-6900.
Consumer Expenditures in 1998, Report 940 (2000)	Consumer unit income and expenditures, integrated data from Diary and Interview Surveys, classified by consumer unit characteristics. 10 tables. Available on request (202)691-6900.
Consumer Expenditure Survey, 1996-97, Report 935 (September 1999)	Consumer unit income and expenditures, integrated data from Interview and Diary Surveys, classified by consumer unit characteristics: one way and cross tabulations, relative and aggregate shares. 64 tables.
Consumer Expenditures in 1997, Report 927 (1999)	Consumer unit income and expenditures, integrated data from Diary and Interview Surveys, classified by consumer unit characteristics. 10 tables. Available on request (202)691-6900.

For information on the availability of prior publications, please contact us at (202)691-6900 or e-mail us at CEXinfo@bls.gov.

CONSUMER EXPENDITURE SURVEY DATA ON THE INTERNET

Commonly-requested CE data tables can be found on-line at http://www.bls.gov/cex/. The following One and Two-year Tables of integrated Diary and Interview data are available under the Tables Created by BLS heading:

One Year Tables

Standard Tables from 1984-2000
Expenditure Shares Tables from 1998-2000
Aggregate Expenditure Shares Tables from 1998-2000

Two Year Tables

> *Cross-Tabulated Tables* from 1986-2000
> *Metropolitan Statistical Area Tables* from 1986-2000
> *Region Tables* from 1998-2000
> *High Income Tables* from 1998-2000
> *Multi-Year Tables* for 1984-1992 and 1993-2000

FAX ON DEMAND - FAXSTAT

FAXSTAT contains information and data that may be faxed to users from a touch-tone phone 24 hours a day -- 7 days a week. To receive FAXSTAT transmissions dial (202) 691-7006 and follow the voice prompts. Consumer Expenditure Survey data that are accessible on FAXSTAT are for the most recent year available

PUBLIC-USE TAPES

Public-use microdata tapes for the Diary and Interview Surveys are available for single years from 1984 to 1995, and as two-year tapes for 1982-83 and 1980-81. Seven public-use tapes are available from the 1972-73 survey including Diary Survey – Detailed, Food Quantity, and Integrated Adjusted; Quarterly Interview Survey- Summary, Detailed, Inventory of Consumer Durables, and Quantity of Clothing and Household Textiles. Information about the tapes is available from the BLS national office. (See Section XVII. INQUIRIES, SUGGESTIONS, AND COMMENTS)

CD-ROMS

CE microdata on CD-Rom are available from the Bureau of Labor Statistics for 1972-73, 1980-81, 1990-91, 1992-93, and for each individual year from 1994-2000. The 1980-81 through 2000 releases contain Interview and Diary data, while the 1972-73 CD includes Interview data only. The 1980-81, and the 1990 files (of the 1990-91 CD) include selected EXPN data, while the 1991 files (from the 1990-91 CD) and the 1992-93 CD do not. In addition to the Interview and Diary data, the CDs from 1994-2000 include the complete collection of EXPN files. A 1984-94 "multi-year" CD that presents Interview FMLY file data is also available. In addition to the microdata, the CD's also contain the same integrated Diary and Interview tabulated data (1984-present) that are found on the Consumer Expenditure Survey web site (http://www.bls.gov/cex).

STATE CODES ON DISKETTE

State codes from 1982 to 1993 are available on diskette for the Interview Survey. The diskettes contain the variables NEWID and STATE, thus enabling the microdata user to identify the states in which consumer units reside. Caution should be exercised when analysis is done by state, due to the composition of some PSUs. PSUs in some state border areas may not be unique to one state, but may contain CUs from two or more states. (See Section X.D. STATE IDENTIFIER.) Also, because of nondisclosure requirements STATE has been suppressed for some sampled CUs. (See Section IV.A. CU CHARACTERISTICS AND INCOME FILE (FMLY.)) The state data diskettes are free and may be obtained by contacting the BLS national office. (See Section XVII. INQUIRIES, SUGGESTIONS, AND COMMENTS)

XVII. INQUIRIES, SUGGESTIONS, AND COMMENTS

If you have any questions, suggestions, or comments about the survey, the microdata, or its documentation, please call (202) 691-6900 or email cexinfo@bls.gov.

Written suggestions and comments should be forwarded to:

Division of Consumer Expenditure Surveys
Branch of Information and Analysis
Bureau of Labor Statistics, Room 3985
2 Massachusetts Ave. N.E.
Washington, DC. 20212-0001

The Bureau of Labor Statistics will use these responses in planning future releases of the microdata.
