

in triplicate copies to the FAA at the following address: Mr. G. Thomas Wade, Federal Aviation Administration, Southwest Region, Airports Division, Planning and Programming Branch, ASW-611; Fort Worth, Texas 76193-0610.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. Davis Dickson, Manager of Tyler Pounds Regional Airport at the following address: Airport Manager, Tyler Pounds Regional Airport, 700 Skyway Blvd., Suite 201, Tyler, TX 75704.

Air carriers and foreign air carriers may submit copies of the written comments previously provided to the Airport under § 158.23 of Part 158.

FOR FURTHER INFORMATION CONTACT: Mr. G. Thomas Wade, Federal Aviation Administration, Southwest Region, Airports Division, Planning and Programming Branch, ASW-611, Fort Worth, Texas 76193-0610, (817) 222-5613.

This application may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Tyler Pounds Regional Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Pub. L. 101-508) and Part 158 of the Federal Aviation Regulations (14 CFR Part 158).

On December 23, 2002 the FAA determined that the application to impose and use the revenue from a PFC submitted by the Airport was substantially complete within the requirements of § 158.25 of Part 158. The FAA will approve or disapprove the application, in whole or in part, no later than April 15, 2003.

The following is a brief overview of the application.

Level of the proposed PFC: \$4.50.

Proposed charge effective date: April 1, 2008.

Proposed charge expiration date: February 1, 2017.

Total estimated PFC revenue: \$2,140,662.

PFC application number: 03-04-C-00-TYR.

Brief description of proposed project(s):

Projects To Impose and Use PFC's

1. Acquire and Install One Passenger Loading Bridge
2. Construct Terminal Apron and Security Fencing
3. Terminal Site Clearing and Utility Site Preparation

4. Construct Terminal Building

5. Seal Coat Runway 4/22

6. PFC Application and Administrative Fees

Proposed class or classes of air carriers to be exempted from collecting PFC's: None.

Any person may inspect the application in person at the FAA office listed above under **FOR FURTHER INFORMATION CONTACT** and at the FAA regional Airports office located at: Federal Aviation Administration, Southwest Region, Airports Division, Planning and Programming Branch, ASW-610, 2601 Meacham Blvd., Fort Worth, Texas 76137-4298.

In addition, any person may, upon request, inspect the application, notice and other documents germane to the application in person at Tyler Pounds Regional Airport.

Issued in Fort Worth, Texas on December 24, 2002.

Joseph G. Washington,

Acting Manager, Airports Division.

BILLING CODE 4910-13-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Draft Programmatic 4(f) Evaluation and Approval for Federal Highway Administration (FHWA) Projects That Necessitate the Use of Bridges Over the National Register of Historic Places (NRHP) Listed or Eligible New York State Canal System (Historic Canal System)

This statement sets forth the basis for a programmatic section 4(f) evaluation and approval that there are no feasible and prudent alternatives to the use of bridges eligible for or listed on the NRHP (Historic Bridges) over the Historic Canal System to be replaced with Federal transportation funds and that the projects include all possible planning to minimize harm resulting from such use. This programmatic 4(f) evaluation satisfies the requirements of section 4(f) for all projects that meet the applicability criteria listed below. No individual section 4(f) evaluation needs to be prepared for such projects. This approval is made pursuant to section 4(f) of the Department of Transportation Act of 1966, 49 U.S.C. 303, and section 18(a) of the Federal-Aid Highway Act of 1968, 23 U.S.C. 138.

Use

This programmatic 4(f) evaluation is to be used in conjunction with 36 CFR part 800 Programmatic Agreement for

Bridges over the New York State Canal System (Canal Agreement) executed April 16, 2001. The Canal Agreement satisfies the section 106 requirements for canal bridge projects developed and agreed to be the FHWA, the New York State Department of Transportation (NYSDOT), the State Historic Preservation Officer (SHPO), and the Advisory Council on Historic Preservation (ACHP). The evaluation of alternatives and documentation prepared for the section 106 process shall be used as the basis for the FHWA finding that there are no prudent and feasible alternatives to the use of the affected bridge on the Historic Canal System.

The resources covered by this programmatic section 4(f) evaluation include Historic Bridges which are eligible for the NHRP as contributing elements to the Historic Canal System. Though these Historic Bridges are on the Historic Canal System, they must perform as an integral part of a modern transportation system. When they do not or cannot, they must be replaced in order to assure public safety while maintaining system continuity and integrity. For the purpose of this programmatic section 4(f) evaluation, a proposed action will constitute a "use" of a Historic Bridge that is on the Historic Canal System when the action will have an adverse effect as applied by the requirements of section 106 of the National Historic Preservation Act and 36 CFR part 800. Rehabilitation of a Historic Bridge will rarely constitute an adverse effect on the Historic Canal System.

Applicability

This programmatic section 4(f) evaluation may be applied by the FHWA to projects or approvals which meet the following criteria:

1. The Historic Bridge is to be replaced or rehabilitated with Federal funds.
2. The project will require the use of a Historic Bridge that is on the Historic Canal System.
3. The project will have an adverse effect on Historic Bridges and/or the Historic Canal System.
4. The bridge is not a National Historic Landmark.

5. The project will not impact any areas of archaeological sensitivity that have the potential to yield sites containing important research information. If a site exists, it does not warrant preservation in place as: (1) It is not considered valuable for its permanent *in-situ* public interpretive value, (2) the technology exists for satisfactory data recovery (even if data

recovery is not determined appropriate treatment at this time, (3) the site has no traditional cultural significance to Indian tribes, and (4) the site does not contain or is unlikely to contain human remains, funerary objects, sacred objects or items of cultural patrimony as defined by the Native American Graves Protection and Repatriation Act of 1990.

6. The FHWA Division Administrator determines that the facts of the project match those set forth in the sections of this document labeled Alternatives, Findings, and Measures to Minimize Harm.

7. Agreement among the FHWA, NYSDOT, the State Historic Preservation Officer (SHPO), and the Advisory Council on Historic Preservation (ACHP) has been reached through the Programmatic Agreement for Historic Bridges over the Historic Canal System or individually through procedures pursuant to section 106 of the NHPA.

Alternatives

The following alternatives avoid any use of the historic resource:

1. Do nothing.
2. Replacement of the same design type (*i.e.*, build a new truss bridge to replace a truss bridge that is not individually eligible on the NRHP.)
3. Build a new structure at a different location without affecting the integrity of the Historic Bridge, or the Historic Canal System as determined by the Canal Agreement or procedures individually implementing the NHPA.
4. Rehabilitation, including minor widening, of an existing bridge without affecting its visual characterization from the shore and the canal.
5. Removal of a bridge that does not contribute to the Historic Canal System.
6. Sale or transfer of ownership of a Historic Bridge with covenant to retain its character.
7. Rehabilitation of an individually eligible Historic Bridge without affecting the historic integrity of the bridge or of the Historic Canal System, as determined by the Canal Agreement or procedures individually implementing the NHPA.

This list is intended to be all-inclusive. The programmatic section 4(f) evaluation does not apply if a reasonable alternative is identified that is not discussed in this document. The project record must clearly demonstrate that each of the above alternatives was fully evaluated and it must further demonstrate that all applicability criteria listed above were met before the FHWA Division Administrator concluded that the programmatic

section 4(f) evaluation applied to the project.

Findings

In order for this programmatic section 4(f) evaluation to be applied to a project, each of the following findings must be supported by the circumstances, studies, and consultations on the project:

1. *Do Nothing*. The do nothing alternative has been studied. The do nothing alternative ignores the basic transportation need. For the following reasons this alternative is not feasible and prudent:
 - a. Maintenance—The do nothing alternative does not correct the situation that causes the Historic Bridge to be considered structurally deficient or deteriorated. These deficiencies can lead to sudden collapse and potential injury or loss of life. Normal maintenance is not considered adequate to cope with the situation.

- b. Safety—The do nothing alternative does not correct the situation that causes the Historic Bridge to be considered deficient. Because of these deficiencies the bridge poses serious and unacceptable safety hazards to the traveling public or places intolerable restriction on transport and travel.

2. *Build on New Location Without Using the Historic Bridge*. Investigations have been conducted to construct a bridge on a new location or parallel to the Historic Bridge (allowing for a one-way couplet), but for one or more of the following reasons, this alternative is not feasible and prudent:

- a. Terrain—The present bridge structure has already been located at the only feasible and prudent site, *i.e.*, a gap in the land form, the narrowest point of the river canyon, etc. Construction of a new bridge at another site will result in extraordinary bridge and roadway approach costs, extraordinary difficulty of construction, and/or extraordinary disruption to established traffic patterns.

- b. Adverse Social, Economic, or Environmental Effects—Building a new bridge away from the present site would result in social, economic, or environmental impact of extraordinary magnitude. Such impacts as extensive severing of productive farmlands, displacement of a significant number of families or businesses, serious disruption of established travel patterns, and access and damage to wetlands may individually or cumulatively weigh heavily against relocation to a new site.

- c. Engineering and Economy—Where difficulty associated with the new location is less extreme than those encountered above, a new site would

not be feasible and prudent where cost and engineering difficulties reach extraordinary magnitude. Factors supporting this conclusion include significantly increased roadway and structure costs, serious foundation problems, or extreme difficulty in reaching the new site with construction equipment. Additional design and safety factors to be considered include an ability to achieve minimum design standards or to meet requirements of various permitting agencies such as those involved with navigation, pollution, and the environment.

- d. Preservation of the Historic Bridge—It is not feasible and prudent to preserve the existing bridge, even if a new bridge were to be built at a new location. This could occur when the Historic Bridge is beyond rehabilitation for a transportation or an alternative use, when no responsible party can be located to maintain and preserve the bridge, or when a permitting authority requires removal or demolition of the Historic Bridge.

3. *Rehabilitation without affecting the historic integrity of the bridge*. Studies of rehabilitation measures have been conducted, but, for one or more of the following reasons, this alternative is not feasible and prudent:

- a. The Historic Bridge is so structurally deficient that it cannot be rehabilitated to meet minimum acceptable load requirements without affecting the historic integrity of the bridge.

- b. The Historic Bridge is seriously deficient geometrically and cannot be widened to meet the minimum required capacity of the highway system on which it is located without affecting the historic integrity of the bridge. Flexibility in the application of the American Association of State Highway and Transportation Officials geometric standards should be exercised as permitting in 23 CFR part 625 during the analysis of this alternative.

Measures To Minimize Harm

This programmatic section 4(f) evaluation and approval may be used only for projects where the FHWA Division Administrator, in accordance with this evaluation, ensures that the proposed action includes all possible planning to minimize harm. This has occurred when:

1. For bridges that are to be rehabilitated, the historic integrity of the bridge is preserved, to the greatest extent possible, consistent with unavoidable transportation needs, safety, and load requirements;
2. FHWA ensures that, in accordance with the Canal Agreement, the Historic

American Engineering Record (HAER) standard records appropriate for documentation of the bridges are prepared for bridges that are removed, demolished, or are rehabilitated to the point that the historic integrity is affected.

3. For bridges that are to be replaced, the existing bridge is made available for an alternative use, provided a responsible party agrees to maintain and preserve the bridge; and

4. For bridges that are adversely affected, agreement among the NYSDOT, SHPO, and FHWA, is reached through the Canal Agreement, or through procedures individually implementing the NHPA, on measures to minimize harm and those measures are incorporated into the project. This programmatic section 4(f) evaluation does not apply to projects where such an agreement cannot be reached.

Procedures

This programmatic section 4(f) evaluation applies only when the FHWA Division Administrator:

1. Determines that the project meets the applicability criteria set forth above;
2. Determines that all of the alternatives set forth in the findings section have been fully evaluated;
3. Determines by use of the findings in this document that there are no feasible and prudent alternatives to the use of the historic bridge;
4. Determines that the project complies with the Measures to Minimize Harm section of this document;
5. Assures that implementation of the measures to minimize harm is completed;
6. Documents in the project file that the programmatic section 4(f) evaluation applies to the project on which it is to be used and;
7. Insures that the provisions of the Canal Agreement are followed to protect the integrity of the Historic Bridge and Historic Canal System.

Coordination

The Programmatic Agreement concerning Historic Bridges over the Historic Canal System is being

coordinated with the New York State Department of Transportation and the New York State Historic Preservation Officer. Pursuant to section 4(f), this programmatic agreement is being coordinated with the New York State Department of Transportation, the New York State Canal Corporation, and Departments of the Interior, Agriculture, and Housing and Urban Development.

Before applying this programmatic evaluation to projects requiring an individual bridge permit, the District Administrator shall coordinate with the U.S. Coast Guard District Commander.

Issued on January 6, 2003.

Vincent P. Barone,

Assistant Division Administrator, New York Division, Federal Highway Administration.

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket Nos. FMCSA-2000-7165, FMCSA-2000-7363, and FMCSA-2000-8203]

Qualification of Drivers; Exemption Applications; Vision

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of renewal of exemption; request for comments.

SUMMARY: This notice publishes the FMCSA's decision to renew the exemptions from the vision requirement in the Federal Motor Carrier Safety Regulations for nine individuals.

DATES: This decision is effective January 13, 2003. Comments from interested persons should be submitted by February 12, 2003.

ADDRESSES: You can mail or deliver comments to the U.S. Department of Transportation, Dockets Management Facility, Room PL-401, 400 Seventh Street, SW., Washington, DC 20590-0001. You can also submit comments at <http://dms.dot.gov>. Please include the docket numbers that appear in the heading of this document in your

submission. You can examine and copy this document and all comments received at the same Internet address or at the Dockets Management Facility from 9 a.m. to 5 p.m., e.t., Monday through Friday, except Federal holidays. If you want us to notify you that we received your comments, please include a self-addressed, stamped envelope or postcard.

Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review the Department of Transportation's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (Volume 65, Number 70; Pages 19477-78) or you may visit <http://dms.dot.gov>.

FOR FURTHER INFORMATION CONTACT: Ms. Sandra Zywockarte, Office of Bus and Truck Standards and Operations, (202) 366-2987, FMCSA, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Exemption Decision

Under 49 U.S.C. §§ 31315 and 31136(e), the FMCSA may renew an exemption from the vision requirement in 49 CFR 391.41(b)(10), which applies to drivers of commercial motor vehicles in interstate commerce, for a 2-year period if it finds "such exemption would likely achieve a level of safety that is equivalent to, or greater than, the level that would be achieved absent such exemption." The procedures for receiving an exemption (including renewals) are set out in 49 CFR Part 381. This notice addresses nine individuals who have requested renewal of their exemptions in a timely manner. The FMCSA has evaluated these nine petitions for renewal on their merits and decided to extend each exemption for a renewable 2-year period. They are:

Timothy J. Bryant	Thomas D. Laws	Clifford C. Priesmeyer.
Robert J. Johnson	Leo L. McMurray	George S. Rayson.
Charles R. Kuderer	Jimmy R. Millage	Gerald R. Rietmann.

These exemptions are extended subject to the following conditions: (1) That each individual have a physical exam every year (a) by an

ophthalmologist or optometrist who attests that the vision in the better eye continues to meet the standard in 49 CFR 391.41(b)(10), and (b) by a medical

examiner who attests that the individual is otherwise physically qualified under 49 CFR 391.41; (2) that each individual provide a copy of the ophthalmologist's
