

the term of the Council again for two years.

Since the last charter renewal, the Council has provided the Commission with critically important recommendations regarding numbering issues. During the term of the prior amended charter, the Council made recommendations on issues which included: (1) Local Number Portability provisioning flows; (2) Management and Ownership of the Centralized Toll Free Database by an LLC; (3) Use of Telephone Numbers as a Universal Service Fund Allocator; (4) review of the definition of Intermediate Numbers; (5) impact of Soft Dial Tone service; (6) costs and benefits of numbering resource optimization proposals to expand the NANP beyond 10 digits; (7) technical viability of increasing the Pooling Contamination Threshold; (8) Pooling Administration System Forecasting Requirements; (9) Grandfathered Wireless NXX Codes; (10) NPAC Change Management Administration; (11) possible "Jeopardy" for Wireless Number Pooling and Portability Deadline; and (12) Technical Requirements for the North American Numbering Plan Administrator (NANPA). In May 2002 and May 2003, the Council provided a detailed evaluation of the NANPA's performance for the periods January 2001–December 2001 and January 2002–December 2002, respectively. The Council will continue to evaluate NANPA's performance annually.

Moreover, the Council is presently considering and formulating recommendations on other important numbering-related issues that will require work beyond the term of the present charter. The term of the Council's renewed charter begins October 5, 2003 and runs through October 4, 2005.

The value of this federal advisory committee to the telecommunications industry and to the American public cannot be overstated. Numbers are the means by which consumers gain access to, and reap the benefits of, the public switched telephone network. The Council's recommendations to the Commission will facilitate fair and efficient numbering administration in the United States, and will ensure that numbering resources are available to all telecommunications service providers on a fair and equitable basis, consistent with the requirements of the Telecommunications Act of 1996.
