

of-way will be excluded on the entire area. The area is also excluded from the Taylor Grazing Act. Unrestricted hiking will be allowed through out the area. OHV's will be limited to designated roads and trails. The Route Designation Plan/Environmental Assessment designates the routes of vehicle travel and multiuse trails within the ACEC. Presently, there are 40 miles of existing roads within the ACEC. The Plan closes approximately 20 miles of existing roads within the ACEC. These 20 miles of roads are causing severe environmental damage, are placed in the wrong locations, are dangerous to users, and will be closed to general public use within the ACEC. Approximately 60 miles of multiuse hike/bike/equestrian trails are designated by the Route Designation Plan and will be developed separately from the existing road system within the ACEC. The trails will allow the users to gain access into the back country of the ACEC without being in direct competition with the motorized vehicles using the area. Roads and trails will be signed with standard OHV signage. Information kiosks will be placed at all roads that enter the ACEC. Attached to the kiosk will be a road/trail transportation system map, OHV rules and regulations, and interpretive road and trail brochures. The principal author of these closures, trail, and road designations is Paul T. Happel of the Roswell Field Office, Bureau of Land Management, Department of the Interior.
