

MONTHLY SURVEY OF INDUSTRIAL ELECTRICITY USE

Electric Utility Deliveries by Industrial Class of Customer

For the month of _____, _____
(year)

This survey is authorized by law (12 U.S.C. §§ 225a, 263, 353 et seq, and 461). Your voluntary cooperation in submitting this survey is needed to make the results comprehensive, accurate, and timely. The Federal Reserve System regards the individual information provided by each respondent as confidential. If it should be determined subsequently that any information collected on this form must be released, respondents will be notified.

The Federal Reserve may not conduct or sponsor, and an organization (or a person) is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Public reporting burden for this collection of information is estimated to average 1.0 hour per response for the utility respondents, including the time to gather and maintain data in the required form and to review instructions and complete the information collection. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: Secretary, Board of Governors of the Federal Reserve System, 20th and C Streets, N.W., Washington, DC 20551; and to the Office of Management and Budget, Paperwork Reduction Project (7100-0057), Washington, DC 20503.

Please read instructions below before providing information.

INTRODUCTION

The electric power data that you provide to the Federal Reserve System will be used for statistical purposes only. Data that are published by the Board of Governors of the Federal Reserve System (Board) or by any Federal Reserve Bank will be shown at high enough levels of aggregation so that the operation of an individual utility or an individual customer of a utility will not be disclosed.

This information is requested primarily to assist the Board in the compilation of its monthly index of industrial production. For many U.S. industries, cyclical and seasonal movements in output and in use of electric power are very similar. Thus, this survey enables the Board to estimate monthly changes in physical output for many key industries where other data are unsuitable or are unavailable. In addition to its use for the index of industrial production, this information is incorporated in a special tabulation, Electric Power Use by Industries, which is published monthly by the Board as a service to the public.

THE COMPLETED SURVEY SHOULD BE RETURNED WITHIN 20 DAYS FOLLOWING THE END OF THE REPORT MONTH TO THE FEDERAL RESERVE BANK OF

INSTRUCTIONS

General Instructions: This survey requests information from privately and publicly owned electric utility companies that provide electrical service to domestic industrial customers primarily engaged in mining and manufacturing activity. Questions about the data to be reported (appropriate SIC codes, coverage, etc.) should be directed to the Federal Reserve Bank.

Reporting Forms: You may use this form or submit the information in an alternative format acceptable to the Federal Reserve Bank. Please contact the Reserve Bank with respect to any alternative format in which you will submit this information.

Electricity Delivered to Industrial Customers: The stub entries are based on the 1987 Standard Industrial Classification (SIC). With four exceptions, the preprinted SIC-based 4-digit stubs are for 3-digit *industry groups* and for "Not classified beyond 2-digit SIC" industry groups. The latter industrial category pertains to those customers for which

only a 2-digit code could be assigned. The four exceptions are for 4-digit *industries*. In the stub-item box, which corresponds to the customers' 1987 SIC code, enter the total kilowatt hours delivered during the survey month, rounded to the nearest thousand (megawatt hours). The total kilowatt hours may also be entered in the box marked optional. If deliveries are not readily available for the calendar month, the quantity of kilowatt hours delivered for the latest relevant billing period will be acceptable.

Remarks: The Federal Reserve staff will review individual surveys for continuity of deliveries by class of user. To assist the Federal Reserve in this process, please explain in the remarks section below any large month-to-month fluctuations or other apparent anomalies that are attributable to uncommon events (such as strikes, floods, and the like). Please also inform the Federal Reserve Bank if your data cover a different service area than in the previous month.

REMARKS - Please explain large month-to-month fluctuations, etc., below. Also, please indicate if your data cover a different service area than in the previous month.

**ELECTRICITY DELIVERED TO INDUSTRIAL CUSTOMERS
DURING _____ BY SIC CODE OF CUSTOMER**
month/year

Note: Please report kilowatt hours (KWH) rounded to the nearest thousand (megawatt hours).

SIC Description of Customers' Primary Industrial Activity	Code	Deliveries 1,000 KWH

MONTHLY SURVEY OF INDUSTRIAL ELECTRICITY USE

Net Use of Self-Generated Electric Power for Mining and Manufacturing by Industrial Class of User

For the month of _____, _____
 (year)

This survey is authorized by law (12 U.S.C. §§ 225a, 263, 353 et seq., and 461). Your voluntary cooperation in submitting this report is needed to make the results comprehensive, accurate, and timely. The Federal Reserve System regards the individual information provided by each respondent as confidential. If it should be determined subsequently that any information collected on this form must be released, respondents will be notified.

The Federal Reserve may not conduct or sponsor, and an organization (or a person) is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Public reporting burden for this collection of information is estimated to average 0.5 hour per response for the self-generator respondents, including the time to gather and maintain data in the required form and to review instructions and complete the information collection. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: Secretary, Board of Governors of the Federal Reserve System, 20th and C Streets, N.W., Washington DC 20551; and to the Office of Management and Budget, Paperwork Reduction Project (7100-0057), Washington, DC 20503.

Please read instructions below before providing information.

INTRODUCTION

The electric power data that you provide to the Federal Reserve System will be used for statistical purposes only. Data that are published by the Board of Governors of the Federal Reserve System (Board) or by any Federal Reserve Bank will be shown at high enough levels of aggregation so that the operation of an individual reporting company will not be disclosed.

This information is requested primarily to assist the Board in the compilation of its monthly index of industrial production. For many U.S. industries, cyclical and seasonal movements in output and in use of electric power are very similar. Thus, this survey enables the Board to estimate monthly changes in physical output for many key industries where other data are unsuitable or are unavailable. In addition to its use for the index of industrial production, this information is incorporated in a special tabulation, Electric Power Use by Industries, which is published monthly by the Board as a service to the public.

THE COMPLETED SURVEY SHOULD BE RETURNED WITHIN 20 DAYS FOLLOWING THE END OF THE REPORT MONTH TO THE FEDERAL RESERVE BANK OF

INSTRUCTIONS

This survey requests information from industrial power plants that generate electric power for use by mining and manufacturing establishments within the same company as the power plant. Questions about the data to be reported should be directed to the Federal Reserve Bank.

You may use this form or submit the information in an alternative format acceptable to the Federal Reserve Bank. Please contact the Reserve Bank with respect to any alternative format in which you will submit this information.

Please list the *total net use* by the user establishment(s). Enter the self-generated kilowatt hours used during the survey month, rounded to the nearest thousand. If space is insufficient, please continue in the remarks section.

Net use is defined as follows:

Gross generation

- less: kilowatt hours consumed out of gross generation for power station use,
- less: sales to utilities,
- less: insofar as separately recorded, any self-generated power used primarily for activities other than mining or manufacturing.

The Federal Reserve staff will review individual surveys for continuity of power usage. To assist the Federal Reserve in this process, please explain in the Remarks section below any large month-to-month fluctuations or other apparent anomalies that are attributable to uncommon events (such as strikes, floods, and the like).

REMARKS – Please explain large month-to-month fluctuations, etc., below.
