

## **MPH-Community Health**

The community health concentration prepares professionals from a variety of disciplinary backgrounds and interests (e.g., medicine, nursing, allied health, social work, social sciences, psychology, dentistry, physician assistant, health education, nutrition, etc.) to assume public health positions. The community health concentration uses a multidisciplinary approach and focuses on social, cultural, political, and economic factors that influence health status and health-related behaviors of individuals. The community health concentration emphasizes the role of social, economic, cultural, and behavioral factors in disease prevention, promotion of health, vulnerability to disease, and interaction with health care systems. The curriculum concentrates on strategies for the promotion of health and the prevention of disease in populations through public health policy and interventions in the context of social structure, community, family, and health care systems. Traditionally, program graduates have assumed positions in public health as well as both public and private health care.

### **Curriculum**

#### **Core Curriculum Requirements: 15 SCH**

BIOS	5210	Biostatistics for Public Health I	3 SCH
ENVR	5300	Environmental Health	3 SCH
EPID	5100	Principles of Epidemiology	3 SCH
HMAP	5210	Introduction to Health Management and Policy	3 SCH
SCBS	5110	Behavioral and Social Aspects of Public Health	3 SCH

#### **Culminating Experience: 6 SCH**

HMAP or SCBS	5800	Capstone	3 SCH
SPH	5900	Professional Report	3 SCH
-or-			
SPH	5950	Thesis	6 SCH

### **Community Health Concentration Curriculum**

#### **Practicum Requirement: 3 SCH**

SPH	5855	Public Health Practice Experience	3 SCH
-----	------	-----------------------------------	-------

#### **Required Courses: 18 SCH**

*BIOS	5215	Biostatistics for Public Health II	3 SCH
SCBS	5350	Introduction to Research Methods in SCBS	3 SCH
SCBS	5400	Community Health	3 SCH

SCBS	5410	Community Assessment	3 SCH
SCBS	5411	Community Program and Intervention Planning	3 SCH
SCBS	5412	Program Evaluation in Public Health	3 SCH

**Elective Courses: 3 SCH**

Students may take any three hour SPH course with approval of academic advisor.

\*Students may substitute BIOS 5215 (Required Course) with EPID 5300 or SCBS 6170.

**Community Health Concentration Learning Objectives**

By the conclusion of the M.P.H. program, a student in the community health concentration will be able to:

1. Critically evaluate the value and the implications of diversity (racial/ethnic, cultural, and social) and the importance of cultural competency in addressing public health issues in the community.
2. Identify the role and impact of demographic, social, economic, cultural, political, and behavioral factors in determining population health status, disease, disease preventing and health promoting behavior, and medical service organization and delivery.
3. Describe how race/ethnicity, socioeconomic status, demographic characteristics, and culture affect individual and group physical and psychological responses to health messages.
4. Analyze the implications of the global inter-connectives of our society in the economic, social, and political areas and its public health implications at the local level.
5. Analyze factors that contribute to individuals' social, economic, and political incorporation and acculturation in the mainstream social and describe how this process affects health status and delivery of health care.
6. Critically evaluate and use the behavioral sciences' theory and literature in determining which health promotion/disease prevention programs/interventions may or may not be effective because of group social, racial, ethnic, economic factors as well as unique characteristics and requirements of different cultures.
7. Apply knowledge of community social, economic, political and cultural characteristics in the development and implementation of interventions in participatory community health planning.
8. Identify and assess economic, cultural, political and social barriers to the development of programs to address community public health needs and adapts approaches and solutions to problems that take into account cultural differences.
9. Promote networks and establish partnerships with diverse community agencies, health providers, community organizations and institutions to promote policies, programs, services and resources that protect the health of community residents.
10. Interact ethically and professionally with persons from diverse cultural, socioeconomic, educational, and professional backgrounds and with persons of all ages and lifestyle preferences.
11. Identify community needs, demands, problems, resources available, and develop suggestions for action.
